About the program, it's more a Combo checker, it doesn't crack has you are loading pre-made or cracked user/pass list, then it will try to connect to them, I don't know if it handle proxy/socks.

Anyway thanks for giving the link quickly.

avanda1121 - April 8, 2013, 12:37 am

S?!?m?nder thanx for file analyze, file is clean. I am not coder of this, anyway tnx. Anybody interesting for cracker?

For Live Accounts:

Due to IP restrictions, you can only use one socket at time. Not all hosts are like this so just experiment to see which ones let you perform multiple simultaneous connections, and which ones do not.

Parsing Emails:

Parsing large numbers of emails is possible, but due to the obvious size of some accounts it can be a very long process.

On some servers, only non-read emails can be parsed.
