Thread: [\[TuT\] Successful Spreading with Youtube & Steam.](#)

Pr0toType - March 27, 2010, 9:16 am

The easiest way to spread you're RAT/Virus/Trojan or anything else is YouTube, (Really).

Before posting please read this!

Spoiler [\(Click to View\)](#)

"But wait, this shit has been posted before".

Are you sure about that? Read the guide through first ;).

"Isn't recording an video and uploading an big hassle?"

No its not, well atleast not for now, since I made a nice little video for all of you.

"Will this even work?"

Ofcourse, otherwise I wouldn't be posting it eh?

"Why the encrypted password ??"

You're on an hacking forums, so decrypting one shouldn't be hard at all, If you're really having a though time, post, and I'll PM you.

"Are you going to provide us with that steam hack you used back there in the video?"

Simple answer, No I'm not going to provide you with that, you should go search for it, its located in "Hacking Tutorials" on page 2 or 3.

Getting started.

What we will be using is "Steam".

There are over millions of kids that can't buy anything but are begging to get games. (All over the forums, and Youtube, and other various sites like blogs.)

I've kept an video uploaded on youtube for about 1 day and got around 90 victims. (Never keep this video I provided you with on YouTube for a long time, you never know if anyone might come across it and take actions against you. (Keep it for like 3 days, until you are sure you got connections).

The Video.

Here's my video, I'm not sure but I think the description hasn't been updated yet (Damn you Google).

[Watch the video here.](#)

Quality is low too due to YouTube is still doing that shit they do with newly updated video's.

Here's the MP4 so you can use the video too.

[Download the MP4 Here.](#)

Decrypt : FERON-74 / TRIPO-5 / BASE-64 (REVERSED).

What follows?

After you uploaded the video, add the description, use an spell checker to get rid of the bad grammar, since you with good grammar you will come over as a intelligent and safe person. Or you could use the description I used in my video, (Might still be updating!).

Getting more viewers.

Now you can see how much downloads you will get, post your video on some forums, and you soon will get around the 100 victims in one day.

Also, ask people here on HF to comment on your video and the rate it, so it will jump the massive list.

Tags? Do we really need them?

Yes, this is the best thing that happened to us spreaders.

Why? Because tags are just that awesome, the more you got, the more views your video will get, and then it will rise up in the search list.

Now you're asking, "How do tags even help?", well, thats really simple, you want you're video to show up when people search for "Steam"? Add steam as a tag, do you want people to see you're video to show up when they search for "Hack"? Add it to the tags!

Youtube usually has a list of tags you can add but those are really small, so you would search on Google for "Youtube Tags", remember tags don't have to be on topic of the video, it can be anything, just remember, you want people to see "YOUR" video when they search for that phrase.

Now you're done.

I wrote this guide so you guys would have a easier time spreading, so saying thanks doesn't take long (Only 2 seconds of you're precious time :P).

And commenting/rating my video will help me really much!

I appreciate you guys taking your time to read my guide!

Have fun with this method!
