Green Death - May 29, 2014, 3:21 am

Hello,

Are your proxy ban from most of the web service like twitch ?

I mean, twitch automatiquely ban proxy from big server / datacenter.

I'm looking for proxy that can pass those services for liveview for exemple.

master cracker crew - May 29, 2014, 3:26 am

i didn't test my proxies against twitch mate....tell me what kind of proxy do u need?

Green Death - May 29, 2014, 3:33 am

Sorry if it's hard to understand what I mean ^^

I need proxy that I can use for create mass accounts on services like twitch / youtube / twitter etc etc.

The probleme is that I was using HMA proxy for a long time but I thing those big compagnies understund (1 year later) that we were using those proxy for that. So now, almost all of HMA proxy are banned =/

I was wondering if your proxy are subject to such a ban too or not ^^

I don't need them for DDoS or shit like that ^^

Only account creation / follow services ^^

Thx for your fast answer.

master cracker crew - May 29, 2014, 3:38 am

i send you a list to test and i can bring u everyday a new list if my proxies will work wit your bot

1. You said you're gonna update the configs so there is no need for me to buy any.

2. You're not dr.joker so you're not the configmaker. Therefore this is a public or resold config.
