Thread: [\[Up For 2 Years\] Chronic Crypter | Bypass KIS/Sonar | Scanner \[Autobuy\]](#)

Support. - April 7, 2013, 12:11 pm

DO >"NOT"< PM BANKSY. I repeat, do not PM Banksy.

All questions, queries, problems, suggestions, detections or anything & everything else should go through me.

Download: <http://www.mediafire.com/?6mjce9vx3q57kbh>

Some of you might be wandering about the new thread by me & not Banksy.

As you probably know Chronic is a highly respected piece of software by a highly respected coder leading to a lot of customer interaction needed. Banksy has asked me to be support only so he can spend more of his time working on updates when needed & not answering the 200+ PM's a day he receives.

FAQ: I don't code updates, I cannot hire more staff, I do not own Chronic, I will not give you a discount, I will not add days to your license, I cannot watch videos 90% of the time.

Old thread stats;

BlueRey - April 7, 2013, 12:15 pm

look great crypter. and very cheap also. good luck with the sales.

Support. - April 7, 2013, 12:16 pm

Update released - More detailed error message

Added a more detailed error message when crypting and getting an error.

Hopefully this will help me fix any errors that people are running into.

PM me your error & if Banksy doesn't already know, I will tell him.

Please provide as much information as possible.

ahmedzero - April 7, 2013, 12:20 pm

hi, lets try here :)

I`m having problems with Avast on runtime...

Scantime is ok.

Il`m using DC , and tried a lot combinations in crypt (unencrypted server conect instantly with Avast paused)

Any idea, or need more info from me?

or TV?

TY

Support. - April 7, 2013, 12:23 pm

or TV?

TY

Sorry but I must ask,

ahmedzero - April 7, 2013, 12:26 pm

Yes :)

I tried that, tried i think every combination i could remember, tried different assembly / clone settings, tried with and without Startup/installation.... but nothing...

i see server in task manager for 10 seconds approximately, and nothing...

Coo - April 7, 2013, 12:27 pm

It's a great crypter, I seem to be the only one with the crypting error right now though.

I know Banksy is trying his best and I appreciate that! :)

Support. - April 7, 2013, 12:37 pm

Ok, it's one the top priorities at the minute & I believe Banksy has an idea how to sort it. Sorry for your wait but I assure you it is being looked into.

ahmedzero - April 7, 2013, 12:39 pm

Thank You

i'm here :)

too shoortt

httpsex - April 7, 2013, 1:17 pm

Hi sorry about not being specific in last thread, i this

<https://imgur.com/zGo2RBS>

I'm running in vmware, would that make a difference?

Support. - April 7, 2013, 1:28 pm

(Apr 7, 2013 01:17 PM)Nigel Thornberry Wrote: [\[CITE\]](#) Hi sorry about not being specific in last thread, i this

<https://imgur.com/zGo2RBS>

Are you sure you have configured your VM to have working networking? For instance, I have to run everything on my VM's through a proxy,

httpsex - April 7, 2013, 1:33 pm

I'm going through a vpn too and everything else i've tried works perfectly except this. I'm actually going through one vpn on my mac side then another vpn on my windows side. However even without the vpns it doesn't work but it is a school network

Joe67 - April 7, 2013, 1:39 pm

Problem with avast , avast run the program sandboxed and detect the runtime .i have check avast in the crypter . But all other av was ok ;)

Banks? - April 7, 2013, 1:42 pm

(Apr 7, 2013 01:33 PM)Nigel Thornberry Wrote: [\[CITE\]](#) I'm going through a vpn too and everything else i've tried works perfectly except this. I'm actually going through one vpn on my mac side then another vpn on my windows side. However even without the vpns it doesn't work but it is a school network

Try now, I think it might have been a DNS issue, so now the crypter just connects directly to the server.

ahmedzero - April 7, 2013, 1:47 pm

(Apr 7, 2013 01:39 PM)Joe67 Wrote: [\[CITE\]](#) Problem with avast , avast run the program sandboxed and detect the runtime .i have check avast in the crypter . But all other av was ok ;)

Same for me :(

I tried all combinations, but still nothing...

Support. - April 7, 2013, 1:48 pm

What is the specific socket error (the code it gives you)?

?Mephobia - April 7, 2013, 8:11 pm

Huge Vouch for this crypter. Best out on the market, and with v9 coming out soon, it stay being the best for a long time.

Debroski - April 7, 2013, 8:14 pm

(Apr 7, 2013 08:11 PM)?Mephobia Wrote: [\[CITE\]](#) Huge Vouch for this crypter. Best out on the market, and with v9 coming out soon, it stay being the best for a long time.

v9 has been out for a day or two :P

?Mephobia - April 7, 2013, 8:24 pm

Oh, I saw Banksy adding features/fixing it a little. So I guess whatever he fixes next will be awesome.

Banks? - April 7, 2013, 8:38 pm

Update released.

- Changed the ListView for the binder to use a checkbox instead of true/false for Run Once and Inject.
- Fixed startup not adding correctly if there were spaces in the file name or key.

henry2428 - April 7, 2013, 9:20 pm

I PM'd you about the error I got. Hopefully it will be resolved soon. Thank you

Edit - 2 Hours later. Awaiting 2nd reply.

Edit 2 - 6 Hours later. I'm still getting the socket error. <https://imgur.com/Lzj5oDF> Awaiting reply. I know you're very busy and I appreciate what you're doing. I hope you get back to me :)

scorpionwally8 - April 7, 2013, 10:26 pm

hey banksy have you ever thought about adding a spreader to the crypter or would that be too hard and mess with the fudness

Support. - April 8, 2013, 5:23 am

Thanks mephy,

(Apr 7, 2013 09:20 PM)henry2428 Wrote: [\[CITE\]](#) I PM'd you about the error I got. Hopefully it will be resolved soon. Thank you

Google says \$20 is around about £13, shouldn't be too much more than that.

NUFC - April 8, 2013, 8:25 am

Thanks for the reply mate :) off to change my LR to paypal lol :)

EducationalPurposes - April 8, 2013, 9:05 am

I just bought this and popped in a dc 5.3. gave me this. Anyone else receive the same?

still have socket error -1 after trying many different things

Support. - April 8, 2013, 9:21 am

(Apr 8, 2013 09:05 AM)EducationalPurposes Wrote: [\[CITE\]](#) I just bought this and popped in a dc 5.3. gave me this. Anyone else receive the same?

I'd appreciate it if you didn't send me 2 PM's that I replied to & post on the thread after,

As I've said, yes, that error has been reported & it is currently being worked on right now. Thank you for your patience,

@Nigel, love your name but please be patient, I assure you it is being worked on. :)

Pr4wn - April 8, 2013, 9:45 am

lololol. Looking good guys. Glad to see some help on the thread. It's a lot of work to maintain a crypter. Hell it's a lot of work to maintain any decent project. I couldn't imagine how hard it is to work on a crypter and answer tons of PMs/posts so glad for this new approach. Love the product and both these members are great people. GLWS.

Fraudster - April 8, 2013, 9:56 am

Just bought the crypter, will try it later when get back to main PC. Hope all gets fixed soon.

Thanks

Mycro - April 8, 2013, 12:58 pm

I am now getting Socket Error 0 as shown in my screenshot, please try and fix this very soon:

<https://puu.sh/2wqRm>

EducationalPurposes - April 8, 2013, 12:59 pm

Sorry to add fuel to the fire but avg just got it :(appreciate the work guys

jared05 - April 8, 2013, 1:47 pm

For sure Banksy will update it in no time, please be patient :)

Fraudster - April 8, 2013, 2:48 pm

Just got home and this is the best I can get from it. Sure guys will fix it soon. Would it be possible to request functions for the crypter?

Thanks

You can always just post here a function you think would be good. I don't know about this guy, but Banksy always read his old thread and included some of the features people commented about that he liked.

EducationalPurposes - April 8, 2013, 6:03 pm

Suggestions

Easy:

-icon cloner

-anti sandbox

- file pumper
- Harder:
- spreaders
- custom encryption method
- Multiple stubs
- polymorphic stub (i wish)

seawolve1 - April 8, 2013, 6:11 pm

Hey Tony,

Update

Was getting the following message when I try to crypt....
"A connection error has occurred, try again later.
Socket error code: 10054"

Now it has changed to "Socket error code: 0"

I know you guys are working hard to correct this, just wanted to keep you updated.

Thanks for all the hard work.

Support. - April 8, 2013, 6:28 pm

Are you still getting that error? Trying to see if the last update fixed it.

(Apr 8, 2013 06:03 PM)EducationalPurposes Wrote: [\[CITE\]](#) Suggestions

Easy:

- icon cloner
- anti sandbox
- file pumper

Harder:

- spreaders
- custom encryption method
- Multiple stubs
- polymorphic stub (i wish)

Icon cloner - As in getting icons from executables/dlls?

Anti sandbox - I honestly don't see the point in any type of anti.

File pumper - Possibly.

Spreaders - I feel like that is the bots job, not the crypters.

Custom encryption method - Possibly.

Multiple stubs - Actually this is a possibility with the server architecture in place with V9.

Polymorphic stub - I could emulate polymorphism to an extent, but I don't think it would be very productive as the stub is pretty barebones as it is. It only consists of what it needs and nothing more; there's really nothing that could change dynamically.

(Apr 8, 2013 02:48 PM)Fraudster Wrote: [\[CITE\]](#) Just got home and this is the best I can get from it. Sure guys will fix it soon. Would it be possible to request functions for the crypter?

**** JIT Debugging ****

To enable just-in-time (JIT) debugging, the .config file for this

application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>
  <system.windows.forms jitDebugging="true" />
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

Best regards, hope this get fixed.

PS: Kommon, Hope you enjoy been a part of Chronic. It's VERY HQ. :)

They still use netseal. And yes, it's the best crypter out there in my opinionen. Big vouch!

httpsex - April 10, 2013, 10:43 am

I deleted chronic v7 file and started from scratch to get rid of socket error

I bought this two days ago and have tried it on various computers with various network setups and haven't gotten it to work. I really need this please step it up

Banks? - April 10, 2013, 12:15 pm

Due to complications with the server and failed promises by a friend, I've been forced to move the server.

I'm extremely sorry for this, but everything should be in working order now and I don't see this happening again.

Support. - April 10, 2013, 12:17 pm

Well people! The time has come! New server is up & running & it has been confirmed that Chronic is working perfectly again!

If you still get "Socket error 0", please download it again from:

<http://www.mediafire.com/?6mjce9vx3q57kbh>

Again, sorry about the slight wait but thank you all for your patience, have fun!

Minor hicup, fix one problem, get 10 more, lol.

It's because your trying to crypt the file without a file binded, an update is being prepared right now & shall be up soon.

It will still work if you add a file to bind but uncheck the options. Cheers,

GanDino - April 10, 2013, 1:08 pm

yap, working now. as you said. thanks for quick reply.

Dseko - April 10, 2013, 1:08 pm

Hey Tony.

How's my password thing? Can you contact me about it again? :)
Also thanks for update! :)

TheDevilMan - April 10, 2013, 1:17 pm

huge vouch for banksy this is by far the best crypter ever there was a slight delay on updates at one point but he came back bigger and better :D

httpsex - April 10, 2013, 2:17 pm

Working perfectly now, thank you so much.

I can only imagine how hard it is to keep up a project like this so thank you for personally responding to concerns

P€rkan777 - April 10, 2013, 2:23 pm

WOW im surprised to see this crypter still up.The owner is great,and the crypter too :)

Scan4You.Net

I have an icon and custom assembly. ._.

Support. - April 10, 2013, 8:11 pm

Ok people, it seems it might have picked up a few detections, it's being looked into,

With no icon & blank assembly info I can still get 1/4* & the same with a HQ icon & scrambled assembly info so people having trouble will for now have to try a few different things. Obviously, don't call your exe "Server.exe".

I'll be back in about 12 hours, please, please, please, do >NOT< PM Banksy about this, he knows. It will be updated as soon as possible & shouldn't be too much work so it shouldn't be long.

:)

If I hit the continue button, I end up with socket error 0 again..

suggestions?

Thanks.
Same problem here.

Any solution?

itsmemario - April 11, 2013, 5:05 am

The owner told me their will be an update in the hours to come, If it is good i will be buying this crypter.

Dseko - April 11, 2013, 5:11 am

I PMed you Tony about my password thing.

You should now remember it.

Darkened - April 11, 2013, 6:02 am

Added you on skype,

Chronic Crypter is not connecting to main server at the moment.

Also an error pops up will send it through skype* since PM is limited to me.

TR.Gen - April 11, 2013, 6:35 am

Cant connect, please fix it bro ;)

thanks

Ace Hood - April 11, 2013, 9:35 am

Can't connect to the servers, please fix it or give me a refund.

eye_of_the_tiger - April 11, 2013, 9:49 am

I feel like there is a problem after another with this crypter. Seriously.

