Thread: [???? FREE ? XBOX ? BOOTING ? SERVICE ???? \(ONLINE\)](#)

Prion - April 9, 2013, 10:55 pm

Hello HF members, i am offering you a free booting/mass lag service but this is limited to only booting/lagging people off of Xbox Live and nothing more (However the boot might screw up their internet for the duration). I will not hit any sites this is merely for Xbox 360.

Format for requesting boot:

IP: (If you do not know this but know their skype name i may get it for you otherwise please do not use this service)

Duration: (How long the attack should last, i will only do attacks for no more then 3 minutes or 180 seconds however i may change this later)

Lag or Boot: (Note some connections may only lag very hard instead of disconnecting fully)

Example/Format to PM

IP: ###.###.###.### (Replace # with numbers)

Duration: 3 minutes

Lag or Boot: Boot

[CLICK TO PM ME](#)

To learn how to get IP's from your Xbox please check out this helpful tutorial [CLICK HERE](#)

Please PM me only and not post the IP's of others on this thread. If I am offline when you want a boot please do not pm me, I will use a Status on the bottom of the main page for you to see if I am providing this service.

Rules and TOS:

- You may not target any Hackforums member
- You may not request a boot more then once a day
- I may stop providing this service at ANY time
- I am NOT Responsible for any of your actions or anything that happens to you as a result of this service
- You agree to these rules and TOS by Private Messaging me

Status: SERVICE ONLINE (Playing BO2 Zombies)

Please DO NOT post IP's on this topic, your requests are to be sent by PM. Leave the topic for feedback and questions please. I will update the status when I am available.

If you are interested in buying Atom Boots Cheap Memberships please visit our thread :) <https://hackforums.net/showthread.php?tid=3414473> Happy Booting! :)

Prion - April 11, 2013, 9:08 am

Currently online and providing this service :) PM ME the IP do not post it here please :)

To know for sure if someone is booted offline you should be in party with them and if they get

disconnected randomly well most likely they have been booted :P

team3d - April 11, 2013, 9:11 am

Looks good. Are you ever going to release this publicly?

Prion - April 11, 2013, 9:13 am

If you think about it anyone can do it :P Im just using this service for people that either do not know how to boot or cannot boot because they don't want to pay for a booter. Plus it helps me out to test the tools i am using :)

Nameless™ - April 11, 2013, 9:15 am

Can you still nab IPs via network bridging in xbox live parties? I assume based on logic this still works... unless Microsoft is finally more advanced than the average high school student.

MoneyPak - April 11, 2013, 9:16 am

This looks very interesting OP, do work!

Prion - April 11, 2013, 9:17 am

I am working! lol but no requests have come in ;)

Dupontrocks11 - April 11, 2013, 9:17 am

This is pretty funny actually, might use this eventuallu! Good work OP

Service is up just hit me up on topic or by PM

ricckyrozay - March 27, 2014, 7:23 pm

Hey man, I'm using z7 inc booted and pulling ip's from Cain and Abel but nothing seems to happen could you advise me where I am going wrong? IP - ####.####.####.#### port - 80 time - 130 UDP

Yeah that's really great. Revive a thread that was created 11 months ago. Jackass.
