Thread: [\[HQ with Pictures!\]Bitcoin Mining Tutorial! All You Need to Know!](#)

Remix™ - April 1, 2013, 9:40 am

We are up to 13.6k views! on this thread!!

Hey guys, today I am going to be showing you how to set up your BitCoin or BTC Miner.

First things first:

What are BitCoins?

Bitcoins (BTC) are a decentralized digital currency based on cryptography and an open-source, peer-to-peer internet protocol.

Here is a youtube video to explain further,

[Video: http://www.youtube.com/watch?feature=player_embedded&v=Um63OQz3bjo]

Now how can I make money off this?

Since BitCoins are created by Miners which is soon going to be you. This setup will put you into a mining pool with other miners who work on a block which contains 25 BitCoins each. Each block broken is divided up among'st the workers relative to the amount of work they did.

What is a Miner?

A Miner is a program that utilizes your computer's CPU (CPU Not recommended. There is no money to be made with it) or GPU to generate BitCoins. The program will not slow your computer down once it is turned off so don't worry about that!

Great! How can I get started?

Well first we are going to need to set you up a BitCoin Digital Wallet. I like to use MultiBit, the link is [Here](#)

Download and install the wallet that is for your OS.

Now where can I find a BitCoin Miner??

I recommend using GUI Miner, because it is easy to set up, and is great for beginners!

You can download the latest version [Here](#)

It will download as a .zip file that auto-unzips when you run it. Just extract it to somewhere you will remember!

Once you extract it, run the program listed as guiminer

Make sure that you have OpenCL or PyOpenCL installed for you GPU to run this miner. Here is a link for OpenCL for AMD/ATI Cards

[Here](#)

Now we are going to need to sign up for a BitCoin mining pool!

I personally like to use slush's pool, because it is reliable and over has a nice feel to it. You can sign up [Here!](#)

And now click on this

Once you have successfully signed up, go to [Your profile, which can be found here](#)

You are going to take your multibit wallet ID and import it to your account. Click the box to the right of the wallet ID to add it to your clipboard.

And import the wallet ID into your account!

Once imported, you are going to register a new worker on the same page. Scroll down and click to register a new worker. It doesn't matter that you see my password because all you can do with it is mine for me and help me produce more BTC for my account :D

So now that we have everything set up on the client end, we are going to need to set up the rest on your end.

Open up guiminer and make the server slush's pool. Also fill in your miner's info, and use the miner password you set up, not your account's password!

The device should already be selected to your fasted GPU, but make sure that you set it yourself just incase. We are going to be using your GPU because CPU mining is now obsolete because of the current difficulty.

You can add the text in the extra flags box such as I did to make your machine dedicated to purely mining -v -w 128 (This makes your computer's graphics very laggy and makes your computer slow) or you can add -f 60 to be able to still be able to play on your computer(This makes it so that your computer leaves some room for your GPU to still be used some what efficiently)

Now all you have to do it hit Start Mining!

You can calculate how much you can make using BTC mining [here](#)

I hope this helped you all who are looking into starting BTC Mining. The price of BitCoins are going through the roof! The current price of a BitCoin at the time of this thread is \$723.88!!

If you need any extra help, send me a PM at this link [Here](#)

Problems with ATI Drivers ([Click to View](#)) If you are having problems with your ATI drivers, follow this

1. Download and install and run ATIman which will remove any trace of your drivers and registry entries for your ATI card. (Link = <http://bit.ly> [WARNING: potentially infected]/13l3kGs)

2. Install the latest stable (non beta) catalyst centre (currently 13.1)

And it should work thereafter.

Thanks to ridgerider08 for the solution

.Alerion - April 1, 2013, 9:47 am

This one is better than my tutorial, I'm proud of you man.

Remix™ - April 1, 2013, 10:04 am

Sorry I am completely new to this.

If you dont have an OpenCL device it wont run, ill try to post a TuT with a different miner later today

Xelias - April 5, 2013, 2:17 pm

Nice tut.

I'd add in two things though

It isn't smart to use a CPU for mining, for one the rate they mine is so slow it just isn't worth it, not to mention CPUs are very costly compared to GPUs and mining does run the chance of hardware failure if you aren't careful.

Also, you shouldn't try mining if you have an nVidia GPU, AMD blows away their return rate.

Remix™ - April 5, 2013, 4:51 pm

(Apr 5, 2013 02:17 PM)Xelias Wrote: [\[CITE\]](#) Nice tut.