Support. - April 11, 2013, 10:48 am

The new server seems to be having problems, it's being fixed right now & shouldn't take long. Sorry & thank you for your patience.

EducationalPurposes - April 11, 2013, 11:52 am

This has been a problem crypter. Ill respect the price, but right now im not respecting the quality. I just lost a lot of bots due to nofud. :/

Support. - April 11, 2013, 1:11 pm

Please people, look into how servers work & you will understand completely. The crypter itself is fine but the one thing we can't control is the server and as always, everything that can go wrong, will go wrong. Attempts are being made right now to fix this & it shouldn't be long before Chronic will be back to it's usual HQ, fully working standard. :)

Banks? - April 11, 2013, 2:00 pm

My host decided to restart the server for whatever reason.
Sorry about that.

nill - April 11, 2013, 2:06 pm

Guys,
Please post back here when things look smooth again.
I got word that the server is back up and running :)

PianoWithoutKeys - April 11, 2013, 3:30 pm

http://scan4you.net/result.php?id=d722c_433fsd

Is there any good way to get rid of these detections? (new icon or assembly,etc..)

?roxy - April 11, 2013, 3:36 pm

Wish this worked like it did in the past. I know they're trying to get it working again, but I just watched my last bot disappear.

Please get this working again,

Proxy.

Support. - April 11, 2013, 3:38 pm

(Apr 11, 2013 03:30 PM)wackoe100 Wrote: [\[CITE\]](#) http://scan4you.net/result.php?id=d722c_433fsd

Is there any good way to get rid of these detections? (new icon or assembly,etc..)

HQ icons work well for me & try different assembly information as it seems some legit assembly informations are being tagged by AV's now too. Either way an update will be released when fully tested for bugs. :)

(Apr 11, 2013 03:36 PM)?roxy Wrote: [\[CITE\]](#) Wish this worked like it did in the past. I know they're trying to get it working again, but I just watched my last bot disappear.

Thank you for your understanding and patience, much appreciated!!

I can say there is an update nearly ready & it's being thoroughly checked before release. :)

EducationalPurposes - April 11, 2013, 6:17 pm

still wont connect. lost 92% of my bots :/

Tito97 - April 11, 2013, 6:32 pm

I have this error when i open chronic :/

PianoWithoutKeys - April 11, 2013, 6:58 pm

I still can't connect to the server. Any issues or just me?

scorpionwally8 - April 11, 2013, 7:52 pm

servers take time to fix, we just have to wait and im sure banksy and mr stark will get it in working order

nill - April 11, 2013, 8:00 pm

Has anyone with this crypter tried to use it with loggers like ProjectNeptune, Unknown, Ardamax?

BottomNotch - April 11, 2013, 8:12 pm

6/35 :O And I can't recrypt different settings because of socket error... Please hurry bansky!

?Mephobia - April 11, 2013, 8:47 pm

(Apr 11, 2013 06:32 PM)Tito97 Wrote: [\[CITE\]](#) I have this error when i open chronic :/

It means .Net Seal encountered a problem. Open the loader.log file in notepad. Then paste what it says in a PM to Kommon. Usually it means something is blocking .net seal from contacting its servers. Make sure you run Chronic Crypter as an Administrator. Banksy is also working hard to fix

the server problems some of you speak of. It should be fixed soon. It may even be fixed now.

back5 - April 11, 2013, 9:18 pm

when I try crypting it the crypter says Error Not connected to server. do you know what that means and how to fix it?

scorpionwally8 - April 11, 2013, 9:19 pm

Im not sure if this helps you guys out or not but this is the error i am getting when trying to connect with the crypter

[\[img\]http://s22.postimg.org/bm4hqoast/error.jpg\[/img\]](http://s22.postimg.org/bm4hqoast/error.jpg)

after i click continue is just doesnt connect im guessing the server is still giving you problems

SIM-1224560 - April 11, 2013, 9:31 pm

The server goes down as soon as i buy lol.

Ah well, be patient about it folks, don't put pressure on him!

Swaglord - April 12, 2013, 2:15 am

Get an error when it tries to connect and then it just says Status: Connecting :c

Support. - April 12, 2013, 2:45 am

I know your probably getting sick of this downtime, imagine how I feel! :P I can't access the server but getting it back up won't take long at all as we know the problem. I'll be back in about 2 hours, signing my daughter up for nursery today, :D :D

seawolve1 - April 12, 2013, 8:04 am

Murphy's Law is in full effect. Everything that can go wrong, will go wrong.. This is an outstanding crypter and I have full confidence that they will get this fixed in a short time. Hang in there everyone, this is a bad ass crypter! . In the meantime, I'm going on a beer run.

henry2428 - April 12, 2013, 8:10 am

A couple days ago, when I could connect I tried crypting. When i clicked build it said "crypting failed" Any specific settings that had to be set?

Thanks for helping me. i tried re-crypting many times even re-downloading. I must be doing something wrong ? When creating my stub, I dont habe anything except for my no-ip and port. No startups or anything. In chronic, i browse for my stub turned on startup and tried to crypt with that.

(Apr 12, 2013 09:44 AM)k00tj3 Wrote: [\[CITE\]](#) Take your time, family stuff always first
Agree mate!

Banks? - April 12, 2013, 11:11 am

Server issues fixed. The host I'm using is really starting to get on my nerves.

My server was down, and their response to my support ticket was that my server has been up and running for 4 days when it clearly hasn't.

I'm sorry for the inconvenience people, but this isn't my fault, and I will try my best to see that this doesn't happen again.

trixr4skids - April 12, 2013, 11:24 am

Well thank you so much for the hard work in getting it back up, hate to ask but, will there be a new stub update anytime soon? Due to the down time the stub has gone to 7/35 detection :(

Fraudster - April 12, 2013, 11:56 am

Really need a crypt as crypter keeps dropping out. Any suggestions? Thanks ps change hosting :)

Dseko - April 12, 2013, 12:33 pm

Hey Tony.

I hope you do look this thread. I really need you to answer my PM wich I did send like few days ago.

It's really important.

Thanks.

Banks? - April 12, 2013, 12:34 pm

After about an hour of struggling to get the server back to 100% I believe I fixed all the problems that were happening.

I'm working on an actual update for the stub right now.

turmup - April 12, 2013, 12:49 pm

Imminent is a .NET RAT so those settings wouldn't change anything.

Bushwacka - April 12, 2013, 3:51 pm

(Apr 12, 2013 03:19 PM)Banks? Wrote: [\[CITE\]](#)

Imminent is a .NET RAT so those settings wouldn't change anything.

Well, the imminent thread is saying this:

"Since this RAT uses .Net 2.0, in most crypters including Chronic, you need to check the "self-injection" option or check the ".Net Reflection" method. If the crypter does not have those options, it either autodetects if the exe is managed or unmanaged. Always test before spreading."

So what are the best settings for imminent monitor RAT?

Banks? - April 12, 2013, 4:54 pm

(Apr 12, 2013 03:51 PM)Bushwacka Wrote: [\[CITE\]](#) Well, the imminent thread is saying this:

So what are the best settings for imminent monitor RAT?

I've never tested it personally so I don't know the settings in Imminent, but with Chronic just check startup, and everything else is optional. Nothing in chronic should break compatibility except for the

experimental options.

Rally the Bulls - April 12, 2013, 5:27 pm

Love the product. Amazing deal I got on this and have great success with it. Best deal on HF right here.

henry2428 - April 13, 2013, 7:50 pm

(Apr 12, 2013 06:49 PM)henry2428 Wrote: [\[CITE\]](#) This is what I get:

[11:44:10 AM] Crypting started...

[11:44:10 AM] Sending info to server & waiting for response

[11:44:10 AM] Crypting failed

What am I doing wrong?

I am still getting this. I hope I get to use this soon.

::Illuminati:: - April 13, 2013, 8:25 pm

just bought crypter missing alot of icons and shit on it and looks nothing like in thread you really need to fix this :L

crypted success but its 3/35 not even fud

d0to - April 13, 2013, 8:28 pm

(Apr 13, 2013 08:25 PM)?Illuminati Wrote: [\[CITE\]](#) just bought crypter missing alot of icons and shit on it and looks nothing like in thread you really need to fix this :L

Yes, he changed the design. And? It doesn't matter. The tabs are still there.

::Illuminati:: - April 13, 2013, 8:31 pm

crypt corrupts file with blackshades also

hope you get onlien soon

ok fixed the issue crypter is working my antivirus corrupt the stupid crypter lol

Mycro - April 13, 2013, 8:51 pm

The stub is never FUD. C'mon Banksy get your shit together.

But I appreciate your efforts getting everything back and running.

Support. - April 14, 2013, 2:06 am

With the recent server problems, double effort is being put into making sure there are no bugs & preparing for the update after this one, release shouldn't be long & thank you for your patience,

scorpionwally8 - April 14, 2013, 2:13 am

thanks for the updated status on the crypter Kommon ,i dont mind how long you take because i know banksy will fix everything in the end

PianoWithoutKeys - April 14, 2013, 2:14 am

Banksy, I know you try your best and this crypter is great, but it in all honesty, this crypter has never been FUD for more than 3 days and it hasn't been FUD at all for 1 month+.

Mycro - April 14, 2013, 2:21 am

Yup me too :(

I've tried using DC Settings, Fresh Install with chronic.exe, crypting my stub with just the icon. 2 days not been working.

Support. - April 17, 2013, 2:54 am

The failed error is being looked into right now, being a bit difficult to re-create,

?roxy - April 17, 2013, 12:26 pm

Thanks for all your hard work guys.

Proxy.

Fraudster - April 17, 2013, 2:19 pm

Any chance of a stub update anytime soon? Thanks

\$pax - April 17, 2013, 2:24 pm

does this work?

im thinking of buying since i have been scammed by many crypters such as fileprotector and procrypter

undercover99 - April 17, 2013, 2:56 pm

1/35 at min for me...cant seem to get it clean for nod32 at the minute.. anyone pm me if they know how

?V?? - April 17, 2013, 3:17 pm

ESET NOD 32 Hates Chronic Crypter its always the First to find it. Great Product Bansky is the Best!

Tony Seems Cool Haven't Talked to him alot.

PianoWithoutKeys - April 17, 2013, 3:19 pm

(Apr 17, 2013 03:17 PM)Unit One Wrote: [\[CITE\]](#) ESET NOD 32 Hates Chronic Crypter its always the First to find it.

It's because idiots who use eset nod 32 and bought this crypter don't realize that eset automatically distributes the sample of the virus stub unless you turn it off

Mycro - April 17, 2013, 3:52 pm

(Apr 17, 2013 03:19 PM)wackoe100 Wrote: [\[CITE\]](#) It's because idiots who use eset nod 32 and bought this crypter don't realize that eset automatically distributes the sample of the virus stub unless you turn it off

People who bought the Crypter are the cause of it?

I don't think anyone here will waste money on AV's.

AV's are a scam in the first place.

Rally the Bulls - April 17, 2013, 4:38 pm

So, who would I talk to about 5-6 free days of service? I haven't been able to crypt a server in days. I see it was FUD for a few hours the other day, but I'd just like to not feel like my redeemed days are being wasted. :x

Good luck with fixing the error. :P

CryptoCurrency - April 17, 2013, 4:57 pm

I keep getting 10/35. Can you please update this?

Mycro - April 17, 2013, 5:26 pm

I have 1 slave left out of the 30 I had the other day. Nice fucking job guys.

Mesmaroth - April 17, 2013, 6:01 pm

Yeah the crypter has been detected now. Please update.

PianoWithoutKeys - April 17, 2013, 6:41 pm

The idiots who buy this get it detected way to fast.

Support. - April 18, 2013, 2:14 am

(Apr 17, 2013 03:52 PM)Mycro Wrote: [\[CITE\]](#) People who bought the Crypter are the cause of it? I don't think anyone here will waste money on AV's.

AV's are a scam in the first place.
You're obviously retarded.

(Apr 17, 2013 06:01 PM)Mesmaroth Wrote: [\[CITE\]](#) Yeah the crypter has been detected now. Please update.

Yes, a FUD update is ready to be released, users might experience some downtime in the next few hours as something special is being added. Should help keeping it FUD for longer, stay tuned! :P

Mycro - April 18, 2013, 3:50 am

(Apr 18, 2013 02:14 AM)Tony "Kommon" Stark. Wrote: [\[CITE\]](#) You're obviously reatarded. C'mon if you're going to call me a retard, at least spell it right.

John Constantine - April 18, 2013, 12:43 pm

When is the developer planning to update this crypter? It's literally useless now.

Fraudster - April 18, 2013, 1:59 pm

8/35 After stub update!! Needs another update please.

