Thread: [\[Noob\] Adwork Media Help](#)

sirEndermen - April 2, 2013, 8:01 pm

I have a legit download that plenty of people are interested in... these are my general stats (goo.gl hits):

I can also take advantage of twitch streamers and reddit to spread the links.

I want to make some money since hosting this file costs me a bit each month, so I've signed up with Adwork Media, but I have no idea where to start.

I have thousands of emails and a few hundred facebook followers (that are actual followers, so again, will actually follow my links).

Where do I start?

Thanks in advance.

You could go to product locker, create a new product locker and that way you no longer have to host your file and you get paid each time someone downloads your file
