Thread: [Medium/advanced C4D signature. \[PS\]](#)

Vaqxine - November 7, 2008, 7:35 pm

Great one here, all the outcomes I've seen have been amazing and it's pretty simple to follow. Getting quite advanced here but it's worth a shot. Trying out things and experimenting is what it's all about ;-)

MaxDaRipper - November 21, 2008, 11:45 pm

nice man ima try it out

dbxd - December 10, 2008, 11:06 pm

do you have a link to that brush? i could use it in a diff sig =/

Polymath - December 11, 2008, 5:23 pm

If I'm correct it's not a brush it's a render from a 3D program!

Networkmancer - December 11, 2008, 8:10 pm

Ya your correct man..

und3rcore - December 12, 2008, 4:47 am

nice tut but what is c4d

Divine Flame - December 12, 2008, 4:58 am

They are the abstract looking renders.

Polymath - December 12, 2008, 5:02 pm

I used to use C4D all the time when I first got into PS I was head over heels for abstract!! lol

dbxd - February 8, 2009, 7:26 pm

doesn't matter you still use them like brushes c4d's are the same thing they call them renders but they are basicaly like a brush to me.

narutogod - February 9, 2009, 1:26 pm

i dont know how to use c4d can ya help me plzzzzzzzzzzzz ty with a tut on how to use them under a sig like the lights or so ?

Vaqxine - April 23, 2009, 11:33 am

Bump. Let's get some moar groovy C4D sigs.

Mista Smith - August 21, 2011, 3:55 am

Nice tutorial.

Thank you very much 10/10

Fiddl - August 21, 2011, 4:03 pm

Good Tutorial :)

Thanks for posting.

Clones - *September 16, 2011, 9:45 pm*

This is very helpful to me, thanks for sharing :)

Annonymous - *February 10, 2012, 12:30 am*

Hei,dude..very good post...gonna check this out.
Thnx.
