Edited it so those with (SERIES) are tv series.

edited again so the tv shows/series have a section for them and movies for them.

You should sort them alphabetically for easier access, unless they are sorted by your taste. Good movies/series ;)

Thanks for the share, OP!

From TV series definitely try Suits, and Merlin i- it is about Arthurian legend, but with magic, it is really well done, great tv show. And as for anime try one piece and fairy tail if you haven't because they definitely got same feeling about them as Naruto and bleach, worth it.

Xparn - April 23, 2013, 3:36 pm

Already tried suits didn't like it, Merlin i'm not sure i could check it out. One piece i can't stand Fairy tail neither.

it's a good list, but maybe you should consider adding inception, shutter island and cloud atlas too, those movies are pretty interesting and have the same style of many movies that are already in the list

boyswannabeme - May 30, 2013, 10:19 pm

Good list OP. Breaking Bad by far the best series I've seen. You should try the Fringe series. It has finished airing though. One of the best series for me.

As for movies, I would recommend There Will Be Blood. Great movie and Daniel Day Lewis as always superb. That scene near the end is class.
