stdio - April 3, 2013, 3:05 pm

Homi's Keylogger Tutorial

I have seen many newbies asking these questions again and again, so i have decided to clear things up for you guys a little.

Note: Following short terms are used in this thread

FUD = Fully Undetectable on all Antiviruses

UD = Detected by a few Antiviruses

server.exe = Your keylogger file

AV= Anti-virus

How keylogger works?

Keylogger basically captures every key pressed, and saves it to a text file on your hardisk. Most keyloggers send this text file to your email adress or ftp account.

You can view this text file and search for username and password of facebook/yahoo/gmail etc

Every keylogger comes with a builder, this builder is used to generate server.exe.

In the builder, you select all your desired options, enter your email adress, password to receive the logs. After entering every required thing you generate or build server.exe this is the keylogger that you will use to infect other people :)

I want to save my server.exe as a server.jpeg, how can i do that?

You cannot do this, if you save your server.exe as server.jpeg it won't be executed. However you can spoof the extension, see these threads

<https://hackforums.net/showthread.php?tid=2437243>

<https://hackforums.net/showthread.php?tid=1020443>

How can i put Keylogger in a picture?

You cannot put a keylogger in a picture, you can however use a binder to bind keylogger with a picture. If you bind keylogger with a picture, you will get an exe file not a jpeg file. See this thread for more details

<https://hackforums.net/showthread.php?tid=29116&highlight=binder>

How to Un-Keylog myself?

First you need to remove the server.exe from startup, if you are using Windows then goto msconfig and then remove any suspicious file from startup list. Or install CCleaner and remove the keylogger from startup.

Then search for that exe on your hardisk and delete it, you might need to use taskmanager to end the process before you can delete it.

How can i save myself from keyloggers?

You can get free keyscramblers to protect yourself from keyloggers, Antiviruses also help but there are many keyloggers that can bypass all Antiviruses :)

I would recommend, checking your startup list everyday for any suspicious thing (use CCleaner)

Do you need to port forward with keyloggers or is that just for RAT's?

Port forwarding is just for RATs, keyloggers are very simple and do not need much effort in setting

up.

Someone tried to hack me by sending his keylogger, can i hack him back?

Its possible, download and install Hex Editor (HxD), search for strings and you might find an email and password. But sometimes such strings are encrypted so its hard to find. You can also search for strings of an exe by opening the exe file in notepad.

Hint: After opening the server.exe in notepad or HxD, Press Ctrl+f and enter ".com" without quotes of course then click search or search next.

Do i need a Crypter for my keylogger?

If you have a FUD Keylogger then you will not need a crypter, because basic purpose of a crypter is to reduce detection rate of your keylogger or any such program.

I bought a FUD keylogger but after i change its icon it becomes detected

This is very common issue, try a private icon changer or try a different icon file. Free exe icon changer is a good tool and most of the times it does not increases detection rate of your keylogger or any such program.

Can i rename my server.exe to other extension which looks less suspicious?

There are many extensions that execute a program most commonly used are .scr and .com, you can rename your server.exe to anything.scr or myEmail.com and it will still be executed same way as .exe

Which is the best free keylogger?

In my opinion REFOG is the best free keylogger for local computer. It has many good features (google it) and works great the only problem is that it expires after 30 days. Adramax is also good and simple.

Free Keyloggers are not FUD, so in most cases you cannot use them to infect others. Use search button and you will also find many free good keyloggers on HF :)

I bought a FUD keylogger, but when i build server.exe my AV detects it

Most keyloggers either generate an exe or patch it, in both cases AV goes mad. This is common so don't worry about it. Before you build, disable your AV temporarily.

You can always scan your server.exe on elementscanner or razorscaner to check if its FUD or not.

If my server.exe becomes detected, will i lose all my victims?

You will lose most of your victims, since about 80% people use AVs and the server.exe will be detected and deleted or stopped.

How can i re-FUD my server.exe without coding or spending money on crypter/binder?

