Hi, I just finished making my YouTube bot work. It can like, dislike, and subscribe to channels. I'm currently working out bugs and stuff and I thought I should do a little giveaway on Hack Forums. Just post down below with your YouTube video and I'll do my best to like it! The first 10 people to post get 10 likes on their video. Sorry if you don't get them all, as I said, I'm working out some bugs.

EDIT: If you could also PM me that would be great, because I might not be looking at the thread when you post.
