JIT Debugging

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>
  <system.windows.forms jitDebugging="true" />
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

Hi ?Pr0x3rStYl3?

Is your programm music downloader as you named it in thread name or it's something else?
I'm asking for this bcoz your app is 415 kb size, and you include binc.exe file of 20,5 mb size

What is this binc.exe file and what is download function of it?
Thanks in advance
?

Hi Felix.Frogg, the 415 kb size file is the app but the binc.exe is the ffmpeg file from www.ffmpeg.org that converts the videos to mp3.

And yes, its a music downloader not something else, you can scan again if you want :) or check the binc.exe file hash that is the same as the ffmpeg file hash from www.ffmpeg.org.

And if you dont trust this file you can download by yourself the ffmpeg file and rename it to binc.exe it works too :)

Thank you again for your report, I updated the app so it's not a problem anymore..

I also updated the links and the viruscan.

Nice program! But when you search a song the program freezes until found some results, you might use threading to fix this!

Good job!

Ah, you should make this open source and let others Mod it.

DJBoxer™ - April 2, 2013, 11:51 am

Thanks for sharing this app.

I really like the theme and icon has nice feel and looks clean to use found every things so far i searched for my only issue would be to say its slow at download but a free service i cant really complain.

great work OP! ;)

Looking forward to your next release then by far best music downloader i seen theme is perfect +1?

?Mephobia - April 2, 2013, 12:37 pm

You can remove tedd from the theme credits. He didn't help :) I just left it in the theme credits cause I was lazy. I like the use of the theme though!