Thanks

?V?? - April 18, 2013, 2:07 pm

Fraudster, What settings are you using... Ill pm you with more questions

Tito97 - April 18, 2013, 2:10 pm

still 5/35 SMH

I can't use this crypter since 1 month!

Support. - April 18, 2013, 2:45 pm

The update is on it's way, would you rather a buggy FUD crypter or a brilliant FUD crypter?

Emomorfar - April 18, 2013, 2:53 pm

getting crypting failed 24/7 is it due to your update?

Transported - April 18, 2013, 5:25 pm

Please update this so its 0/35! I'm already getting 8/35.

henry2428 - April 19, 2013, 4:01 am

Getting this again, I'm pretty upset.); I'll give it a third week then I'm pulling out.

Emomorfar - April 19, 2013, 8:19 am

I cant even install this on my new computer..

Commander 11:11 - April 19, 2013, 8:23 am

Baanksyyy! My pal,my brother,my man!Take a look at this!

<http://razorscanner.com/result.php?id=22236>

Please solve this as quick as you can becose this...this is nooo good sir!!

Thank you in advance!

Why don't you use your own crypting service in the meantime ?

If that is legit you don't have to be in that needs, and you won't loose bots.

same il have to take action on paypal ...
and on here

Mycro - April 20, 2013, 6:33 pm

(Apr 20, 2013 05:33 PM)Unit One Wrote: [\[CITE\]](#) Honestly Guys its 20 Dollars Lifetime for a Crypter. Its a Good Deal as long as does not turn into a dropper like most Crypters were all good
Well you see, its a good deal ... IF IT WORKED.

(Apr 20, 2013 05:32 PM)iRtehLeet™ Wrote: [\[CITE\]](#) What did you expect? It's got a billion customers and been around forever. Give the guys a break, they are both great coders and I'm sure this will be FUD soon.

The more hate comments the more the coder doesn't want to support you.
Well if he had "a billion customers" I would think it would have a good reputation. And yes I can agree, Banksy is a great coder - but if he actually could just care a little more about this product and get it working after the 2 months, that might help us support him. Besides that, this new thread was for "Better Support" - I think we can all agree that this might be just as bad as the other thread.

I'm not usually an asshole, but when I am - the quality of the product doesn't even compare to the original product a few months back.

In the end, I gave my support from the beginning as a great crypter. It broke - shit happens so I decided to wait it out. I wasn't expecting a wait time of around 2 months. I would like a refund, I hope you can understand why.

To Banksy and Tony, I've been trying to show my support since the 3rd page of this thread saying "they will have it fixed soon" - it was fixed once and FUD for around 1 day. After the decline again, the response of "support" was usual:

(Apr 19, 2013 11:43 AM)Tony "Kommon" Stark. Wrote: [\[CITE\]](#) I understand your frustration people, after the server problems, extra time is being into stability & bug-checking. With the improvements being implemented as well as the new server being retarded things are taking longer than anyone wants but I assure you good things are coming in the future, :)

That doesn't help anything. Its the same response every time and nobody can trust it anymore.
Rant, finished.

Support. - April 21, 2013, 3:38 am

To all users, I know in the last 2 weeks we've had some problems & more downtime than anyone wants. To all the users showing understanding & compassion, thank you. It is greatly appreciated. To all the users who want there money back due to some downtime, read the TOS & realize what you actually bought. Chronic is not only the longest running & cheapest Crypters on HF, it is also one of the most advanced. New methods are constantly being coded to deal with the ever-changing AV's and even hired support to, honestly, help with the most unluckiest 3 weeks of Chronics life. And \$20 lifetime, rfkm?

To ?Illuminati, if you're gonna bash, at least give facts, not just bullshit.

To Mycro, you've done nothing but talk shit, even when Chronic was fine & FUD. Yet, in my last 5 pages of PM's, I don't have single one from you. Says something really, doesn't it.

Simply, hold on guys, I know we've had a good deal of shit since the server change but we have a big change ready and don't want to release it & find a bug, killing all your confidence in Chronic. As the saying goes, good things come to those who wait. Very good things, like, seriously, totes-amaze-balls things, :P

Snapchat™ - April 21, 2013, 3:49 am

Decent price for lifetime edition, seems like a great crypter when looking at the pictures. Goodluck with sales!

Chronic is not only the longest running & cheapest Crypters on HF, it is also one of the most advanced. New methods are constantly being coded to deal with the ever-changing AV's and even hired support to, honestly, help with the most unluckiest 3 weeks of Chronics life. And \$20 lifetime, rfkm?

To ?Illuminati, if you're gonna bash, at least give facts, not just bullshit.

To Mycro, you've done nothing but talk shit, even when Chronic was fine & FUD. Yet, in my last 5 pages of PM's, I don't have single one from you. Says something really, doesn't it.

Simply, hold on guys, I know we've had a good deal of shit since the server change but we have a big change ready and don't want to release it & find a bug, killing all your confidence in Chronic. As the saying goes, good things come to those who wait. Very good things, like, seriously, totes-amaze-balls things, :PGood write up mate, I really do hope it comes back up <3 I hope for my \$20 to go a long way. Also I thinky you should add the ToS in the thread.

Cheers and Goodluck.

Mycro - April 21, 2013, 6:28 am

When it was FUD? It was FUD once for 24 hours.

I started talking shit when you never responded to the thread.

I didn't message you because I figured everyone has the same god damn problem, so why bother - and wtf does that show?

I also supported YOUR customers fixing the cvtres.exe error when you didn't respond to the thread for two days which a few people had, so it showed that I actually gave a fuck and that was like only a week ago.

I'm not gonna keep rambling on about this shit, just gonna wait until its fixed.
Good Day. ?

Vector Dynamics - April 21, 2013, 8:36 am

T_T server is down and this is like never FUD had it for several months..
Im disappointed T_T

sintal1ty - April 21, 2013, 8:51 am

VOUCH I've owned this since the very first release date.
Just like any other crypter they are not always FUD.

I have owned this crypter since its release. Always quality and many long lasting FUD crypts I have gotten out of this crypter.

Yes, Even in the last 30 days with all the server problems he had, I still managed to get FUD Crypts with this.

Sometimes you just need to tweak the settings and more importantly Disable Anti-Delete as this feature is experimental and can cause a lot of detections at the moment. Use a HQ.ico and DONT use any product details at all. (This is how I have gotten the best results.)

Anyways, Banksy good work and keep up the updates for the old customers like me don't let the skids ruin something so great.

LONGEST LASTING CRYPTER FTW! <-- This is what you payed for. Deal with the update times... Its worth it.

seawolve1 - April 21, 2013, 9:27 am

Damn.... Just as I thought everything was good again....crypter is constantly "connecting" again..

EducationalPurposes - April 21, 2013, 10:55 am

It would be really nice for those who don't have a lifetime to have a couple extra weeks added to their license, to at least pay for the lost slaves. Good program, its just in its beta redevelopment stage from what i can tell.

IanCormac - April 21, 2013, 11:14 am

Just a quick one: How long does the issue seawolve1 mentioned above usually last, or does it depend on issues server side?

?V?? - April 21, 2013, 5:07 pm

The Longest it has ever lasted that I've seen was about a half a day. Like I said that's what I've said but guys remember its a 20\$ Lifetime Crypter. Bansky and Tony are good people and are probably working very hard to make the FUD last longer and fix the Server issues.

BottomNotch - April 21, 2013, 5:46 pm

(Apr 21, 2013 05:46 PM)BottomNotch Wrote: [\[CITE\]](#) Agree but holy sh** this is the longest it ever took for BANSKY to release a fud update... Or say anything...

He's probably burnt out a bit with the PMs and thread stuff. He's in the middle of a major update while trying to get servers working and make the crypter FUD. I wouldn't answer a single question either if I didn't have to lol. Sometimes you just gotta get on your batman shit.

VulcanReap - April 21, 2013, 6:12 pm

Is there any specific time the update will be out?

Support. - April 22, 2013, 3:17 am

Ok people, sorry bit late, I am spilling my guts from both ends at the minute & Jessica started nursery today!

So, here's how it is, plain and simple.

We are in the final testing stage of the new features & it's seeming pretty bug free.

Expect a release within the next 24 hours but don't burn me at the stake if not.

The server shutdown whenever WinUpdate is ran. (speechless)

T-Mobile phone tethering, when limited, now blocks access. Lol,

d0to - April 22, 2013, 3:52 am

(Apr 22, 2013 03:17 AM)Tony "Kommon" Stark. Wrote: [\[CITE\]](#) The server shutdown whenever WinUpdate is ran. (speechless)

What is the function of the server? To generate random stubs and serve them? I just don't see why you would need a Windows server for that ?

TJLBeatz - April 22, 2013, 6:22 am

Crypter is not connecting. Please fix.

No shit. This crypter has been running for almost 2 years now. With the amount of customers he has, it won't stay FUD for long. Also, the only feature which doesn't work is the scanner, everything else works. And for the record, it has been FUD for more than 24 hours. I don't get it; why don't you just buy a more expensive crypter and stop complaining instead of sitting here spamming your low quality posts on the sales thread? Yes, we're all disappointed with Banksy's slow response time, but this is a fucking \$20/lifetime .NET crypter on HackForums - your expectations are too high.

(Apr 22, 2013 07:04 AM)Tony "Kommon" Stark. Wrote: [\[CITE\]](#) In short, server sided variables.

I've replied to your PM.

NET Seal can do that, and you wouldn't need a Windows server for it either.

back5 - April 22, 2013, 11:48 pm

may I please ask someone what settings they use when making a stub on darkcomet and what settings they use when they crypt it. I am talking about every little detail :) if anyone can help me it would be much appreciated (Y)

Effexion - April 22, 2013, 11:52 pm

I would have definitely bought this if it was FUD.

Support. - April 23, 2013, 1:08 am

Great crypter :)

Sorry for double posting HF is lagging on my phone o.o

IchigoKurosaki - April 23, 2013, 4:42 am

never never never fud...NEVER ! ok its a low price but i pay for what ? for an UD crypter ? not fud :\

Owl City - April 23, 2013, 5:44 am

I love the GUI of this product; it's a lot better than the actual functions.

PedroDJ - April 23, 2013, 6:20 am

Any ETA for the next update ? :)

Thank you.

RedCliff - April 23, 2013, 6:41 am

Very bad crypter, and he dont give good support...

Winry Rockbell - April 23, 2013, 7:21 am

It's 10/37 now....

This needs a reFUD :)

? **DavidCz** ? - April 23, 2013, 8:23 am

Since I bought it, I never seen a FUD server .. :(

?**V??** - April 23, 2013, 8:41 am

Guys Come on lets stop bad mouthing this crypter for the price its a very good crypter and what do you expect for a 20 dollar lifetime crypter. Bansky and Tony are Working very hard on updates and if people keep complaing Bansky has the Right to say that's it I'm done as it says in the TOS. So Come on guys stop complaining.

VulcanReap - April 23, 2013, 11:16 am

The crypter was said to be updated in 24 hours right? that was alittle over 24 hours ago

Gh0sts - April 23, 2013, 2:53 pm

I tried one of those "FREE FUD CRYPTERS" over in the crypting section. I'll take this 8/35 over those 20/35 ones lol

VulcanReap - April 23, 2013, 5:17 pm

I really believe in this crypter but if it doesnt get an update soon i will be forced to give up on it..

Here's how it is people. Binky is at an irl event for the next 2-3 days. I've spent the day 'eating' my food through a drip. Have you ever tried to take a shit, be sick & stop a drip falling over at the same time? Yeah, fml.

Everything possible was attempted to get the update released but some features were not tested & as most of you know, we don't want any bugs with this with it being 'a bit special'. However, some server tweaks were made to hopefully combat the unexplainable error a few users are getting & a few other things too.

I know this seems like one thing after another & let's be honest, it is. To be fair thou, just under 2 years running & nearly 900 customers, you must have to expect times like these. All I can say is, trust me, the update is worth waiting for. Well worth it and not long now.

&FYI, I can still get between 5&7 /35 & a user sent me a msg earlier saying he got 4/35 but it was on another machine over Skype. If that user would like to PM me on here or Skype again, that would be great, thanks.

What setting did you used in crypter???

PedroDJ - April 25, 2013, 2:58 pm

Someone can help me with "Sending info to server & waiting for response..." error ?

Mike Bars - April 25, 2013, 4:09 pm

works for me but sitll getting 7
http://scan4you.net/result.php?id=0f0d7_4a305d

gl4dius - April 25, 2013, 11:15 pm

Same here. Had some stability problems yesterday but seems to be fixed. 7/35 is the best i can get, waiting for fud ?

henry2428 - April 25, 2013, 11:52 pm

lol, exactly 3 weeks since I bought and haven't been able to use :/

Support. - April 26, 2013, 12:56 am

PM me your Chronic username please, I'll see what I can do,

GanDino - April 26, 2013, 11:14 am

do we get an update this weekend? or do we have to wait much longer for the great update which you promised ?