Also, you shouldn't try mining if you have an nVidia GPU, AMD blows away their return rate.

I thought I added the CPU thing in there but yes you are correct, I will also add in that nVidia sucks ass at mining

makecashflowonline - April 5, 2013, 6:55 pm

bitcoin mining, is honestly a waste, i really dont like it.

Guide - April 5, 2013, 8:46 pm

Guiminer doesnt work for me :/

Nice guide by the way, it was really helpful.

Yes you would definately be able to achieve this without much of a problem as long ad your card is not nVidia, their hash rates are rather slow

ridgerider08 - April 9, 2013, 7:24 am

Hello there, great tut!

I was wondering what the whole difficulty thing was about when it comes to mining. I am mining on my laptop that has an ATI HD5870 so what would you reccomend?

Thanks again for the helpful guide!

Lord Vader - April 11, 2013, 2:27 am

Hello,

Thank you for your really detailed guide, it helped alot for me in this topic but there are some questions I would like to ask if that is no problem to you.

1. What is the average hashrate for users? (I have ~90Mhash) How can I improve this rate?
2. Let's imagine I've already earned X bitcoins and want to change it to \$\$ or real money say RM. How can one do this?
3. Does it worth running more clients or miners on one computer? My logic says no, but better to ask then to remain stupid haha
4. How much does one BTC worth at the moment in \$?
5. My last question I promise :DD, what is that difficulty thing at the BTC calculator you posted?

Thank you for your answers and time!

LV

Remix™ - April 11, 2013, 3:37 am

Honestly I am not sure of the average rate

Second you can exchange here on this site for money on PayPal

Third, no, one program uses your whole card, using 2 will split the hash in half

Fourth, check btc-e.com for the current price

Lastly, it is adjusted to how many BTC are left and the currebt hashes of all the pools combined, basically so its not too easy to mine

Lord Vader - April 11, 2013, 3:52 am

I see thank you for your answers, made it clearer.

One more thing I'm not sure about. If I get the final share of a block, do I get more btc for it or what? and how long does it take for a block to be solved usually? Because I see these rounds but noone says anything about the length of one.

Thanks

Yeah it just kept disappearing but after hours or research and uninstalling and re installing of drivers I had found a solution ? !!! If anyone else has this problem this is what you need to do.

1. Download and install and run ATIman which will remove any trace of your drivers and registry entries for your ATI card. (Link = <http://bit.ly> [WARNING: potentially infected]/13l3kGs)

2. Install the latest stable (non beta) catalyst centre (currently 13.1)

And it should work thereafter.

I am not quite sure as to if they are real/when they would even ship.

SpinlessMonkey - April 24, 2013, 5:43 pm

wow I cant wait to try this out, this is awesome thanks

Remix™ - April 24, 2013, 5:55 pm

Thanks for the kid words man! Means a lot!

Commander 11:11 - April 28, 2013, 4:49 am

Very nice and HQ Tutorial!I'm about to start with Mining but having a problems with OpenCL because I'm not sure if my Radeon HD 6770M (Mobile) supports it I was searching trough drivers but i don't think it is supported! ?

POD - April 28, 2013, 6:21 am

Hello Remix,

Thanks for the share in this community with that HQ Tutorial.

I was just looking for some monetizing technics here on forum and came across with your tutorial.

My knowledge about monetyze online is purely PPD.

But I have a question about bitcoin, what is the aprox income that you can generate in 1week of mining? I mean, after convert the bitcoins for money like \$ or €.

I will be glad if you can answer me, so I can decide if I should invest my time in PPD or in Bitcoin.

Thanks in advance.

.Dmo - April 28, 2013, 10:09 am

Are you able to run the miner on a VPS, and if you can what OS(s) does it support?

Remix™ - April 29, 2013, 4:53 pm

(Apr 28, 2013 06:21 AM)POD Wrote: [\[CITE\]](#) Hello Remix,

It depends on the type of GPU that you are using

(Apr 28, 2013 10:09 AM)Dmo5525 Wrote: [\[CITE\]](#) Are you able to run the miner on a VPS, and if you can what OS(s) does it support?

I am honestly not positive, try to do some more research

Tagster - April 29, 2013, 9:11 pm

Vouch for well organized tutorial I have mine setup as we speak. Thanks OP. ?

Thabks for the kind words man, means a lot!

Kluxe - May 1, 2013, 6:28 pm

On my settings it doesnt give me the option to change it to GPU any ideas?

