Thread: [\[FREE\] RAT Removal Service \[TEAMVIEWER\] \[CRYPTED\] \[NORMAL\]](#)

WaffleCream - April 14, 2013, 12:42 am

Hello HF,

I have learnt quite a lot from HF about RATs and Crypters, I am making this service to give back to the community. If you need help removing a RAT that is crypted and FUD I'll try my best to remove it.

Pm me with your Skype and TV. It will be ideal if you had TV as it will be easier for me to remove rather than telling you each step on searching for it on Skype.

I'll try get back to you as soon as possible after you PM me but I may be busy so don't expect help straight away.

Thanks I hope I can help some of you and you enjoy my service.

Haseo™ - April 14, 2013, 2:10 am

This is quite a nice service for newer members or people who are infected with something other than Darkcomet (Darkcomet killer removes DC regardless of being encrypted I believe) Great service man good guy =D (Also if you get too many request I will help you remove virus's/RAT's/maleware)

Yeah this is mainly focused on new members who have been ratted or are not up to speed on how to delete hidden startup RATs with persistence.