I can see that this crypter is cheap and we all take in account that there can be waiting times, but at least sometimes it should get an update.

right now I cannot use the crypter because of it's detection, and an update was promised several times. so do you keep up promising or do we get at a certain stage a real update ?

I have read the explanations, over and over and due to my bad experience on HF it does not sound good at all.

let`s see where that leads to...

GUNZ™ - April 27, 2013, 1:30 pm

<https://puu.sh/2lhQg.png>

Crypting failed, when will this be fixed?

BottomNotch - April 27, 2013, 2:28 pm

(Apr 24, 2013 11:20 AM)Tony "Kommon" Stark. Wrote: [\[CITE\]](#) Here's how it is people. Binky is at an irl event for the next 2-3 days. I've spent the day 'eating' my food through a drip. Have you ever tried to take a shit, be sick & stop a drip falling over at the same time? Yeah, fml.

Everything possible was attempted to get the update released but some features were not tested & as most of you know, we don't want any bugs with this with it being 'a bit special'. However, some server tweaks were made to hopefully combat the unexplainable error a few users are getting & a few other things too.

I know this seems like one thing after another & let's be honest, it is. To be fair thou, just under 2 years running & nearly 900 customers, you must have to expect times like these. All I can say is, trust me, the update is worth waiting for. Well worth it and not long now.

&FYI, I can still get between 5&7 /35 & a user sent me a msg earlier saying he got 4/35 but it was on another machine over Skype. If that user would like to PM me on here or Skype again, that would be great, thanks.

Well we'll take your word on that... But dam it's been a while and this unfudness ain't that fun.

Sc?rpi? - April 27, 2013, 2:41 pm

I've moved to iControl RAT.

Thank you Chronic for being FUD around the first time I bought it.

Cheers,
Scorpio.

**** Debug JIT ****

Per attivare il debug JIT, è necessario impostare il valore jitDebugging nella sezione system.windows.forms del file di configurazione dell'applicazione o del computer (machine.config).

L'applicazione inoltre deve essere compilata con il debug attivato.

Ad esempio:

<configuration>

<system.windows.forms jitDebugging="true" />

</configuration>

Quando il debug JIT è attivato, tutte le eccezioni non gestite vengono inviate al debugger JIT registrato nel computer, anziché essere gestite da questa finestra di dialogo.

Since NetSeal didn't download any updated version, maybe I have probelm with NetSeal ?

**** Debug JIT ****

Per attivare il debug JIT, è necessario impostare il valore jitDebugging nella sezione system.windows.forms del file di configurazione dell'applicazione o del computer (machine.config).
L'applicazione inoltre deve essere compilata con il debug attivato.

Ad esempio:

```
<configuration>
  <system.windows.forms jitDebugging="true" />
</configuration>
```

Quando il debug JIT è attivato, tutte le eccezioni non gestite vengono inviate al debugger JIT registrato nel computer, anziché essere gestite da questa finestra di dialogo.

Since NetSeal didn't download any updated version, maybe I have probelm with NetSeal ?
Try another delete & re-download, should be fine then,

Or should i enable it on both??
Enable it on the Crypter, not on both.

Banks? - April 28, 2013, 9:09 am

I'm working on something right now to implement different crypting engines right now, you will be able to select which engine you want in the crypter.

Just to avoid any confusion, it's still .NET. What I mean by crypting engine is how the crypted file is stored and how the stub will run it, which should result in longer FUD times.

Rick R?ss - April 28, 2013, 10:40 am

Thanks for the updates. Kind of getting irritated lately with the extreme downtime and non-fud. Before this time it was the best Crypter I ever laid eyes on.

Winry Rockbell - April 28, 2013, 1:32 pm

It's an illusion if you believe that that is why it gets detected. It's detected because too many people use it, as a result it gets spread too much, and as a result of that, it lands in honeypots, gets uploaded to VT, and very importantly, it gets submitted automatically through various AVs.

PedroDJ - May 1, 2013, 12:43 am

It could be usefull edit host file "banning" dangerous AV sites...

That is what you always keep on telling us without saying what RAT you are using and which settings. Is it a secret?

scorpionwally8 - May 1, 2013, 3:58 pm

No secret , I'm using dark comet with a HQ icon ,startup+silent and valid assembly from a valid program. Hope that helps you out

?roxy - May 1, 2013, 4:45 pm

I finally found what's been causing me so much trouble. I've been having errors with the build due to missing "cvtres.exe" which I've been manually fixing. After I would crypt the file I would test it on my own computer, and it would appear to only work once. I finally took time today to try and solve this problem. The solution that I found was that if I made sure my cvtres.exe file was in the right place when I ran the server everything worked perfectly, but every time I ran my RAT it would delete my cvtres file again. I went into Darkcomet and found this...

As you can seen it is coping the server over my cvtres file which is why it's being deleted. I have it set to install into the temp folder, so I have no idea why it's putting itself here. Hopefully you can fix this, or someone can notify me how to fix it because it's really annoying having to replace my cvtres file manually over and over.

Thanks for the help,
Proxy.

Grim - May 1, 2013, 5:25 pm

okay, 2 possibilities:

1. you BS us
2. you found indeed a program with it's icon where it work in that way.

I tried with compressed server, with uncompressed server, extracted an icon from a valid program, used the assembly and still 5/34.

It's also curious that you are the only one who's getting this results.

Jay???? - May 1, 2013, 6:44 pm

Thanks for the help,
Proxy.

The uninstall function in DarkComet is deleting that file, because that is the file this crypter injects into, and DarkComet thinks that is where the file location is.

Replacing this file after every uninstall from DC solves your problem. Which slave is going to be uninstalled and then want to be reinstalled anyways?

Banks? Wrote: [\[CITE\]](#) If you are still getting that error, reinstall .NET 3.5 and then it won't happen again.

Should get them to download and manually place the file back in the folder, its alot faster.

BottomNotch - May 2, 2013, 11:06 pm

Will be waiting for the final fud update:D Thanks for the update!

GanDino - May 3, 2013, 2:05 am

Don't know if that is only me, but when I crypt the file it refuses to work.

Also the Binder does not work. I can see in task manager that it runs, it creates also the file in the temp or appdata, but afterwards nothing happens any more. The process disappears and cvtres is not showing up.

Anyone else with that one ?

Support. - May 3, 2013, 2:09 am

He already block the hosts file... It's just their is like 500,000,000,000 people using this crypter and it just gets unfud quickly.

scorpionwally8 - May 4, 2013, 11:44 pm

people just have to learn to use the damn inbuilt scanner because that is what its there for in the first place.

What - May 5, 2013, 7:00 am

Thats true some extremly intelligent people still upload their crypted virus to virustotal or something like that.

Banks? - May 5, 2013, 8:13 am

Update released.

- Changed the structure of the stub and how it executes.
- Changed the storage method.
- Hopefully fixed a few bugs (I need testers to confirm this and future fixes, so if you're up for testing, send me a PM).

As always, please let me know if you are having any issues.

I'm just gonna test it. I hope it works fine. :)

Thanks for update!

GanDino - May 5, 2013, 8:57 am

Thanks Banksy, the file is working again and connects. But the file binder does not work, at least in my case. Let's see if it is my personal problem or if others have that as well.

However, great that the main thing is working. BTW it's FUD as you said

http://scan4you.net/result.php?id=5ab3d_4fe1gp

Edit:

Binder works now, don't know why it did not it the first place. Everything top again.

THANKS MAN

Winry Rockbell - May 5, 2013, 9:02 am

Still 5/34 for me...What can I do ? Thanks in Advance for answering my Questions.

Dseko - May 5, 2013, 9:22 am

Hmm....

My status is "Connecting..." and if I'm trying to crypt I do get "Not connected to server" obviously.

Any help? :p

Banks? - May 5, 2013, 10:00 am

Try closing and reopening. The server is being a little slow so that might be the reason.

What - May 5, 2013, 10:14 am

Getting still the crypting error, I hope this gets fixxed soon.

iCub™ - May 5, 2013, 10:22 am

Great update! Thanks for the awesome support and quick updates!

anonanon2 - May 5, 2013, 10:36 am

As i got rep now i can vouch this crypter. One of the bests (if not the best) on the market. Little stub, nice support and nice options. It has dependencies but what computer does not have NET now?

The last version broke my bin, hope this will not. I will love to see the avast/sonar option working but i know is hard.

Thanks for the update Banksy

Banksy is one of the best members on HF. Reliable, hard-working and quick! Don't complain on the thread guys, if anything, PM Stark & wait 24-hours for your problem to be fixed, i'll bet you anything that it will be fixed within 24 hours. Great work Banksy!

back5 - May 7, 2013, 4:39 pm

it is working now :) what did you do to fix it? as I said this has not worked for me in about two months and now I am super happy :) thank you banksy

cientes - May 7, 2013, 6:15 pm

True Story, Crypter working Perfect again. Thank's Banksy!

jared05 - May 7, 2013, 6:45 pm

What are your settings guys? Because i tried and still the error was "Filename.exe stopped working". Thanks!

back5 - May 7, 2013, 7:54 pm

see it worked for me but it doesn't work when I send it to others :S

Chuck Norris . - May 8, 2013, 12:19 am

This crypter is not working. The seller is a scammer. Do not buy this piece of shit.

PedroDJ - May 8, 2013, 12:20 am

(May 8, 2013 12:19 AM)Chuck Norris . Wrote: [\[CITE\]](#) This crypter is not working. The seller is a scammer. Do not buy this piece of shit.

I'm a customer of Chronic Crypter since years, maybe sometimes the crypter have problems but

THIS CRYPTER isn't a scam :)

My opinion.

scorpionwally8 - May 8, 2013, 1:04 am

(May 8, 2013 12:19 AM)Chuck Norris . Wrote: [\[CITE\]](#) This crypter is not working. The seller is a scammer. Do not buy this piece of shit.

i beg to differ but this crypter is a quality product and banksy works hard to keep it this way, if you have a problem i suggest that you contact banksy and talk to him about it

GanDino - May 8, 2013, 1:24 am

(May 8, 2013 12:19 AM)Chuck Norris . Wrote: [\[CITE\]](#) This crypter is not working. The seller is a scammer. Do not buy this piece of shit.

Are you even a customer of this Crypter?

This one is by far the best one for it's price also if there is some downtime or difficulties. Banksy has till now always solved all problems, and against any speculations this Crypter is up and running.

I don't know what kind of attitude that is to come in a thread and leave your feces here.

Support. - May 8, 2013, 2:34 am

(May 8, 2013 12:19 AM)Chuck Norris . Wrote: [\[CITE\]](#) This crypter is not working. The seller is a scammer. Do not buy this piece of shit.

I love how I get you so mad, you have to bash other peoples products.

FYI, he is not & never has been a user of Chronic. Just a blatant cunt with an obsession with me.

back5 - May 8, 2013, 4:36 am

I still love this product it is not shit like chuck wrote, and yes banksy has managed to get the crypter working for me again.

Pr4wn - May 8, 2013, 5:11 am

Banks is no where near a scammer. The worst thing this product has experienced are some delays in FUDness and that was because the entire project was being redone so we can enjoy extra features and longer FUD time. Project updates are harder for crypters than other projects because you have to do 2 types of updates so any problems going on are understandable. Either way truth be told I couldn't have done shit without this crypter because the price allowed me to use a crypter in the first place without being infected myself or watching the author completely drop off the planet. I'll probably rock the sig for a bit.

back5 - May 8, 2013, 5:44 am

(May 8, 2013 05:11 AM)Pr4wn Wrote: [\[CITE\]](#) Banks is no where near a scammer. how can I use the sig? I would like to try and get banksy some sales :)

Pr4wn - May 8, 2013, 6:04 am

(May 8, 2013 05:44 AM)back5 Wrote: [\[CITE\]](#) how can I use the sig? I would like to try and get banksy some sales :)

Goto User CP then click Change Signature on the left and paste this into the box Code
[align=center][img]http://i.minus.com/iLG6XuzZRZ6Wb.gif[/img][[/align]Click "Enable my signature in

all of my existing posts" then click the update button.

What - May 8, 2013, 6:09 am

I am still getting errors it really sucks <.<

Delirium™ - May 8, 2013, 6:27 am

(May 8, 2013 12:19 AM)Chuck Norris . Wrote: [\[CITE\]](#) This crypter is not working. The seller is a scammer. Do not buy this piece of shit.

So said the guy who was selling public methods (Assembly.Load alternative, storage method).

The crypter works just perfect and it is FUD very often.

