Thread: [BTC-E not safe!! SELL SELL SELL](#)

Darkwin - April 11, 2013, 2:02 pm

Just wanted to advice the HF community that BTC-E isn't safe and your account could potentially be compromised at any given moment. :)

I take no credit nor admit to any involvement in this ?

Exactly. It kind of defeats the purpose of using a currency without a central authority if you're going to let a central authority store it for you. Lazy people just need to download the blockchain and use some common sense.

The Conjuror - April 11, 2013, 3:04 pm

Good job Darkwin. Fuck the trolls, now take it all and put it all on black ?.

Om?nous - April 11, 2013, 3:31 pm

ok if this is fake then he is just trying to get people to sell so the bitcoin will crash faster = buy loads of bitcoins making the price go up = big ass profit? :)

bfreakz - April 11, 2013, 3:35 pm

This is not fake. Good job Darkwin!

Examplesze - April 11, 2013, 3:51 pm

Meh, I'll loose like \$200, but who gives. Not bothered to login and get fucked over lol.

Anonymous Leader - April 11, 2013, 4:04 pm

Now make over 9000 different Bitcoin addresses and filter all their coins through the blockchain.
Then retire like a boss.

UTDs - April 11, 2013, 4:05 pm

If he could actually transfer coins, don't you think he would be doing it instead of posting threads?

Acquired - April 11, 2013, 4:07 pm

Vouch OP gave me 10 free bitcoins, thanks lad.

Totally right, I'm more amazed at how you created an account just to post this. :) As i stated above this is all fake...very fake.

Cade - April 11, 2013, 4:15 pm

Amazing, guessing this is due to your shenanigans?

5 days ago, just seen this thread was too funny not to make my first post on. Anyone who believes this is extremely gullible, claims he doesn't want to incriminate himself when in the whole thread he's been implying that he's penetrated the sites security. Makes sense. I'd say you've been contradicting yourself in every post you've made since you were asked for more proof, aren't I right? If not prove me wrong.

Only an easily persuadable person would fall for your "show more proof" requests, Like i said in the main post i'm simply advising users am not one to really care whether people think its real or fake etc. :) Anyone who knows me can vouch.

Anyways GLWS bro. ?
