Thread: [Looking for Rapidgator Premium Link Generator](#)

Maxell-LN - April 8, 2013, 6:05 pm

I've used this one in the past. <http://www.generatorlinkpremium.com/> But unfortunately it doesn't work with rapidgator anymore. So any suggestions please would be much appreciated. Thanks

You have hardly any posts haven't really made any contributions and you are posting in the wrong section.

If I had any money I would, but I'm one of these people with Asperger's Syndrome. Some reason it makes employers freak out, and with that I've never been able to find work (Im not taking the piss, I'm serious - disability issues are ignored where I live).

Unfortunately I'm not one who can hack, so I don't have anything to contribute in that manner, however I could contribute music if anyone is looking for something. So maybe a barter can be sorted. :)

i am trading them for all kinds of stuff, so if you have anything to offer (steam games, accounts for other websites, lots of pictures of cute kittens) i could give you an account
