USA is not considered offshore, yet it says so on your site.

Edit: Do you really offer 64gbps DDoS "rttection"?

VENETX - March 31, 2013, 4:39 am

There must be a typo on the site, Ill fix it now.

Also the ddos protection is 64gbps shared not dedicated to you

httprequest - May 20, 2013, 6:42 pm

Would i be allowed to run a HTTP Botnet??

VENETX - May 21, 2013, 2:27 am

When we open up our Shared Hosting up again we will be strict and only allow legal websites.

On our VPS you may host some other stuff that our shared hosting won't.
If you have any questions about this feel free to PM me.

VENETX - April 3, 2014, 6:49 am

Our Shared Hosting packages have dropped pricing to only \$1/month!

atomic-cruncher - April 13, 2014, 3:31 am

Hello,

I'm currently hosting a unlimited reseller on vpsdatabase
and the support is just horrible!

I've been waiting 3 days right now and the support tickets still ain't answered.
Also the skype support doesn't accept my invite.

Next time I'll buy it on a different host. Horrible, just horrible!

Also, there is a livechat, you join it and after 5 hours still no advisor.

@?CHERIDON561

Im just being a consultant now, and finding http botnets host will be a challenge since most of them
get listed on spmahaus now a days as ICEX / Zeus and providers hate it when they get their ips
listed.