Remix™ - May 1, 2013, 6:52 pm

(May 1, 2013 06:28 PM)Klux e Wrote: [\[CITE\]](#) On my settings it doesnt give me the option to change it to GPU any ideas?

I believe I am talking to you on skype at the moment but I will also reply here just in case. Do you know what type of gpu you have? There may be a simple problem with your drivers.

Processor - May 1, 2013, 8:34 pm

Nice tutorial man. Looks pretty good.

zyper7 - May 2, 2013, 3:14 pm

i still dont understand what this mining crap is? can someone explain it in normal terms? so this software runs on my computer and i get paid for it to run?

or do i actually have to solve these math problems myself? whats stopping someone from buying like hundreds of computers and having them all run?

also does mining wear down my graphics card or something or does it cost anything?

Remix™ - May 2, 2013, 5:16 pm

(May 2, 2013 03:14 PM)zyper7 Wrote: [\[CITE\]](#) i still dont understand what this mining crap is? can someone explain it in normal terms? so this software runs on my computer and i get paid for it to run?

also does mining wear down my graphics card or something or does it cost anything?

You obviously did not read this TuT...

But to help you out here it goes:

- 1) You run the program on your computer and it earns you money
- 2) You don't solve anything, it is all automatic
- 3) Nothing is stopping people from buying hundreds of computers, its simply the cost of how much they are compared to how long it would take to be repaid
- 4) It can take a toll on your graphics card after a long time, but not normally. You have to watch for overheating for the most part, but it does put some wear on it
- 5) It costs nothing to start

There I hope I helped you friend ?

SpockIndustries - May 9, 2013, 5:51 pm

Never really triend bitmining but I have herd alot about dont think Ill get started though

Durability - May 13, 2013, 3:09 pm

Amazing! Thanks for this help! You really got me going!

UnderArmour - May 15, 2013, 9:03 am

Great tutorial, I still dont know if im going to try it, bitcoin mining just seems like a waste of time..

Remix™ - May 28, 2013, 8:58 pm

For all of those who are still learning, just updated with some new info!

zildzian123 - May 29, 2013, 10:08 am

Thanks for this great tut... Was very detailed and presented good.

NoobCell - May 29, 2013, 12:21 pm

How much can you actually make from mining?

YouLoselsmile - May 29, 2013, 12:25 pm

Nice tut man! I like it! This will definitely help the n00bs

(May 29, 2013 12:21 PM)ZillaBoom Wrote: [\[CITE\]](#) How much can you actually make from mining? Depending of your hardware, from a little to a shit load ;) If you're mining with bots, now that's another story.

Glad this is helping so many people!

Remix™ - June 3, 2013, 9:00 pm

Hope this guide is helping everyone! Over 3k views!

schenker88 - June 4, 2013, 2:31 am

Hi there!

Newbie here, but still desperate to make money on the internet!

Can u tell me any technique that really works? If I follow the steps can I have some real bucks?

I have tried too many things, but only my money has been flowing away so far... can u recommend me anything I can make paltry 5-10\$ daily with? I would like to be succeeding a little and really see that money also comes, not just goes!

I appreciate PM-s!

snipher - June 4, 2013, 2:46 am

checking this tutorial right away...good work buddy!!

elisha13 - June 4, 2013, 7:17 am

the photos are not available now :(an you please update the thread :)

Remix™ - June 4, 2013, 10:07 am

(Jun 9, 2013 10:46 AM)hacker137 Wrote: [\[CITE\]](#) Is 2gb GeForce GT 540M good for mining?
No, any nVidia card is not good for mining.

Khaos1988 - June 10, 2013, 1:48 am

DUDE THANK YOU SO MUCH FOR THIS! This is the only tutorial I have found that is really easy to follow.

Remix™ - June 10, 2013, 6:08 pm

Thanks for the kind words, glad to see this is helping everyone!

Cubs - June 12, 2013, 1:35 pm

Great thread to get myself started, thanks a lot OP for taking your time to make this!

mcgoo - June 14, 2013, 1:11 am

Thanks for posting OP, nice TUT, now I gotta learn more about BTC.

#pimp - June 14, 2013, 7:39 am

Great tutorial! Thanks a lot mate. ?