There are many methods you can use to reduce detection rate, following are a few of them Use Hex Editor to change content of strings used in the server.exe

Try changing the icon using resource hacker or other free tool

Increase size of server.exe using file pumpers, you can find one for free very easily just google or search hf for it

Which is the best paid keylogger?

It depends on many factors, few are listed below FUD and how long it stays FUD

Price/month or per 6 months

Quality of support provided by the author

Features

Which language it was coded in?

Does it has any dependencies?

How can i know if my keylogger is FUD or not?

You can scan your server.exe on elementscanner.net or razorscanner.com, you must register a free account on these websites to get a free daily scan.

Never use virustotal or novirusthanks to scan your keylogger because these shitty sites send your keylogger to Antivirus Labs and it goes from FUD to UD in a few days.

I have seen these features in many keyloggers, please describe them?

[x] Antis: Kills specific programs

[x] Stealers: Steal information like browser cookies, browser saved usernames/passwords etc

[x] Cookie Deletion: Removes cookies so the victim must re-enter the username/password

[x] Encryption: Your email/ftp info for keylogger is secured by encryption

[x] AV Site Blocker: Blocks specific sites from being opened

[x] USB Spread: Spreads your server.exe via usb (google autorun.inf method)

[x] Startup: Autostarts on system startup

[x] Taskmanager Killer: Blocks taskmanager from opening up

[x] Clipboard Logger: records anything you copy (Ctrl+c)

[x] Downloader: Downloads your desired program from a direct download link given to it

[x] Fake Error: shows an error message like "Access violation at adress 0x003B7EC" etc..

[x] Melt: server.exe deletes itself after a specific date or an event

[x] Screen Logger: Saves screenshots of the screen

[x] Infection Notify: Tells whether your target was infected or not (not sure about this)

[x] Icon Changer: Changes icon of desired file

[x] Auto Updater: builder/server.exe updates itself automatically.

[x] Web Panel: a web-based interface provided by the company that allows customers to access victims logs and similar stuff.

If there is some problem with the description, help me fix it. thanks

Where can I upload my Keylogger server to infect victims?

I personally use ge.tt, many other people use DirectXEX. It is a good practice to upload your server as a .rar or .zip so it does not get removed by the site (in case it gets detected).

Can I get in legal sort of trouble by keylogging?

You might but it depends on where you are living and what kind of cybercrime laws your country has. Most undeveloped countries and many developing countries have very less awareness about such tools (believe it or not)

But think twice before you try to infect someone, never infect a school system or some government official. Use VPN and make sure your ftp/email credentials are encrypted in the server.exe (ask the author or use HXD to find out).

I do not mean to insult anyone by this, always search your problem before making a thread about it. If you want any other question answered just PM me here or add me hf_homi@yahoo.com

Please leave a feedback, it encourages me to keep this thread updated :)

Best Regards

dFault - April 3, 2013, 3:06 pm

HQ thread. Some very useful tips here to resolve people's issues... keep up the good work!?

stdio - April 3, 2013, 3:13 pm

So thanks man for the info

you are welcome, its good that you do this unlike many other new comers :)

Have a good time on HF

Regards

bkharihar@gmail.com - April 4, 2013, 8:07 am

how to make our keylogger auto update... ?

may we have to change email id - pass then .. we cant send again to enemy... what we can do ? plz find solution..

F-Nuke - April 4, 2013, 8:13 am

Nice tips. Very helpful for noobs/beginners.

hills28 - April 5, 2013, 11:08 am

Thanks for the tips :)

very helpful for beginners

1CE™ - April 5, 2013, 11:10 am

nice thread..probably you should add the whaling method..you know the method people use to see the hacker's email and password in a keylogger .exe.

stdio - April 5, 2013, 11:53 am

(Apr 5, 2013 11:10 AM)FROST™ Wrote: [\[CITE\]](#) nice thread..probably you should add the whaling method..you know the method people use to see the hacker's email and password in a keylogger .exe.

very nice suggestion, thanks.

i will add it whenever i find time :)

(Apr 4, 2013 08:07 AM)bkharihar@gmail.com Wrote: [\[CITE\]](#) how to make our keylogger auto update... ?

may we have to change email id - pass then .. we cant send again to enemy... what we can do ? plz find solution..

