Thread: [Denpa Kyoushi Discussion](#)

Okay I just feel like talking about the Denpa Kyoushi manga because I just got all caught up with it :P

So Denpa Kyoushi is similar to Great Teacher Onizuka in respect to a teacher helping out students with their problems.

But the way that Kagami Junichirou goes about doing that is...interesting. What makes Kagami interesting is his huge otaku

personality, he'd much rather be updating his anime blog or playing with his "sergeant sanders" figurine than teaching, at least

at first. He's also a physics genius who constantly declines offers to work at "CERM" a world known particle research facility (parody

of CERN). Oh and he also has a cute little sister who's there to manage his money (because Kagami would spend it all on games/anime)

and beat him in the head with a baseball bat when he does something despicable.

Description:

"Kagami Junichirou was known as a physics genius when he was a teenager, and he was even published in "Nature." However, after college, he suddenly lost all interest in science. As a NEET, he's devoted himself to his anime blog and nerdy collecting habits. He claims he has a serious illness

called "I can't do anything I don't want to do." Desperate to get him to do something with his life, his little sister manages to get him a job teaching physics at his old high school. He's certainly an unconventional teacher, but he becomes fairly popular with the students. After helping a girl who's being ruthlessly bullied, Kagami finds that he actually likes teaching. Will he continue his career as a weird teacher? Will he go back into physics?

Or will he end up back where he started?"

Any thoughts on this manga?

I think it's pretty good.

I read it actively until the end of one of the arcs, and kinda lost interest in it.

And then I picked it up again, and it's still just as good.

Not looking forward to the current one, though.

I got pretty bored of it fast. Think I'm on chapter 19 and all I remember is the idol part, which also reminded me of GTO.

I agree, the story progresses in a really predictable way.

But I do like the characters from it, though.

Noooo, it's not boring. It's all preference but I like it a lot.

It is predictable, but I like it because it's pretty funny and the characters are really interesting.

I have 60 chapters just taking up space on my tablet. I can't bring myself to read another page. I don't know why, but I just can't. Maybe its because I'm not too fond of the art style. I really liked it at first... I don't know why I dropped it.

Maybe you can spoil some motivation?

Well you just need to make yourself read another page, once you get past that then hopefully you will keep reading :P

Spoiler [\(Click to View\)](#)Well I don't know what would be motivation for you, maybe the homosexual cross-dressing boy arc?

Looks like I'll be catching up tonight. I'm hoping his character design is really cute.
