Thread: [April Fools??](#)

Removing a couple links and tricking me into clicking my inbox to find absolutely no PM? I don't get it.

Also, next year Omni, you should make it look like people are logged into your account but when people click on the name or user cPanel they get sent to their own. Just an idea.

Some mad Mentor is apparently closing all the rants/feedbacks about the april fool shit. He should calm down.

Omni ate some peyote last night. It's obvious that when a tree falls in a forest the answer is 42. Think about it.

I got a PM from Omniscient offering me staff. Your PM is probably just bugged or something.

Stevo - April 1, 2013, 5:43 pm

I think that's the whole point... everyone is wondering what it is since he usually does big things like last years.

Ya because omni is totally gonna do your idea. And the joke is that you can't view your recent post's or threads.

Omni really cheaped out this year, do not like.

Why is he doing that? We're just giving our two cents.

This joke got old 5 hours ago, just shutup.

Chrona - April 1, 2013, 5:44 pm

Wasn't very funny this year. However you should check the page source of your inbox.

Jacklin - April 1, 2013, 5:44 pm

We all get it, and it's not even funny. IMO, Omni should really think about better pranks next years.

Obi-Wan Cannabis - April 1, 2013, 5:44 pm

It's not also cheap, he's also late this year isn't he?

Raz3d - April 1, 2013, 5:44 pm

Didn't really fell for it. Easy to see that it isn't real. But I expected a better April Fools. :P
