Froggy - April 9, 2013, 6:23 pm

shit was so cool.. but at a cool \$400 each, I couldn't afford to buy one.

Drink milk and use a hookah pen (or add milk into a full hookah) for better, thicker clouds.
Pretty neat though.

I stated I would not know in regards to the presumption of getting smoke in the eye due to smoking. I did not know it was likely, and it wasn't apparent for someone who is a nonsmoker to which you got smoke in your eye, seeing as how I have never seen someone have such a thing happen to them before.

I'm sure my statement made you feel more ignorant; however, seeing as how it was an insult to my intelligence, it is indirectly an insult to your intelligence, implying you are easily swayed, and thus not strong in your convictions.

I wasn't trying to degrade your intelligence you just came across as being a "ass" on your previous comment, so I decided to be a "ass" back..

Getting the smoke in your eye is normally caused if you don't inhale quick enough and the smoke well I guess goes in your eye and it kind of stings, but if you inhale the smoke and it goes in your eye it doesn't do the same effect.

By stating your I.Q has dropped, it means I am so ignorant to which I made you more ignorant as well. If that's not what you think it means, by all means, tell me what it does.

If I wanted to be an ass, this is how I would do it: prior to the second time you used the word "ass", the "a" should have been replaced with "an".

What do you think it was? Not sure if you're blind or something but it looks to me as if it WAS a cigarette, Looks like I should be pulling the trigger around about now.

This will probably be the last you'll hear from me because of some guy saying I should shoot myself because it was a cigarette, I mean the logic in that comment pretty much filled my needs. Thanks.