Seventh - June 14, 2013, 1:10 pm

I am a total newbie, could anyone tell me how much I would roughly make in 24hours?also, does it require any other job than setting this all up ?

bean32 - June 14, 2013, 4:35 pm

nice tutorial will have a go was wondering what bitcoin mining was

justdidit - June 15, 2013, 1:13 am

Thank you man, very nice :)

Very detailed, taught me something, when I thought I was a bitcoin pro! lol.

zeroairsoft - June 15, 2013, 8:09 am

Thanks for this tutorial, it was very easy to understand, especially for a noob like me who knew nothing about bitcoin mining haha xD

Disappeared - June 15, 2013, 8:33 am

Its a great thread But I do not recommend bitcoin mining

helpfulguy - June 15, 2013, 12:20 pm

Thanks mate..Great HQ tutorial... ?

POD - June 15, 2013, 12:25 pm

Really nice dude!

Thanks a lot, I'll try bitcoin now :P Seems interesting =)

red_dragon_69 - June 16, 2013, 6:02 am

If you don't have a powerful computer (especially a powerful video card) you'll just waste your time.

TechnoNerd - June 16, 2013, 7:41 am

Is this Bit Coining method legal..?

or how are they paying ..?

PS: I'm a noob in this, please help me...

Remix™ - June 20, 2013, 5:31 pm

Really glad that this is helping so many people out!

(Jun 16, 2013 06:02 AM)red_dragon_69 Wrote: [\[CITE\]](#) If you don't have a powerful computer (especially a powerful video card) you'll just waste your time.

You are wrong. You only need a powerful video card with a computer that can run it. The computer does not have to be strong.

(Jun 16, 2013 07:41 AM)TechnoNerd Wrote: [\[CITE\]](#) Is this Bit Coining method legal..?

or how are they paying ..?

PS: I'm a noob in this, please help me...

It is legal, they pay you in BitCoins

Remix™ - June 24, 2013, 6:59 pm

Almost 5,000 views! Glad this is helping so many people!

Randy™ - June 24, 2013, 7:23 pm

Awesome tutorial, helped so much!! Whats a good khash/s?

Pavoni - June 25, 2013, 9:01 pm

If I were to dedicate 12 hours a day leaving this running at half GPU/CPU efficiency, how much could I make approximately?

I have the following:

3.2 GHZ 6 core processor
Radeon 7870 2GB Vidcard
8GB RAM

Berimox - June 26, 2013, 4:13 am

First time when I opened Guiminer it worked i mined for 3 hours. But after that I started guiminer and couldnt see it? I tried everything. This tutorial is really nice :)

terry903 - June 26, 2013, 5:10 am

Don't these cost more electricity to run than how much it pays?

peterman1994 - June 26, 2013, 7:05 pm

Very helpful tutorial thnx.

I started mining. My first day and i have 0.001 bitcoins i will continue mining.

Remix™ - June 26, 2013, 7:40 pm

Wow this is becoming extremely popular! Just hit 5k views!!

Remix™ - July 2, 2013, 6:24 pm

Glad that so many people like this! Keep it going!

loupikv - July 2, 2013, 6:51 pm

Remix I have a question for you sorry if you already answered it :

When will I receive my Bitcoin? I have 102 round shares (dont know what that is). I left my miner mining for like 6 hours and stopped after that. What am I doing wrong? Should I keep it on for a longer amount of time? I know normally you get your coins (what you worked for) the moment the entire block is mined but I did not receive anything yet and it has been 1 week since I stoped mining.

Also is 31 MHash/s decent ? It probably isnt.

Thank you

Carlyle - July 2, 2013, 8:29 pm

The highest I get is 14.8 hash or something. My GPU is an GT525M don't know if this is good or not. Someone give me feedback? Thanks Remix!

Remix™ - July 2, 2013, 8:43 pm

Two the both of you who posted above me. You need to leave the miner on longer! But the Mhash/s you are both receiving are rather low and might now be worth mining at this point.

Worst Player EU - July 3, 2013, 7:39 pm

This an amazing tutorial Well played man !

Thanks

Dont mine with a nVidia graphics card. They are not built right to mine efficiently. The card is not bad but the way it is made makes it shit for mining. Sorry

Van Klasse - November 29, 2013, 9:43 am

Yes, using it to mine with your CPU will not work, and is not efficient

(Nov 29, 2013 07:45 PM)krud14 Wrote: [\[CITE\]](#) I like this tutorial now if only I can find a way to sell the bitcoins for actual money

You can look at the currency exchange section here on the forums! Or you can PM me and I can see what I can do to buy them from you!

