Thread: [\[Free\] Website Ip Grabber \[By ramon9585w\]](#)

?I???po?N? - April 17, 2013, 3:05 pm

Hello,

I've downloaded visual basics today and i've been working on my first tool in my live!

It isn't really big, just a small ip grabber, i hope you guys like it, if someone got any suggestions for another tool please post below. And does someone know a good website where i can learn coding c++ etc so i can learn making more and better tools?

Start > Run > CMD > type ping "website you want ip of without quotes"

Sorry to shit on your app OP, good job and all, but we already have this function. Keep at it and build something unseen!

I know, i think 90% of the members on HF know's how to resolve a website ip, but i've made this tool because i want to learn how to create and code tools, so i've started with a small one, but i understand your point ;)

Good start man looks good and seems to be flawless

likedwre - July 18, 2013, 6:20 am

as said up there, its very easy to get a website IP. but ofc theres a good beginning to start with these tools. good luck on future tools :)

Baysen - July 18, 2013, 8:01 am

Downloaded, thanks OP! I will use it

Haha nice to hear :)

Was just a small tool to learn how to code and make tools ;)

Good job! good luck on your next project

Dr41DeY - September 17, 2013, 7:43 am

Well your fiest program! :D!

That's nice! :p

Hope you will make more! ;)