Support. - May 8, 2013, 7:01 am

Pr4wn, thank you for your support and help. It is greatly appreciated. :)

Quick notice to all users:

I receive 40+ PM's a day while getting messages constantly on Skype & I know some people still msg Banksy. I am saying it here for everyone to see, if you message me something retarded, I will ignore your message. Some points to remember;

Include your Chronic username, even if you have messaged me before.

Tell me what the error is, not just that you have one.

If your message doesn't make sense, don't expect a reply.

I will not send you icons. Google it.

I will reply to you as soon as I can.

Do not send me 6+ PM's about the same thing before I've had the chance to read the first one.

Thank you.

Banks? - May 8, 2013, 9:39 am

(May 8, 2013 06:09 AM)What Wrote: [\[CITE\]](#) I am still getting errors it really sucks <.<

What error are you getting? That's not specific at all, it could range from a general computer error to a specific error in Chronic's code, but without information there is no way I can know.

Support. - May 8, 2013, 9:42 am

(May 8, 2013 09:39 AM)Banks? Wrote: [\[CITE\]](#) What error are you getting? That's not specific at all, it could range from a general computer error to a specific error in Chronic's code, but without information there is no way I can know.

I've fixed it, he PMed me afterwards dude, :)

What - May 8, 2013, 11:47 am

Really nice support Tony. Thank you very much :)

BottomNotch - May 8, 2013, 3:29 pm

Looks like Dr.Web and Esat detects it now. Will be waiting for an update:D

PackTheMoon - May 8, 2013, 7:55 pm

Vouch for this amazing crypter I have lifetime and it works great.

iCub™ - May 8, 2013, 8:15 pm

Been FUD now for 5 Days! Thanks Bansky! Keep it up!

All users with the same problem: wait for the update!

Grim - May 15, 2013, 8:56 am

any idea when the stub update will be out and back online again?

folkz - May 15, 2013, 12:42 pm

It's still offline...

Waiting for some news =)

iCub™ - May 15, 2013, 6:32 pm

Guys, they are well aware that it is offline! Please refrain from posting about it, they will have an update out very soon! Banksy is great with pushing good solid updates in reasonable amounts of time!

yorkster - May 15, 2013, 10:42 pm

You guy's have any idea how long it will be before the server is backup?

Mr.Yuba - May 17, 2013, 7:45 am

It's still offline! wth, I need it guys... plz solve this prob

m3llomatt82 - May 17, 2013, 12:58 pm

Be patient everybody. Banksy is not just a coder but a scholar. He is probably suffering through finals weeks. Don't burn him out, it isn't like I paid \$200. This product is so cool I know it hard to be patient. Sometimes, while waiting for an update, I became like a kid waiting for gifts Christmas morning. That is when I realized Banksy is that gift and he keeps on giving.

Pr4wn - May 17, 2013, 1:48 pm

I'm not sure but I'm also under this impression and it's np to me. It was something I picked up cause it's a crypter at a good deal and made by a legitimate member. Best bet is to just get the lifetime for as cheap as it is and toss it in the tool chest because it's an investment for me.

Oliver Queen. - May 18, 2013, 9:55 am

It would be nice if he could throw a update once a day so i know hes working on it. So far lost 3 days didnt even get to crypt once

Crake - May 18, 2013, 2:31 pm

I'm getting fed up to the point of requesting a refund. I've made 2 crypts with this then it went down.

Support. - May 18, 2013, 3:29 pm

Everything that can be done to fix this is being but unfortunately, not everybody works on weekends. We can only apologize & assure you that it will be back soon,

scorpionwally8 - May 18, 2013, 5:33 pm

thanks for the update Tony, cant wait till you guys have it up and working again

Banana_ - May 18, 2013, 6:59 pm

Glad to see this is still around. This is an amazing crypter!

Cyrus - May 18, 2013, 7:12 pm

Obviously all of us customers are not happy that it's been down for a good while, a week I think.

But I'm sure we should all be happy as it is only \$20 for a lifetime license, so it's really cheap compared to others, so we should be happy for that.

Can't you just change everything back to the way it was when working, then it should work, like if you changed something for it to stop working change it back.

Anyways,
Kind regards,
?NONYMOUs

Debroski - May 18, 2013, 9:15 pm

If it's a server issue you can't just 'reverse' it. However, I think there should be some compensation for those who have bought the product but aren't receiving anything. I don't use it anymore, so I don't really care, but from reading the thread it's been down / buggy for a VERY long time now.

Free Facebook Advertising - May 19, 2013, 6:59 am

I'm Unable to connect to the server. Any help will be appreciated. thanks!

Lol'd. This is a poor excuse, if you are cancelling this project just do so instead of making up stuff.

Delirium™ - May 22, 2013, 8:13 am

Hello. I bought this crypter 25 days ago (according to my license). I would like to know when it will be fixed so I can use it since I need it for some personal business. Give us any estimate ETA. The product worked for the first 8-10 days well but then it either dropped errors or there'll be no connection. If you're planning to have this for a longer time, at least give us a refund so we can use the money to buy something that's working. Thanks.

(May 23, 2013 07:17 PM)Fgt.jpg Wrote: [\[CITE\]](#) How about you be quiet and wait for Tony "Kommon" Stark to contact Banksy for an update

I've waited quietly for two weeks, it's still not working. That's about as far as my patience goes, it doesn't take two weeks for someone to get in contact with another.

What - May 24, 2013, 6:42 am

(May 23, 2013 03:31 PM)TehComplex Wrote: [\[CITE\]](#) This is bullshit I bought the crypter nearly 2 weeks ago I've been able to use it once! How do I get a refund?

You can't get a refund, please stop beeing a kid and let Banksy do what he has to do.

Such people like you should get suspended from the crypter ?

m3llomatt82 - May 24, 2013, 8:21 am

I wish I could take wagers. In the past, I have given up on Banksy and thanked him for the months of great service I got for \$20. I never expected to hear from him again. A few weeks later, I tried out of curiosity and the product was better then ever. A few months after that I lost my job, my apartment, my dog and and had to sell my laptop (thank you Obama.) I was out of the picture for like six months. I was living in my cousin's dirt floor basement and he gave me his old computer. I pm'd Banksy and he personally looked up all my information, had me up in 45 minutes. I know if you just brought the product you might be disappointed, but if you have ever dealt with other crypters, let me assure you, for the money, this is hands down, flat out, the best cypter in the short history of hacking and the long history of the universe! BTW thank God for Walmart, I am doing ok.

Winry Rockbell - May 24, 2013, 8:27 am

Does he want to troll somebody or why does he need 2 weeks to contact to a person.

m3llomatt82 - May 24, 2013, 9:14 am

(May 24, 2013 08:27 AM)Black Acid Wrote: [\[CITE\]](#) Does he want to troll somebody or why does he need 2 weeks to contact to a person.

I am not certain what you are asking. I am not bright guy and have a hard time trying to figure things out. Who is he, somebody and "a person?" If you can rephrase that I might be able to help you.

Banks? - May 24, 2013, 2:08 pm

Update released.

I am extremely sorry for the downtime. There is no excuse (by the word's true definition), but the reasoning was because I was extremely tied up with school, exams, and helping many people out with their computers (apparently people's computers like to all break at the same time).

I have to go right now, but when I get back, I will add time to those who request it. Just PM me.

seawolve1 - May 24, 2013, 2:22 pm

No worries banksy.... Life happens and when murphy's law hits you at the same time.. Shit happens. Glad you are back !

Zbnt - May 24, 2013, 3:13 pm

Thanks for the update ! however ive already gotten like 5 people and they all disappear and say they av went off.... but i scanned it and its fud. Even when i infect myself after abit i disconnect from it and i have no av.

acedeluxe2012 - May 24, 2013, 3:18 pm

BottomNotch - May 25, 2013, 8:47 am

(May 24, 2013 02:08 PM)Banks? Wrote: [\[CITE\]](#) Update released.

I am extremely sorry for the downtime. There is no excuse (by the word's true definition), but the reasoning was because I was extremely tied up with school, exams, and helping many people out with their computers (apparently people's computers like to all break at the same time).

I have to go right now, but when I get back, I will add time to those who request it. Just PM me.
Thanks for the update? Glad you can come back!

Support. - May 25, 2013, 8:55 am

Glad to see all things normal again, just an FYI: I have a computer for the next week so PM if you need help.

What - May 25, 2013, 11:57 am

My crypt gets 9/35, dont know what im doing wrong there.

Encrypting - May 25, 2013, 2:27 pm

Thinking of purchasing this soon. Leaving this here so I can get back to it in a week.

Fraudster - May 25, 2013, 2:48 pm

Getting 9/35 with DC! Setting = DC start up, clone adobe reader build info, no start up with crypt, high res ico, sonar/avast any suggestions?

I think after all this time of waiting and those of us being patient the least we could expect is a FUD crypt!!

DyS- - May 25, 2013, 3:02 pm

I got 5/35, just bought it for 3 months, seems pretty good. :)

sweatpants - May 25, 2013, 3:17 pm

Could anybody tell me some semi-fud settings around under 4/35 or lower than 10. thanks :) lately i've been getting 7-9 but other than that. thanks :)

Support. - May 25, 2013, 5:02 pm

crypt!!

I think people should stop these kind of posts, imho. Especially when the user is cloning an app like adobe, a highly monitored app known for being used/copied in malware & using by far, the most detected RAT the internet will ever see but that's just my opinion & until I master my telekinetic-cardiac-arrest-and-spontatius-cerebrum-combustion ability, I'm not going to worry it about to much.

[Icon & assembly information]

To all users asking about the icon and assembly information. Personally, I use the same icon for every app I make so I have no idea but users have reported & it is recommend to use a high quality. I've never used assembly information in malware because irl I've never met someone who knew what it was & I would bind to a song/pic anyway. Users have reported copying a valid 'safe' applications info will help with detections but please do think about it a little at least. There are multiple ways these multiple AV's could very easily still use even the simplest of methods to verify things like Java, Adobe & Skype installers. Code tagging, naming conventions, size, hashes & header checking(.Net Java installer? Orly?) just to name a few.

This is a current scan using my icon & bla: http://scan4you.net/result.php?id=696ce_4q3ogr named b.exe

[FAQ]

Yes, we know we have picked up some detections, yes, the're being worked on, yes, an update will be out soon, no, I can't say when, no, I will not find & PM you every update, no, I will not explain what has been changed, no, I will not give you a discount, no I will not exchange LR, no, we ONLY take paypal, yes, we plan to keep Chronic going as long as possible, yes, I will unlock your HWID if you pm me your details, no, we do not want to go into partnership & no. I will not give you a licence until you get paid on the xxth, or after you have sold "sum FUD cryptz to my hexin crew" - Actual quote.

* Sorry, little rant, don't mean to offend anyone but I'm literally getting 00's of PM's about the above, would make an FAQ but no one would read it first anyway. Might be a little 'tipsy' too.

crowskill - May 25, 2013, 5:52 pm

Install Visual C# 2008 and dont use Fake error I got the same error

--

Hey guys if you dont use Icon changer you will get still 1/35! sounds good ?

jamdunguy - May 26, 2013, 4:07 pm

Getting 1/35 default setting with blackshades and default setting with chronic no icon, no fake error, startup enabled and cloned to my software of choice.

Banks? - May 26, 2013, 10:34 pm

I'll be working on the detections tomorrow. As for what I've been doing today, I thought I'd put a video together.

Spoiler ([Click to View](#))[Video: <http://www.youtube.com/watch?v=cC12eY6Dbrl>]

What - May 27, 2013, 7:16 am

That looks awesome bro, hope this will be finished soon :P

Johnson Licker - May 27, 2013, 7:24 am

I'm getting 3/35. :D I'm using TeamSpeak 3 to clone the assembly and have tried with a few icons. Some of them change the detection rate.

David Tennant - May 27, 2013, 2:50 pm

Anyone else not being able to connect to the server today around this time? I know there have been some server issues and I don't mind, it's just that my firewall went rogue and blocked a bunch of connections so I need to know if it's that or the server.

Thanks in advance!

By the way, I love the crypter ?

Pr4wn - May 27, 2013, 3:03 pm

????????? - May 29, 2013, 5:20 am

I'm getting sick of all this downtime.

Banksy, the customers ARE getting mad. Can't you see?

The fucking FUD time goes away in 7 HOURS!

Can you just re-code this crypter from scratch and make it better? I mean come on, this is complete shit crypter, no offense.

I'm getting sick of the downtime.

It's time for a re-code.

I'll help you with the design.

Customers are getting pissed off and I am too.

This shit is NEVER FUD.

It updates and in less then 2 hours its 10/35.

Block the damn hosts file on VirusTotal and REMOVE all regular member users.

Have everyone PM you there netseal username and then have them login and if its the same IP let them keep there account.