DudeDope - November 29, 2013, 6:53 pm

You should talk about building a step by step rig to help people :) because using just your computer is no profit with cost of electric

TheWikiBoat - December 1, 2013, 12:56 am

Thank you for the tutorial. It really helps me :D

sNize - December 1, 2013, 5:04 am

is it really worth the effort?

how much do you make daily with this graphic card mining ?

Remix™ - December 1, 2013, 10:12 am

(Dec 1, 2013 06:04 AM)FreePls Wrote: [\[CITE\]](#) is it really worth the effort?

how much do you make daily with this graphic card mining ?

It all depends on your Graphics card that you have

Rob Zombie - December 1, 2013, 12:04 pm

Is mining even worth it? I wouldn't think it would be because it is all this work for barely any BTC.

Remix™ - December 2, 2013, 9:29 am

(Dec 1, 2013 01:04 PM)Rob Zombie Wrote: [\[CITE\]](#) Is mining even worth it? I wouldn't think it would be because it is all this work for barely any BTC.

It all depends on your GPU and how fast you are mining. It normally turns out that if you have a decent computer that you make a profit after power consumption costs.

The Best

Remix

xitoxic - December 2, 2013, 9:26 pm

Very detailed and HQ tutorial.

I really learnt the basics from it.

Thanks again.

Redemption - December 2, 2013, 10:47 pm

When I click start mining it's saying nothing to mine, exiting. what does this mean?

nfs rivals - December 3, 2013, 12:29 am

I want it please.

Thanks in advance

BlingFiles - December 3, 2013, 3:34 am

so how much bitcoins would one mine in 24 hours?

Chilluminati - December 3, 2013, 10:03 am

Can i still use this method?

thanks in advance.

-r34lx

touzanimail - December 3, 2013, 11:22 am

actually it is my first time that i have this info about Btc so i still need more info to see the result ,thank you

OG Gangsta - December 3, 2013, 8:04 pm

Hey. I got 1 share. It also says my score is at .7998. What does this mean?

M0t4w - December 3, 2013, 8:23 pm

Anyone know how good of a gpu you need to mine decently? I have a geoforce gt 620, so it's nothin extreme. I heard ATI is preferred. this true?

Double Cross - December 3, 2013, 8:28 pm

In my opinion, with the current difficult rate, people should not mine as it is not profitable.

krud14 - December 6, 2013, 8:14 am

Will this work for an NVIDIA GeForce 6150SE graphics card?

arthasxx - December 6, 2013, 8:48 am

Wow really nice tutorial , i try this now

Thx

Remix™ - December 6, 2013, 11:02 am

(Dec 6, 2013 09:14 AM)krud14 Wrote: [\[CITE\]](#) Will this work for an NVIDIA GeForce 6150SE graphics card?

No it will not work because mining is not good for nVidia cards. Sorry!

ProblemSolva - December 6, 2013, 4:58 pm

Hey i got a nvidia gtx780 card,

I was wondering if its bad for your card life span,

If your mining, and yea i know nvidia sux at mining

But wanted to know if its bad for the card's health

3dVision - December 6, 2013, 5:04 pm

Most of us have Nvidia cards though, this sucks. (for me)

Was hoping for it, good tut though. Thanks anyway Remix!

iMalware - December 14, 2013, 2:05 am

This only fucks up my computer and makes it hot. nice tutorial btw.

Zer0_hour - August 11, 2014, 9:57 am

I did everything the tutorial said exactly, and yet I'm still getting only 4-5 mhash/s. Shouldn't it be exponentially more, considering I'm using a GTX 770? Please help

Remix™ - August 12, 2014, 10:46 am

(Aug 11, 2014 09:57 AM)Zer0_hour Wrote: [\[CITE\]](#) I did everything the tutorial said exactly, and yet I'm still getting only 4-5 mhash/s. Shouldn't it be exponentially more, considering I'm using a GTX 770? Please help

Sadly, a nVida graphics card will not yield you much as the way that the card is designed and the way that BTC needs to be mined. Try using this tutorial and a few others to mine LTC instead

Zaxanom - August 12, 2014, 10:53 am

Great tut for newbies like me
Thanks @OP

Dylan25079 - August 13, 2014, 9:20 am

This is very detailed and a amazing thread, If I could, I'd +rep you, this helped m out so much

Citizen_Erased - August 13, 2014, 4:39 pm

Thanks for a great tutorial. I appreciate it.