If you are talking about coding it that way, then its possible to update.

Just make it download the new keylogger with new email save it to computer, add to startup and delete the old keylogger from startup.

When new keylogger runs, it should delete the older one :)

This is only possible if you are coding it yourself.

If not then i am afraid its not possible to do unless you have control over your victim's PC.

?Schock - April 5, 2013, 12:19 pm

nice thread will help alot of people will give you a pos rep for that :D

stdio - April 6, 2013, 7:58 am

yeah i myself was surprised that no such tutorial existed on HF before.

I am glad to be of help.

stdio - April 12, 2013, 10:45 am

Updated, added a few more questions :)

Regards

wirazot - April 13, 2013, 12:53 am

This clears so much things up! One more thing though. Which FTP do you recommend for a newbie?

rwkwilliams - April 13, 2013, 3:40 am

Cheers, this is a great thread for people that are noobs

stdio - April 13, 2013, 8:07 am

(Apr 13, 2013 12:53 AM)wirazot Wrote: [\[CITE\]](#) This clears so much things up! One more thing though. Which FTP do you recommend for a newbie?

I like drivehq and recommend others to use it aswell, filegenie is also good.

Always use free ftp accounts :) the paid ones are observed and any suspicious activity leads to a permanent ban.

Ombra - April 14, 2013, 1:12 am

Nice tut for beginners, 4 stars :) i think that newbies 'll find this useful.

Mike420 - April 14, 2013, 2:41 am

Niice post , good tips here . geep it up.

Keep up the good work!

ChipHatch97 - April 14, 2013, 5:45 pm

Say I want to put a keylogger on my parents computer but its locked can i send them an email with the keylogger so wehn they check their mail i recieve an email the next time they log on?

Kingy ? - April 14, 2013, 5:46 pm

Really nice tut, Has good information, GLWS!

emmick4 - April 14, 2013, 8:19 pm

Nice post. Answers some questions I was having!

stdio - April 14, 2013, 10:39 pm

(Apr 14, 2013 05:45 PM)ChipHatch97 Wrote: [\[CITE\]](#) Say I want to put a keylogger on my parents computer but its locked can i send them an email with the keylogger so wehn they check their mail i recieve an email the next time they log on?
you mean you cannot physically access that computer?
If you email someone your keylogger, they must open (execute) it to get infected. This is the only way you can receive their logs :)

Mortick - April 15, 2013, 9:21 am

Thanks for this, I'm new.

And I got here because a friend suggestesd this site when I asked for a keylogger that works.

I'll sure as hell look at this when I get one!

stdio - April 16, 2013, 8:06 am

Almaironn - April 16, 2013, 10:19 am

Hello, this thread is very useful (I am new to HF). I have some more questions though. In all threads

with keyloggers, free or paid, I see feature lists in which I do not understand a lot of features.

Example (from Syslogger):

Quote:Features

- [x] Antis
- [x] Mail Encryption
- [x] Stealers
- [x] Cookie Deletion
- [x] Download Link Encryption
- [x] AV Site Blocker
- [x] USB Spread
- [x] Startup
- [x] Taskmanager Killer
- [x] Clipboard Logger
- [x] Steam Forcer
- [x] Downloader
- [x] Fake Error
- [x] Melt
- [x] Screen Logger
- [x] Mutex
- [x] Infection Notify
- [x] Native Stub
- [x] Icon Changer
- [x] Auto Updater

stdio - April 16, 2013, 10:23 am

(Apr 16, 2013 10:19 AM)Almaironn Wrote: [\[CITE\]](#) Hello, this thread is very useful (I am new to HF). I have some more questions though. In all threads with keyloggers, free or paid, I see feature lists in which I do not understand a lot of features. Example (from Syslogger):

thanks for asking this important question, i will describe all of these features when i find time :)

(Apr 17, 2013 09:18 AM)MickoEdits Wrote: [\[CITE\]](#) when i run the builder it says trojen.gen has been blocked so the logger i have is a trojen?

