Thread: [ROBLOX: Script Injector other than CoreES](#)

Just looking for a script injector other than CoreES that works on roblox that isn't as popular as CoreES. (PS: Don't post any crap about 'ehores' and don't cuss. Besides, I wouldn't be jealous or degraded by your own selfishness of looking at a computer). That's all.

It's funny how hard you losers that like minecraft and cry over roblox, I hate both but minecraft tops it off with shit, Shit boring gameplay with the graphics of a calculator and nothing but the same repetative bullshit every time you play