I mean come on...

I don't wanna lose my license since I don't have my trans id :P

Its all about the money - May 29, 2013, 5:34 am

If you are right im sad for buying it. :C

Yeah, we're gonna re-code it & ban random users because you're retarded. I see you have problems with repetition, contradiction & lying, 3 things I don't have the time or effort to try & cure.

(May 29, 2013 10:25 AM)John4782 Wrote: [\[CITE\]](#) Is this even still FUD? Could someone post a virus scan?

1/34 before the downtime but we're already working on an update anyway, :)

(May 29, 2013 10:22 AM)Nou4r Wrote: [\[CITE\]](#) why the fuck it removes his self? dont remove my comment again!

Just because you don't understand what an update it, doesn't mean it's infected at all. Don't lie about Chronic.

[Edit] About bloody time.

All users;

If you are upset but understand about the downtime, thank you. Thank you more than we can say, it shall be remembered.

If you're upset & you show it in the thread in a mature manner, I will explain, apologize and try my best o help with what I can.

If you're upset & you come here lying, I don't give a fuck. Lies & repetition are the two that make my teeth itch. If a user says, "never FUD" you're retarded, simply. We can only do so much, the rest is up to you. If a user says, "Always down" you're retarded too. Sure as hell wouldn't be standing still strong after 2 years if it was never up. Yes, we know we had the 11/12 days ish but you all agreed in TOS that that could happen, we do have real lives to. Yes, I know we're down now but as Banksy explained, he had to move it & it's not like these things are instant.

And as I've said many times, \$20, HF, Lifetime. If you want perfection, don't come to HF, lol.

As I said earlier, I'm going on vacation ban until I get a computer. Before the bullshit, "This as NOTHING, I repeat, nothing to with Chronic, I simply don't have a computer & in the interest of security, I thought it would be best."

I'll be back as soon as I get a computer & Chronic will continue as normal, I have no doubt Binkio will keep you all updated. Be lucky & if you can't be lucky, top yourself. (TwinTown)

PhunkTech - May 29, 2013, 1:43 pm

tonyreigns - May 30, 2013, 12:20 pm

I've had this crypter for about 2 weeks, maybe a bit more and I've only been able to use it once. I'll be honest, I've been pretty pissed off because I haven't really been able to use the crypter. However, I was very pleased with that one time use because it was FUD and I also understand that times were tough with exams and all. So I'm looking forward to the next update, hopefully everything goes well. :)

(May 30, 2013 12:20 PM)tonyreigns Wrote: [\[CITE\]](#) I've had this crypter for about 2 weeks, maybe a bit more and I've only been able to use it once. I'll be honest, I've been pretty pissed off because I haven't really been able to use the crypter. However, I was very pleased with that one time use because it was FUD and I also understand that times were tough with exams and all. So I'm looking forward to the next update, hopefully everything goes well. :)

Yeah, have faith in Banksy, I'm sure the next update will be great :)

Pr4wn - May 30, 2013, 3:07 pm

(May 30, 2013 02:57 PM)NZT Wrote: [\[CITE\]](#) Yeah, have faith in Banksy, I'm sure the next update will be great :)

I agree. Now that Banks has a little breathing room he can actually focus. Imagine getting out of school every day to figure out how to make working functions and FUD a crypter. Dude must be beat by the time he gets out of school and all the extra is just wow. It's summer time now so I'm sure it will be great.

rs2k11 - May 30, 2013, 7:55 pm

crypter not working at all when my friend execute it is the file is dissmis w.e idk english so yeah.

the file is dismissed w.e idk english so yeah. it is working fine for me. Something is wrong with your rat or settings

Banks? - May 30, 2013, 8:11 pm

Update released.

- Changed the way packets are sent, now serialized with ProtoBuf (open source serializer), so packets are smaller and build times should consequently be quicker. This was actually done in an earlier update, but I forgot to note it.

- Also added an early build of Project Nova, my new RAT. Some of you may know this from before, but this version is completely recoded. Literally nothing in it is the same. I changed everything about it, and I've improved on it a lot.

Banksy you are the man, the legend, the god.

EDIT: I'm getting 7/34, working on fixing this :S

Banks? - May 31, 2013, 10:13 am

I have an idea for a new storage method, and this time without codedom.

http://scan4you.net/result.php?id=2e97a_4tak2l

It might take quite a while before it is finished, because the current version relies on codedom completely.

Wait, I have an idea. It might not take that long after all.

Dseko - May 31, 2013, 10:15 am

Thanks for updating this again Banksy! I'll get back to you if I will not get my HWID working on new OS.

Pr4wn - May 31, 2013, 10:20 am

Are you using a DNS like no-ip or are you using your actual IP? I think it might actually have to do with the DNS because I never tested that part before releasing.

TheDevilMan - May 31, 2013, 12:03 pm

im using no-ip mate so that must be the problem

Its all about the money - May 31, 2013, 12:08 pm

In process of making review of that crypter...

My honest review.

GUI of the PRODUCT (5/5): Most clear & smooth gui i've ever seen. Really nice!

PRODUCT OPTIONS (3/5): It have basic options, encryption key generator, icon changer and fake error. Also it's bypassing Sonar/Avast SandBox (will make a video later). Botkiller, assembly changer what's really helpfully and advenced file joiner - i like that. Inbuild scanner is a scan4you so it's showing some AV's.

What with undetectable rate? Yeah... it's not best at all. :) Now it's fud

http://scan4you.net/result.php?id=f81e3_4tc7b5

» You also included Nova bot gratis what's nice from you.

COMPATIBILITY with other PROGRAMS (4,5/5):

Working great with everything, have a framework 2.0 dependency but now everyone have it.

AVERAGE RATE: 4,10

Note: Not bad at all but should be better, you can try it if you dont have alot of money.

OTHER: Banksy - You should stop working on Nova and rebuild the crypter.

ALSO sorry for my bad english. :)

dpdlcli1 - May 31, 2013, 2:13 pm

Got a error on nova
can't find *.cnova source file

Zmind - May 31, 2013, 4:22 pm

his it just me or after crypting i get a 19k file thats its corrupted?

????????? - May 31, 2013, 4:32 pm

I will make a small review of nova maybe today. :)

seawolve1 - June 1, 2013, 8:28 am

Hey Banksy,

Getting the following error when I try to open Chronic to log in:

Its all about the money - June 1, 2013, 8:32 am

Seawolve1 - just run it again, i have that issue two times. If it does not help create loader.log file in chronic category.

tonyreigns - June 1, 2013, 8:34 am

Hey guys, is anybody getting an FUD server...? Because I can't seem to get my DC server FUD. If it is FUD, can somebody tell me how to build my DC and the Crypter? Appreciate it.

Thanks.

seawolve1 - June 1, 2013, 8:35 am

Thanks Money! Worked on the 5th try..

Its all about the money - June 1, 2013, 9:25 am

@Up: You're welcome!

My DarkComet settings for crypter:

(Dont use advenced builder because most of these options are working not well :) use crypter startup)

tonyreigns - June 1, 2013, 10:09 am

I tried that and I got 5/34. Is this what you're getting as well?

Thanks.

Its all about the money - June 1, 2013, 10:13 am

You need to wait for new stub update...

Banks? - June 1, 2013, 10:46 am

(Jun 1, 2013 02:10 AM)wieland Wrote: [\[CITE\]](#) Thank you, Miner is FUD again!

http://scan4you.net/result.php?id=b0435_4tm7id

Edit: And what is Nova? Like a very small RAT? Is it having download & execute?
It's a RAT that I'm working on. I'm spending most of my time on stability of the connection so far, which is why there are so little features at the moment. It's very early in development.

Its all about the money - June 1, 2013, 10:53 am

Hey, Banksy - first crypter then Nova.

And nova is coded in C#?

Banks? - June 1, 2013, 11:54 am

(Jun 1, 2013 10:53 AM)Its all about the money Wrote: [\[CITE\]](#) Hey, Banksy - first crypter then Nova.

hisoKa222 - June 4, 2013, 12:48 pm

Hey,

i didn't use this crypter for Like 5 weeks why ? Cause It Stay At Connecting ... and never Connected, and i just bought 3 months, my time is ending up after 12 days, I hope you can add me some special day's to it :/

about the crypter : The crypter is fud when he uploads the stub, and it stays fud for logtime... probably it's a great crypter out there for that price.

GanDino - June 4, 2013, 1:53 pm

I try to use that crypter, but every time I crypt I get an output file which does not work.

It seems also that there is something wrong with the file size.

Looking forward to a solution.

Allah is One - June 4, 2013, 1:59 pm

Detection very bad 8/35 9/35 pliz update it :(..

Oran+ - June 4, 2013, 5:38 pm

Vouch, one of the best crypters if not the best..

kray - June 4, 2013, 9:18 pm

Last Visit: Yesterday 10:28 PM

You need to relax and wait it out. I'm sure he will be back with an update. He always has.

Banks? - June 6, 2013, 11:20 am

As some of you know, Net Seal has been having some issues (being DDoSed), so if you run into problems running the crypter or anything, I would assume that is the problem.

I will be out with an update as soon as possible hopefully to fix the issues and the detections.

seawolve1 - June 6, 2013, 1:13 pm

Thanks for the update Banksy, keep us posted.

Existing - June 6, 2013, 1:57 pm

<https://gyazo.com/cbbb7c7f66d18268bbc9f66841383aed.png>

Second time I've been banned randomly. I've only had a few working crypts from this crypter and

paid \$20 for it.

Also how did you know I have BitDefender? I turned it off for around an hour before even using your Crypter and how does it affect it?

I don't see why I'm not allowed to use it just because of my security? What should I use instead? And I like BitDefender since it actually works for me.

What is causing this error?

iCub™ - June 9, 2013, 3:42 pm

Hey guys, the reason it isn't FUD is cause all you dimwhits upload your stubs to online virus scanners rather than using the built in one! Also, its the huge amount of users that Chronic has that causes the FUD rate to drop drastically.

If any of you do use antiviruses, make sure you go into the advanced settings and turn off "Automatically send stub" because if it detects malware (i.e. something you crypted with Chronic) IT IMMEDIATELY SENDS THE STUB TO THE AV COMPANIES! Eset NOD is always first to get detected because a lot of people use it without knowing it auto sends the stub. Please help out all the customers and turn off the stub auto sending feature!

seawolve1 - June 9, 2013, 6:54 pm

Banksy..a little assistance please on the continuing error..

(Jun 1, 2013 06:45 PM)seawolve1 Wrote: [\[CITE\]](#) Getting the following errors when I try to run sandboxed or out of sandbox:

Settings: DarkComet - HQ Icon, Start up, .scr - then build. First time I have encountered this error since I purchased crypter 6 months ago. Any ideas?

Banks? - June 9, 2013, 10:34 pm

Can you send me the crypted file? I want to take a look at it.

scorpionwally8 - June 10, 2013, 4:40 am

not sure if you have updated the stub yet or not but here is my results using hq icon and valid assembly with dc

Currently I am thinking of purchasing this product. It's my number one choice right now to buy.

Would anyone who owns the product be able to give me a realistic rate of FUD? How often is it completely FUD?

Thank you.

BottomNotch - June 10, 2013, 8:05 pm

(Jun 10, 2013 03:09 PM)Johnny 3 Tears Wrote: [\[CITE\]](#) Currently I am thinking of purchasing this product. It's my number one choice right now to buy.

Would anyone who owns the product be able to give me a realistic rate of FUD? How often is it completely FUD?

Thank you.

Realistically a Fud update can take all the way up to a month. He does try to keep it around 1 week though. It's FUD for about 3-5 days depending on your settings.

Existing - June 11, 2013, 11:40 am

I've uninstalled all AntiViruses. Can I have access to the product I paid for now?

Banks? - June 11, 2013, 2:11 pm

Will be waiting for the update:) Take your time, I prefer quality.

Banks? - June 12, 2013, 10:14 pm

Update released.

- Fixed Gen:Variant.Barys.XXXX/Gen:Variant.Kazy.182277

- Fixed Trojan.MSIL/Kryptik.KH (ESET)

+ some others.

- Also fixed the "Remove File(s)" option on the binder, just noticed it caused the program to crash.

Hey I'm post #1000! Does that mean I get one for free ?

Just buy lifetime bro, I think I have it for well over 7-8 months right now, it's perfect.

And the support is perfect as well.

scorpionwally8 - June 13, 2013, 6:29 am

yea id suggest getting lifetime as well, Ive been using this for about 6 months now and have had no real major problems, also banksy updates it fairly often

Banks? - June 13, 2013, 8:40 am

I had updates turned off on accident, so if you couldn't crypt or the crypted file stopped working, try now.

GanDino - June 13, 2013, 10:59 am

File works perfect again. Scan4you and Element-Scanner seem to be down.