Might be because the server.exe is not FUD, therefore the AV is calling your builder a trojan generator.

Your keylogger might also be backdoored, always use such softwares from trusted sources :)

(Apr 17, 2013 09:29 AM)iamrevzz Wrote: [\[CITE\]](#) Thanks alot im new here so this really helped also dose keyloggers let you get youtube accounts?

thank you, very helpful. My question, i want to write by myself, what books should I read? what guide can I follow?

stdio - November 13, 2013, 10:55 am

(Nov 13, 2013 10:37 AM)vmaster Wrote: [\[CITE\]](#) thank you, very helpful. My question, i want to write by myself, what books should I read? what guide can I follow?
Well first you need to decide which language you want to code in?
you can start with Visual Basic which is simpler or you can go with C language that is much powerful but a bit difficult for starters..!
Good luck :)

DeskGotBars - November 13, 2013, 1:14 pm

Aha Helped alot tnx. Maybe more of these "For newbies"?

vmaster - November 14, 2013, 1:54 am

Im using c#, is it okay? what books should I read for guidation?

stdio - November 14, 2013, 6:48 am

(Nov 14, 2013 02:54 AM)vmaster Wrote: [\[CITE\]](#) Im using c#, is it okay? what books should I read for guidance?

I do not have any knowledge of C#, so i cannot help you with it.

C# is good language :) although it has dependencies unlike C

Just goto section of C# programming on HF and ask for good books, or google should do the job.

podjescott - November 23, 2013, 6:43 am

This is one of the best keylogger here the coder is very friendly and helpful best logger love it thanks bro

ed_finito - November 23, 2013, 12:10 pm

Hi there!is h-keylogger still FUD and will it remain so on remote installation through email? Most keyloggers installed remotely seem to be detectable by AVAST or AVG. Kindly let me know if these 2 antivirus will be a challenge for the current module of your keylogger. Thanks

Profit Margin - November 30, 2013, 10:14 am

Posting here to tell you that you can use parts of my guide for this. ?

stdio - November 30, 2013, 10:18 am

(Nov 30, 2013 11:14 AM)Profit Margin Wrote: [\[CITE\]](#) Posting here to tell you that you can use parts of my guide for this. ?

Thank you so much brother :)

Have a nice day..

.vemla - November 30, 2013, 10:20 am

Thank you for sharing this, mate.

Cheers! ?

XoTEx - November 30, 2013, 10:27 am

Thanks alot mate, I really didn't knew much about the subject before now :)

raybeez - December 1, 2013, 11:09 pm

good explanation on key logging features

robertrobichet - December 2, 2013, 5:12 am

Very clearly written and answers many questions. Thanks.

Nerk - December 2, 2013, 5:53 am

This is pretty much all the info a begginer needs to start out with. Good job!

ed_finito - December 2, 2013, 7:15 am

Thanks!totally vouch for homi....keylogger looks pretty good!!

Duhduhman1 - December 3, 2013, 12:01 pm

Thanks knew what Most of this stuff was but not all. Thanks though. Do you have any recommendations on any free keyloggers that are stable ?

BungieDefenderS - December 30, 2013, 2:48 pm

Nice thread now I know more we'll people learn new things everyday!

BloodGames - December 30, 2013, 6:03 pm

Is there anyway someone could add me and maybe help me get started with a simple keylogger and

maybe a RAT? Just read up on some basics and I've wanted to try to dab into this for the longest time. Thanks in advance for anyone wanting to help.

stdio - December 31, 2013, 1:06 am

yeah sure

just PMed you regarding this :)

xDizaster - December 31, 2013, 6:30 am

Is syslogger good?? Im looking for a free logger, if you can suggest one that i can use. Thanks!!