? Eugtique ? - August 15, 2014, 8:52 am

Nice tutorial. Thanks for this. I'm starting this as from now ^^

king solomon - August 15, 2014, 11:52 am

Soo i have a EVGA Nvidia GTX 670 in quite a good computer well cooled and so on, would it be worth mining with this? i got to school so it could be on while im there and probably most of the day.

Remix™ - August 17, 2014, 5:12 pm

(Aug 17, 2014 04:11 PM)dada123 Wrote: [\[CITE\]](#) Soo i have a EVGA Nvidia GTX 670 in quite a good computer well cooled and so on, would it be worth mining with this? i got to school so it could be on while im there and probably most of the day.

No sadly, any type of Nvidia card is not so great for BTC mining due to the way it processes data

micheul - November 4, 2014, 6:02 am

Yeah man , THX for ur good tut !!!

Long time I eared about miner bitcoin , I used lot of time bitcoin for bought , but I never tried mining

!! Now It s done , with the help of ur thread!!!?

I just change the the host by this one: stratum.bitcoin.cz

and the port : 3333 , that s work now !!!

But I have a poor GeForce 210 graphic card , so for mining is a shit !!!

So I think something , and I m sure that s exist , I must find a RAT for mining , I will looking for on HF , but if you know one , tell me !!! :)

THX man !!! Enjoy !!

Erlas_ - November 4, 2014, 6:09 am

Nice tutorial. Really helps for noobs to bitmining.

Remix™ - November 4, 2014, 9:52 am

Man I forgot all about this TuT! Hopefully people still find it useful

oDubky- - December 6, 2014, 7:27 pm

This looks really cool! I'm not to big on all this stuff but I am going to get into it. Do you need a good PC to run this? You said something about a CPU which I really don't know what that is. But if you pc is slow would you advise me to do this or not?

DeltaForce103 - December 6, 2014, 8:47 pm

(Dec 6, 2014 08:27 PM)oDubky- Wrote: [\[CITE\]](#) This looks really cool! I'm not to big on all this stuff but I am going to get into it. Do you need a good PC to run this? The thread is from nearly two years ago. Bitcoin mining is no longer profitable on any mid-range desktop machine. People use thousands of dollars worth of dedicated ASICs now. You can still try investing in cloud mining or you might want to look at mining altcoins.

Viziano - December 7, 2014, 10:12 am

I have nVidia Geforce 630 2gb,is it good for mining?

Also i have 2gb of ram,2.6ghz dual core processor...

How much can i make with my pc?And does my computer/gpu or something broke if i start mining?

Thanks :P

Rooter - December 7, 2014, 10:44 am

Just a question... Are bitcoins even worth mining nowadays? Great tutorial nonetheless.

Azraelstear - December 8, 2014, 3:03 am

(Dec 7, 2014 11:44 AM)Rooter Wrote: [\[CITE\]](#) Just a question... Are bitcoins even worth mining nowadays? Great tutorial nonetheless.

Isn't it better to use search button or check cryptocurrency section of forum before ing IRELEVANT thread?

Or I've got better idea, it's best not to be in coma. Everybody who have his eyes opened atleast for 1 hour for past 6-12 months knows Bitcoin mining is profitable only for big scale mining factory operators.

opencio - December 8, 2014, 9:50 am

Decent ideas, liked it alot. I respect your inflow of money through bitcoins bud

Aslakkul - September 19, 2015, 9:05 am

Is it possible to have two instances of GUIMiner running on their own GPU and worker? There's no option to use both GPU's simultaneously. Really appreciate your tutorial

Cotto94 - September 19, 2015, 4:15 pm

how many money we can win with this method in 1 month ?

biglenny - September 27, 2015, 7:19 pm

(Sep 19, 2015 04:15 PM)Cotto94 Wrote: [\[CITE\]](#) how many money we can win with this method in 1 month ?

Depends on how much computer power you have

93chandu - September 28, 2015, 1:13 am

I have a mid range laptop with core i5 1.7 Ghz processor, 4gb ram, and 1.5GB INTEL HD Graphics. How much can I earn assuming I let my computr mine 10 hours a day

Flared - September 28, 2015, 1:25 am

Replying to look at later when im on my computer. Very well written tho and im sure it works. Vouch

leeman - September 28, 2015, 5:14 am

Is mining worth it anymore?

Thinking about trying to give it a shot

Cotto94 - September 28, 2015, 8:45 am
