??? ULTIMATE FACEBOOK SPREADING SCRIPT ??? Demonstration Video ? Silent Spreading ?
This video demonstrate how this spreading works from one page.
And this script done awesome as it in 2 days it spreads the link to 2500+ users on facebook. And after adding JDB on it, it got me 270+ slaves in 4 hours.

? SPREAD TO SPREAD FORMULA ?

Assuming that an average single user have 300 friends.
1st User visited page and the link posted to his fb profile and got notified by all his friends(300 Assumed), if 50 of them will again visited the url and posted to them 50 friends and further spread to spread over a large amount of users on fb.

1->50->2500->125000

HOW IT WORKS?

Yes this method is similar to the old one manual and bit time consuming but you get to the same point.

You open few fake accounts, infect others, get into their account and do the same thing over and

over and over again ;)