I used check4me and got this:

FUD here.

Update released.

- Fixed issues with the scanner, thanks to <https://hackforums.net/showthread.php?tid=3473052>.

GanDino - June 13, 2013, 2:27 pm

Scanner works, file works. The file is FUD. Thanks for all your efforts, Banksy

[\[img\]http://elementscanner.com//image.php?ID=02c0f34e2c5277be7726cb52e8eee5e5\[/img\]](http://elementscanner.com//image.php?ID=02c0f34e2c5277be7726cb52e8eee5e5)

Nitros - June 13, 2013, 5:00 pm

I get FUD without an icon, but if I use an icon, it always puts out 5 detections. Tried like 10 different icons. But nonetheless still very good. :)

seawolve1 - June 13, 2013, 6:50 pm

Thanks for your assistance Banksy. Working perfectly! I am using an external Icon changer (I always do that after I crypt regardless of the crypter I use) and am happy to report FUD results! Keep up the great work Banksy!

Thanks again!

BottomNotch - June 13, 2013, 8:11 pm

Currently with an icon you will get around 5/35
Without it's fud.

Banks? - June 13, 2013, 10:05 pm

I'll see what I can do to fix the icon detections.

Thody - June 14, 2013, 1:06 am

Good work man, been a customer for this crypter for a while, use it on and off. Never let me down.

m3llomatt82 - June 14, 2013, 12:11 pm

First, for all you doubters... I told ya Banksy would be back bigger and better.

Is anyone else helping Banksy out? I have a laptop now because i have to travel (At least I am working :D) I need to install chronic on me laptop, Can any body help?

Johnson Licker - June 14, 2013, 11:32 pm

i agree im getting 9/35 i need some to change settings?

Banks? - June 17, 2013, 3:27 pm

Update released.

- Fixed Trojan Horse MSIL.AAEL - AVG
- Fixed Gen:Variant.Kazy.187771 - BitDefender, F-Secure, G Data, BullGuard, and Immundet.
- Fixed BackDoor.Comet.152r - Dr.Web
- Fixed Trojan-Dropper.MSIL.Agent.akie - Kaspersky
- Fixed Trojan.MSIL/Kryptik.KQ - ESET NOD32.

I've also banned all users using any antivirus that detects Chronic relatively quickly after an update. This is a precautionary measure, as I have reason to believe that some people at these antivirus companies actually own a copy of the crypter.

I'm not angry that I was banned or anything, I understand completely. I've uninstalled NOD32 and I'm wondering if I can buy another license(most of the time, getting banned means you can no longer use the product, even if you purchase another license.)

You won't need to purchase another one, just send me a message with your username.

Johnson Licker - June 19, 2013, 3:47 am

Just got a FUD scan, thanks Banksy! http://scan4you.net/result.php?id=de19c_58shjd

cococaine54 - June 19, 2013, 7:33 am

Please, i have a problem ! after crypt my server is fud , all is alright all work, but microsoft essentials security detecte and kill it... i have send the virus to some people, and when they have microsoft essentials security, my server work only 1min, after it be deleted someone know a solution ? thanks !

wieland - June 19, 2013, 7:37 am

0/35 FUD Miner

Thank you :)

Why didn't you just post your error? Someone could have maybe helped you. I think some people were getting errors if not running as admin. Not saying that's your problem but it's a common one.

Cletus Kasady - June 19, 2013, 9:06 am

I just tried it on my other laptop. And i dont think its compatible with windows 8.(Im on windows 8?)

I'll just have to run it off my other laptop

Banks? - June 19, 2013, 10:19 am

Update will be automatic and it's being worked on as we speak.

luckyfish - June 21, 2013, 9:11 am

Good to know. It's always nice to use service that performs updates regularly.

Fractional962 - June 21, 2013, 11:36 am

Hello,

I'd like to ask for a refund of Chronic Crypter V9 as I'm not satisfied with the product. I was in a hurry when I bought the crypter in order to get my server crypted the very same hour. It had to be FUD for security reasons and that's what you advertised. When I scanned the stub you had a 7/35 detection rate and that's, in my opinion, not acceptable.

Please grant me a refund.

Fractional.

HeZz_Itachi - June 21, 2013, 12:42 pm

Hello

Product isnt FUD 7/35.

I took my money back over paypal because the article isnt so how described.
Pls Delete/lock my account (i will pm you if you are available)

heZz

JackSkellington - June 21, 2013, 1:31 pm

Fractional. which is why you won't make it on HF Re coding a FUD stub takes time, for any crypter you buy he's working on it and he's quick and always delivers, but because idiots keep uploading them to AV's we can't keep a fud stub that was way too fast after the update, banksy i think someone is sabotaging your stubs?

Johnson Licker - June 21, 2013, 9:58 pm

If you want the file to get a lower detection rate, listen up!

I didn't do it when I first started using this crypter but you should change the assembly of the file by cloning it to a program. This is in the build section of the crypter. This will lower the detection rate a lot. I clone TeamSpeak 3 and it seemed to lower the detection rate a lot more than other programs like iTunes, Google Chrome and Skype. Also using a HQ icon and using the .scr extension will help

If you change icons and use different assembly's from different programs the detection rate will vary. Good luck everyone and I hope I helped some of you. PM me if you need help.

Edit: Yesterday I had 1/35, but I guess with all the noobs who scan it on distributing sites make it go unFUD very quick... 9/35. Oh well, it's still a good crypter.

http://scan4you.net/result.php?id=72715_5ab5qb

ViRuS_DanGeR - June 22, 2013, 1:58 am

Hello! please answer my questions

1. your crypter bypass avast sandbox
2. how much weight stub?
3. how often do you update the deadlock? example today was similar burnt on the scanner antivirus when you're going to update?
4. when you run the file after the crypt, the antivirus program is not responding?

kray - June 22, 2013, 10:51 am

8/35 detected. Oh great, just wonderful.

(Jun 25, 2013 10:03 PM)eTrade Wrote: [\[CITE\]](#) What .net framework do i need for this? i have windows 7 service pack 1

You need .NET 3.5 for the builder and .NET 2.0 for the crypted file.

(Jun 25, 2013 09:43 PM)Gage8910 Wrote: [\[CITE\]](#) I'm getting a problem with netseal, all it does is say connecting when i enter my username and password. I have never encountered this problem before.

Is your firewall blocking connections to the server? That is my only guess as the server is up right now.

Johnson Licker - June 26, 2013, 3:01 am

The crypting is very fast, takes about 1 second! Thanks for updates and doing well with the crypter Banksy, I'm satisfied with 2/35! http://scan4you.net/result.php?id=905dc_5c9dhj

Edit: VIPRE and Ad-Aware and are only detection I've been getting recently Banks, just helping you improve the crypter.

cococaine54 - June 26, 2013, 5:21 am

Since some week, update of the crypter is just amazing, when it is detected, it takes only 1 day for the update, thanks a lot Banksy, hope you will continu like this !!

Banks? - June 26, 2013, 12:15 pm

(Jun 26, 2013 03:01 AM)Jibbs. Wrote: [\[CITE\]](#) The crypting is very fast, takes about 1 second! Thanks for updates and doing well with the crypter Banksy, I'm satisfied with 2/35!

(Jun 25, 2013 10:54 PM)Banks? Wrote: [\[CITE\]](#) You need .NET 3.5 for the builder and .NET 2.0 for the crypted file.

Is your firewall blocking connections to the server? That is my only guess as the server is up right now.idk it was just working fine but one of my other programs i have that uses netseal wont connect either

Pr4wn - June 26, 2013, 6:16 pm

(Jun 26, 2013 01:01 PM)Gage8910 Wrote: [\[CITE\]](#) idk it was just working fine but one of my other programs i have that uses netseal wont connect either

You could try the forum that handles .Net Seal. They maybe able to help you further.

<http://forum.elitevs.net/>

xVulnerable - June 26, 2013, 8:40 pm

Can someone tell me how long will this normally keep a server FUD?

And is it free from runtime detections?

tx

Banks? - June 26, 2013, 9:28 pm

(Jun 26, 2013 08:40 PM)Dmeli96 Wrote: [\[CITE\]](#) Can someone tell me how long will this normally keep a server FUD?

And is it free from runtime detections?

tx

It is usually FUD for a few days, and then an update takes normally about a day.

It is runtime FUD. Update released

No detection fixes this time.

Added back the choice for which file to inject into in the "Install" tab.

Still FUD:

dotRobby - June 27, 2013, 8:32 am

I downloaded the crypter for my Win8 Laptop. Didn't work very well with DarkComet there so I moved on to my other Windows XP PC. And downloaded DarkComet and the crypter. But when I open the crypter it says: Unable to initialize license file.

What's wrong with it?

Banks? - June 27, 2013, 11:32 am

Try deleting the folder C:\ProgramData\Nimoru.

skilshotz - June 28, 2013, 9:28 am

Does this crypter work with Imminent Monitor ? :)

Banks? - June 28, 2013, 11:38 am

(Jun 28, 2013 09:28 AM)skilshotz Wrote: [\[CITE\]](#) Does this crypter work with Imminent Monitor ? :)
Yes it does. I've personally tested it with the coder.

???? - June 28, 2013, 1:08 pm

Two questions. Does it have any dependencies, and does it work with Andromeda (TOW crack)?

Gage8910 - June 28, 2013, 1:10 pm

(Jun 28, 2013 01:08 PM)Toxhicide Wrote: [\[CITE\]](#) Two questions. Does it have any dependencies, and does it work with Andromeda (TOW crack)? LOL it is a .net crypter so of course it's gonna have a .net dependency. But I can't answer your second question sorry, I never used Andromeda :P. If Andromeda is .net, then yes it will work

NZT - June 29, 2013, 1:07 pm

Currently on 7/34, not great - hopefully update soon

Banks? - June 29, 2013, 6:42 pm

Update released.

- Fixed Gen:Variant.Kazy.193468 (BitDefender, F-Secure, G Data, BullGuard, Immunet)
- Fixed Trojan.Win32/Kryptik.BENQ (ESET NOD32)
- Fixed BackDoor.Comet.152 (Dr.Web)

Thanks to Debug for giving an idea on an Avira detection that came up when working on the update.

The injection methods are just basically what the crypted file will inject into. For example if you check svchost, it will attempt to inject into System32\svchost.exe, and if you check regsvr32 it will inject into System32\regsvr32. If you check Self, it will attempt to inject into itself. If none of those are working for you then check the compatibility option.

In the experimental options:

- Botkill: attempts to kill any bots/rats on the system and remove them, but not the most stable, nor is it really that good at it.
- Anti Delete: Sets the file permissions so that the user cannot delete them, but does not work all the time, and it may also mess up when you are trying to update your bots.
- Sonar/Avast: Stalls execution for 40 seconds to bypass Norton Sonar and Avast's sandboxes so that they don't detect the crypted file on runtime.
- Patch PEB: Only use if you have problems with your file not working, this may help.

Also, FUD here.

<https://avdetect.com/result/total/73bf133d481d19a864a0b3aa9e1ba6447a790e2f>

Can you send me the file you are crypting? I want to see what's going on to make it detected.

Support. - June 30, 2013, 3:12 am

Just wanted to say, glad to be back, Support is still up & running so if you have any problems, PM on here or add my Skype: KommonKriminal

SIM-1606834 - June 30, 2013, 3:21 am

Recommended, just bought it there now and completely baffled with the results. Never had a FUD crypter before :)

really nice and pretty crypter. i like this.

swe22 - July 1, 2013, 6:44 am

Banks? u banned my account becZ i have NOD32

Why?

Existing - July 1, 2013, 8:15 am

(Jul 1, 2013 06:44 AM)swe22 Wrote: [\[CITE\]](#) Banks? u banned my account becZ i have NOD32

Why?

Because the AntiVirus's will send reports of your files without you knowing. You shouldn't use a Antivirus when crypting. You should be able to use your brain to prevent you from getting infected.

GanDino - July 1, 2013, 8:33 am

GanDino - July 1, 2013, 12:12 pm

Use a HQ icon, upload an image to an image to icon converter.

This should lower the detection. Also you can change the assembly with another not so common application.

This crypter has hundreds if not thousands of customers, the only way to keep it undetected for longer is to try to make the server as unique as possible.. Obviously everyone has the same stub but if you use your own HQ icon, pump the file to over 1mb, use custom assembly which isn't similar to popular programs. This should help avoid the big 5 (AVG, Avast,Avira,Kaspersky,Nod 32) and eliminate strictor,kazy type detections (f-secure,g-data,bitdefender,bullguard) the other AV's no-one really uses.

This man makes perfect sense. Listen to him. :)

TimeShift - July 1, 2013, 6:29 pm

Just bought this but it's not working with the only thing I was trying to use it with: Silent Miner. Can you help me? Thanks

When I run the encrypted app it gives me an error saying "File is invalid" with "MPRESS" in the title.