Frozoan - December 31, 2013, 9:07 pm

Thanks for the definitions, this helps when you want to know exactly what your keylogger is doing... :)

stdio - December 31, 2013, 9:50 pm

(Dec 31, 2013 07:30 AM)xDizaster Wrote: [\[CITE\]](#) Is syslogger good?? Im looking for a free logger, if you can suggest one that i can use. Thanks!!

yeah it is alright!

It won't be FUD though!

If you need a FUD keylogger you will have to spend some bucks!11

Lango - January 1, 2014, 4:48 pm

Very useful thread, cleared up a few queries i had.

thanks

?

wesley1296 - January 5, 2014, 1:35 pm

Thanks for helpful tips, as a newbie in keylogging and hacking i thankyou so much!

557badboy - January 5, 2014, 2:59 pm

Very nice, well-sorted and organised thread.

Cryp71c - January 5, 2014, 7:24 pm

Do you know of any good screen capturing keyloggers that can be used on a windows mobile phone running windows phone 8 OS?

stdio - January 6, 2014, 12:51 am

(Jan 5, 2014 08:24 PM)Cryp71c Wrote: [\[CITE\]](#) Do you know of any good screen capturing keyloggers that can be used on a windows mobile phone running windows phone 8 OS?

Well i have not heard of any, and never seen a mobile keylogger on hf.

May be a google search could get you somewhere..

Good luck

harkerblood - January 6, 2014, 11:17 pm

This will be one of the most newbie q's you probably have ever heard. but will barracuda web filter effect most key loggers?

CryptingNet - January 8, 2014, 3:26 pm

Thank you! this showed me what do i need to look when i buy a keylogger :)

Final Boss - January 8, 2014, 5:44 pm

Thanks! Very helpful info, can you keylog someone through a pdf file ?

stdio - January 8, 2014, 9:57 pm

(Jan 8, 2014 06:44 PM)Final Boss Wrote: [\[CITE\]](#) Thanks! Very helpful info, can you keylog someone through a pdf file ?

yes there is this exploit for the older pdfs that run exe in background when a pdf is opened but it works for old version adobe only (search hf for pdf exploit)
:)

Bouwwakker2 - January 9, 2014, 10:40 pm

But how do I sent it to other people? For exemple to hack their facebook accounts.

Sorry if this is a stupid question.

Thanks ik advance!

P.s: sorry for my bad english

stdio - January 11, 2014, 9:30 am

(Jan 9, 2014 11:40 PM)Bouwwakker2 Wrote: [\[CITE\]](#) But how do I sent it to other people? For exemple to hack their facebook accounts.

Thanks ik advance!

P.s: sorry for my bad english

just upload that pdf or your server exe to ge.tt or other such site and share the links on facebook/twitter etc

Hope for the best :)

Delta9Thc - January 24, 2014, 5:26 am

This is useful information for me. Thanks for the share brosef!

Unidan - January 24, 2014, 3:21 pm

Thanks, this is very well written and cleared my confusion!

CryptingNet - January 24, 2014, 4:04 pm

Very nice thats for taking your time in sharing this :)

ambika146 - January 24, 2014, 11:46 pm

its really helpful to me, try to keep it up bro...awesome information you have provided

Dead_Assassin - January 25, 2014, 5:58 am

Thanks for the very useful information. This will certainly be of help to me. ?

edhem - January 27, 2014, 5:45 am

great explanation tn timer for this do you think that is better to code your own keylogger the chances are bigger to be FUD :D

hessure - January 27, 2014, 1:37 pm

Thank you good tips for newbies, answered to my questions

Hackin - January 27, 2014, 1:51 pm

Haha nice to see a thread so old is still being used 24/7, awesome mate!

Archonei - February 6, 2014, 8:14 pm

Thank you for this topic:) It's extremely helpful.

Which of the paid keyloggers would you recommend? There are tons of them out there...

I'm looking for something that is

-FUD, of course,

-can control several accounts,

-can steal cookies and/or delete them,

-has encryption option.

Too bad that most of them offer short trial period :/

Strikershocks - February 12, 2014, 6:39 am

Great Keylogger Tutorial, thanks for sharing it.

This thread is old but still good ;)

Ernebro - February 12, 2014, 1:25 pm

Thanks you for these nice tips !

No i understand more of hacking :-D

dias_terence - February 12, 2014, 6:22 pm

hey great Thread

would you name any good FUD keyloggers for 6months

xzedxzed - February 13, 2014, 1:20 am

Thank you very much for this great tutorial !!

tharejamohit - February 13, 2014, 8:00 am

thnx mate for the tutorial !!!

keep it up men

EagleScream - February 13, 2014, 8:14 am

Really useful info, It helped me :=)

stdio - February 15, 2014, 5:33 am

Thank you everyone for the praises :)

Glad to be of help, will update this soon :)

Regards

joshml - February 15, 2014, 10:03 am

Very helpful, thanks for the thread, I know a bit about keyloggers but you told me more! LOL

Flummox - February 15, 2014, 12:58 pm

Thanks a ton this helped me and probably many others out a bunch!! Good work.

Tangible1 - February 18, 2014, 3:05 pm

Thanks so much for the tutorial. A lot of useful info for a newbie!

Do you know of a way to install a keylogger on someone's computer if they keep it passcode protected? I am trying to retrieve a couple passwords but never have access to physically install a keylogger.

poizin - February 19, 2014, 8:12 am

Nice thread.. I used to mess around with keyloggers like 10 years ago. Things have become much more advanced ;D

stdio - February 19, 2014, 10:05 am

(Feb 18, 2014 04:05 PM)Tangible1 Wrote: [\[CITE\]](#) Thanks so much for the tutorial. A lot of useful info for a newbie!

Well you don't need to physically access his PC, just send him your server and infect him :)

There are many ways of tricking others to download and run your server PM me and i might be able to help you

Regards

almostpro - February 19, 2014, 11:28 am

so how do u get the key-logger on somones computer?

bobqwerty - February 20, 2014, 11:56 pm

Great post. Very good starting ground for beginners.

inf4mouz - February 21, 2014, 11:36 am

Nice thread it gave alot of details cheer mate

SIM-1550131 - February 21, 2014, 11:39 am

Looks pretty good! I would suggest changing the red color to something lighter and easier to read. Maybe blue for the questions and green for the writing. The red just hurts my eyes personally.

erickjr_88 - February 21, 2014, 4:20 pm

Excellent Thread! Solved some of my newb questions..

ilobasilio - February 22, 2014, 9:05 am

this contains everything..

i'll try it and just post if i have other questions to ask

kalick77 - May 1, 2014, 11:53 pm

sweet . very nice understanding of how the loggers works.

jayvee - May 4, 2014, 2:11 am

Thanks for this helpful tutorial. Im a noob and this helps me a lot

DaCreeperReaper - May 4, 2014, 7:12 am

Very nice job, should help a lot of noobs (including myself). XD

Cammy - May 4, 2014, 3:03 pm

Wow, this is helpful! Would give you rep if I could ?

etchasako - May 4, 2014, 10:45 pm

useful information

Thanks you for sharing

-Carl0 - May 5, 2014, 8:24 am

Thank you man! This was really helpful!

I love the way you are explaining the things, they are so easy to understand :)

ChaosTheory50 - May 6, 2014, 2:23 pm

Very nice explanation and easy to understand, thanks! :D

Homunculus - May 8, 2014, 4:15 am

the issues with keyloggers is that the server are usually large in size

ns193 - May 8, 2014, 8:42 am

HQ thread, answers many common questions!!! Keep up the good work!

Gfortiuser - May 8, 2014, 1:02 pm

thank you for the tut I try it with some keyloggers

gabbe12 - May 9, 2014, 12:20 pm

This was very helpful! Can somebody do a tutorial like this with a rat?