Banks? - July 1, 2013, 8:32 pm

(Jul 1, 2013 06:29 PM)TimeShift Wrote: [\[CITE\]](#) Just bought this but it's not working with the only thing I was trying to use it with: Silent Miner. Can you help me? Thanks

When I run the encrypted app it gives me an error saying "File is invalid" with "MPRESS" in the title. I haven't tested it with that miner, but the crypter itself does not use MPRESS so that's a problem with the miner and not something I can fix.

You could try selecting the compatibility option in the injection settings though.

NotoriousOne - July 2, 2013, 1:13 am

Vouch for OP had this crypter for awhile it's pretty decent!

shifa786anjum - July 2, 2013, 4:29 am

tried every setting with high/low quality Icon and different assembly different extension but cant pass nod32 and avg ?

PHP Code

Thinking about buying lifetime. Does anyone know if this works on Windows 8? I don't see many reasons it wouldn't if it works on Windows 7, just wanting to be sure. Thanks!

curtis5000 - July 2, 2013, 9:31 pm

Someone pls post the best settings to get a FUD result

scorpionwally8 - July 3, 2013, 1:51 am

whats the max file size that you can scan with the new scanner? anyone know?

royalmx - July 3, 2013, 2:42 am

Hey my rapport
fud : 5/36

Injection :
svchost.exe : NOT WORK CRASH
self : no test
regsvr32.exe : NOT WORK CRASH
compatibility : WORK

or all it's nice

Good job good price

dblock1 - July 3, 2013, 6:44 am

can this fud crypt .jar? or just .exe?

Tortilla87 - July 3, 2013, 9:48 am

Trying to Crypt my Bot...
with some setting change 7/36 with a miner 12/36

Please update it -.-

MyLittlePony - July 3, 2013, 2:17 pm

(Jul 3, 2013 06:44 AM)dblock1 Wrote: [\[CITE\]](#) can this fud crypt .jar? or just .exe?
You crypt executables, not Java stuff /facehoof.

What happen to the nice GUI on the crypter?
Also what settings should I use for BS on the crypter? Usual ones I use for other Crypters are not working.

Lehuizen - July 3, 2013, 4:06 pm

I bought Chronic about three weeks ago as a total NOOB. And it works great, the worst I get is 2/36, and esetNOD32, is normally the one I get. Thanks guys for selling something that actually works, for me.

Xyzo - July 4, 2013, 2:34 am

I'm using this with DC, but when I tries to start it, it crashes ?
Anyone know what settings I should use?

EDIT: Nevermind, I got it to work ? ?
Vouch for this crypter, it works perfectly! ? ?

Nitor - July 4, 2013, 10:29 am

Love this crypter i just noticed thats its not FUD anymore 2/36 still amazing tho got over 800 installs with this crypter lifetime

Tortilla87 - July 5, 2013, 7:33 am

Where is the Stub Update?
Need it.
Now the rate is 4/36

Zelonia - July 5, 2013, 8:45 am

Good crypter but small problem.. detections every 5 hours..

GanDino - July 5, 2013, 11:20 am

Great stub, still 1/35:

Turkic - July 5, 2013, 2:07 pm

Hi!
Last Edit: Managed the problem.

But another problem:
I'm using DC, did NOT check startup while building server.exe, only network connection etc.
Chosen "Startup" on Crypter, but slave does not show up after reboot?

I'm running the crypted.exe on XP in VM.

The Milkshake Man - July 6, 2013, 1:14 pm

What settings do we use with Cybergate?

TimeShift - July 6, 2013, 2:56 pm

Last stub update: 30/06/13, it's not FUD anymore (9/36)

And the scanner often makes the app crash.

Dibs - July 6, 2013, 5:35 pm

Yeah as time goes on it's less and less FUD needs a fix asap I just bought this and I'm a little upset :(

Thee Ryder - July 6, 2013, 6:14 pm

I bought this crypter ages ago and it still works.

One big problem is SO many people have it that it doesn't stay FUD.

Spoiler ([Click to View](#)) I don't use it anymore but that seems to be what I'm seeing

TimeShift - July 6, 2013, 6:27 pm

(Jul 6, 2013 06:14 PM)Thee Ryder Wrote: ([CITE](#)) I bought this crypter ages ago and it still works.

Paloking - July 10, 2013, 7:06 am

Love this crypter! Bought it a while back, and then stopped using it as i didn't need it, but i'm using it again and it's still working perfectly!

This crypter, unlike many other products, has lasted along time and it's not even expensive!

Walter White - July 10, 2013, 9:10 pm

Wow it's been quite awhile since I've been on the ratting scene. Glad to see this crypter is still up and running.

Huge vouch for my nigga Banksy

Turkic - July 11, 2013, 8:39 am

"Status: Connecting" Have this crypter for a week, was never FUD, crypted files are ~10/36 detected, last stub update was 30.06.13, would anyone of you call me "scammer" if I'd chargeback my money? I mean, the thread clearly advertises "100% FUD startup". I know that I should not

expect FUDness for weeks, or even days, if the crypter costs only 10 dollars for three months, but 10/36 is clearly not acceptable. Most of these 10 AVs are mainstream AVs with big userbase, the other 20+ are shitty AVs noone ever uses (nearly), so this fucking stub is practically completely detected!

Thats just not acceptable.

RedDog - July 11, 2013, 8:43 am

Cant connect to the crypter, also you need to upadte the stub.

Cletus Kasady - July 11, 2013, 8:43 am

(Jul 11, 2013 05:00 PM)?Phoenix Wrote: [\[CITE\]](#) I believe it runs on the same host/server that Auxilium (his chat project) runs on. Auxilium is down too. Let's wait for him to fix this.

But it's showing "Status: Connected". Well let's wait, hope it gets fixed soon.

OmegaHacker - July 11, 2013, 5:42 pm

I'm getting 9/35 too :p But its from non-major antiviruses excluding bit defender

<https://avdetect.com/result/total/8b07f557fdccdd0768cb1fe760f1044e935789a3> heres the scan

cyber-dancer - July 12, 2013, 10:21 am

Quote:"Status: Connected". Well let's wait, hope it gets fixed soon.
isnt fixed till now...?

Please, i cant use the crypter for long time.

first it wasnt fud and now the crypter cant connect...

-Aspect- - July 12, 2013, 12:02 pm

don't mean to be mean or anything, but I purchased this licence because you promised it to be Re-FUded when it's detected and it is currently 8/43 (someone ELSE scanned it on virus total on a forum) And it has been this way for over a week and a half. I have lost many bots. I'm not sure what the problem is. after the new Re-Fed yesterday it seems to be picking up just as worse. There has to be a reason. Maybe one or more of your customers are compromising your project. Maybe someone

keeps reuploading the encrypted file to virustotal, or uploading it to some site ment solely to help antiviruses. either way something needs done because staying fud for only 2 days means there is something not right. Someone is shittign all over you, and you need to figure out who for the sake of your business.

cyber-dancer - July 12, 2013, 1:36 pm

hi,

i cant use the crypter cause it doesnt connect.

Status: Connecting...

It's been a great run, but I believe it is time for it to finally be over. I just simply am tired of working on this all the time, and it's time for me to do other things.

I will try to keep updating for as long as possible, but I cannot guarantee anything.

Thank you to everyone for your support over the last 2 years, but I'm done.

its sad to see it go, but thankyou banksy for all the support and keeping it running for this long, this was a great crypter and im sure it will be missed.

how about one more stub update for old times lol

Banksy have you though about having someone take over the project for you?

Thank you to you for running this crypter with patience, quality, and inovation, you have always found new trick to bypass av withtout c-p other crypter and update the crypter as much as posible since the begining (old customer talk). Good luck with the rest, it was a pleasure to use your quality crypter for 2 years !

I was expecting this. Great work Banksy! ?

Venom NeTwork - July 14, 2013, 4:40 am

Damn it.

I just paid for 3 months. I never got a FUD server.
I'm a bit pissed of now.

~HN

cyber-dancer - July 14, 2013, 6:55 am

damn, i bought it less than a month:

Date:

June 24, 2013, 15:43 UTC

Description:

Chronic Crypter - Lifetime

Payment:

\$20.00

want my money back!!!

And as you can see here:

<https://hackforums.net/showthread.php?tid=3390141&pid=33897843#pid33897843>

i cant use the crypter...

Thody - July 14, 2013, 7:27 am

I recommend closing the thread so no one else buys it, would save you a lot of hassle.

Geck? - July 14, 2013, 7:51 am

What the fuck? Do we get refunded? I just bought 3 months membership...

Nitros - July 14, 2013, 7:56 am

You should learn to read posts before making purchases.

Geck? - July 14, 2013, 8:08 am

I made the purchase a week ago. 0.0

Cletus Kasady - July 14, 2013, 8:11 am

I just bought life time less than a month ago, this is the second time a crypter has done this to me.
FML???

Banks? - July 14, 2013, 11:27 am

(Jul 14, 2013 01:41 AM)slasherx1 Wrote: [\[CITE\]](#) sorry to hear it go, but what happens to the people who purchased this in the past week or two and it hasn't been fud? are you going to refund them? Like I said, I'll try and keep updating it for a while so the newer customers can still get their money's worth.

cyber-dancer - July 14, 2013, 11:59 am

ok Bansk,

and what is with cant connect problem?

<https://hackforums.net/showthread.php?tid=3390141&pid=33897843#pid33897843>

i bought it on 24.06. and cant use it :-(

I'm working on getting the server back up at the moment.

Alfred - July 14, 2013, 3:49 pm

Can you sell it to someone so that they can continue updating it?

(Jul 14, 2013 03:49 PM)Alfred Wrote: [\[CITE\]](#) Can you sell it to someone so that they can continue updating it?

Please Banksy, sell it to someone! This crypter was looking so good when I purchased it! Don't end it! Just up the prices a bit or something :/

Don't give up!

scorpionwally8 - July 14, 2013, 6:14 pm

in the end its really up to banksy, we can just hope

OmegaHacker - July 15, 2013, 12:31 am

I just bought this less than a month ago...thanks for continuing to update it...but when it's all over, can you sell it to someone so they can keep updating it? It's sad to see this die.

Banks? - July 15, 2013, 2:13 am

If I were to sell it, I would make sure it is someone I can trust to keep it running, which isn't very many people on HF to be honest.

xtofke10x - July 15, 2013, 3:16 am

Bansky, please keep updating and running the crypter! Even in hard times we all waited for you, some of the customer talked bad about your crypter but when you updated the stub or fixed the problems 'WE ALL' kept using your amazing crypter!

Johnson Licker - July 15, 2013, 4:03 am

Cheapest crypter, sad to see this go. I bought a lifetime license about 4 months ago it was pretty good. Not always FUD but close.

scorpionwally8 - July 15, 2013, 7:01 am

Just wondering banksy are you still working on getting the server up, just hoping to get one last crypt

Jekyle - July 15, 2013, 2:06 pm

I feel ya , 3rd crypter that this has happened too in the past 6 months for me. I have 69 days left and have not been able to use for over a week now. Was nice while it lasted ?. After three strikes now of this happening with crypters I have purchased Never again will I purchase a crypter for any more than a month..Unless I am sure it's going to be alive for awhile. Starting to seem like even if i buy 3, 6 month, or yr subscriptions I only get a month out of them anyway, if even. This one had a long run though..just not for me ? Sorry to see this project end.

Ulysses S Grant™ - July 15, 2013, 2:07 pm

Hey guys the crypters no longer working for me is there an updated one ? UTRYUDIE™ ?

Alfred - July 16, 2013, 11:22 am

Someone who has a fighting chance of keeping it alive > Completely dieing

cyber-dancer - July 16, 2013, 11:55 am

Quote:I'm working on getting the server back up at the moment.

but it doesnt work.

i cant log log in.

Your lifetime was only two weeks with no fud.

Quote: I'll try and keep updating it for a while so the newer customers can still get their money's worth.

i cant see that...

Grim - July 16, 2013, 12:44 pm

was a great crypter and a great coder. if you do end up selling it i trust whoever you do sell it too is the same :)

m3llomatt82 - July 16, 2013, 6:33 pm

Banksy, thanks for the run. I don't think you can find a better person on HF and I would bet not a better person in life. I would love to meet you sometime and introduce you to my daughter.

I am sorry for the new customers out there but it is a risk I took two years ago and it really paid off for me, sometimes you win and sometimes you don't.

What are your plans for the future?? I know what ever you choose, you will be successful.

Good luck my friend and keep in touch.

BTW, can you recommend another crypter?

Nitor - *July 16, 2013, 10:28 pm*

What if we just bought it.. won't you refund?