HackingGuy123 - May 10, 2014, 1:36 am

Good guide, very helpful for newbies.

nysoc - May 10, 2014, 3:00 am

HQ post; lots of information for newbies just like me! Might be buying either a keylogger or a RAT soon.

red0verf10w - June 10, 2014, 12:54 pm

Really nice post ? , good for any noob to the security world. Does anyone know any good (preferably free) keylogger programs for Mac? Any help would be appreciated ?

TheMind - June 10, 2014, 1:11 pm

This is very interesting and useful.. Thank you for the time and effort.

Talon - June 10, 2014, 1:16 pm

Why does no one read when the original post was made? STOP GRAVE DIGGING PEOPLE

kiroFriend - June 11, 2014, 9:55 am

hmm Homi thank you for about your Keylogger

batfire - June 11, 2014, 11:10 am

Thank you, very helpful for us beginners. I always use Ardamax lol

Heisnberg - July 6, 2014, 1:46 am

please help project neptune will not launch on my system and i have downloaded version 1.78 and version 2.0 i have a fresh install of win7 on VM....

adambaidya6 - July 7, 2014, 12:24 am

this was very helpful for a noob like me thanks a lot...

.Origin - July 7, 2014, 10:23 am

Can you recommend me a fud keylogger

Can you recommend me a fud keylogger

vendettalogzz - July 7, 2014, 11:46 pm

nice well detailed explanations....certainly great for noobs.

Poppy - July 7, 2014, 11:55 pm

Awesome HQ tut for beginners,
Good job!

fruitman - July 8, 2014, 11:58 am

Just wanted to say, very nice informative thread!

Orcaly - January 2, 2015, 2:11 pm

Great post. Very good starting ground for beginners.

RancorsRectum - January 7, 2015, 8:23 am

Fantastic post, I found it to answer all questions I had regarding keyloggers. Thank you for taking the time to do this.

Ioko978 - January 7, 2015, 6:42 pm

Hey bro nice tutorial it really helped me out understanding what i needed to know.

Blind-eyes-187 - January 10, 2015, 5:11 pm

Awesome for me - Newbie. Thx.

FUD (Incognito) email / urls. Can history be found?

Dastaan Azazeel - July 8, 2015, 4:58 am

it is really helpfull bro ...

achambo - July 27, 2015, 11:05 am

This is a beautiful thread. Very informative and very easy to follow. Linking to other threads is a very nice touch as well. Thank you.

Aurora - July 27, 2015, 3:04 pm

Though a very old thread, it's good for beginners.

stdio - July 28, 2015, 1:41 pm

(Jul 27, 2015 03:04 PM).Sinister Wrote: [\[CITE\]](#) Though a very old thread, it's good for beginners.

Thank you, going to update it and put on more FAQs. Hopefully more people can benefit.

Swookie - July 28, 2015, 5:30 pm

Thanks for this. Helped me out a lot.

smohdsalimansari - December 28, 2016, 9:33 pm

Thanks for this tutorial..

can you please share some Best FUD keylogger paid...

And from where I can buy it..

Thanks..

Shammy - December 28, 2016, 11:11 pm

Thanks for this i knew nothing about this and this thread helped alot

Killer5566 - January 4, 2017, 10:07 am

Thanks For the great information , i want to buy Fud keylogger can u suggest me some site or seller please

HackYouBitch16 - January 4, 2017, 11:35 am

Great post, thank you for taking time to put this across, Any suggestions on paid FUD keylogger in

market ?

X_Ang3l_Matr1x_X - January 6, 2017, 4:15 pm

I found this thread to be extremely helpful. I appreciate the hard work and time spent into making this. I had one question that i cant seem to find out by searching.

If you send a key logger to a victim who is a mobile user does the key logger have to specific to mobile users? Or does a keylogger work multi-platform?

If any one could answer this for me I would appreciate it.

-Thanks in advance!
