I would personally call upon Blackshades. Then again, it's the only one I purchased.

DarkComet... It's the best free one. jRat is good, but still in beta. Also blackshades have very sketchy reputations to scam/backdoor.

Yeah. I think ill go with darkcomet again then. :P

jRAT if you do not got a crypter or you need it to run on other machines than Windows.

Blackshades if you want something premium and good, but if you are out of money, DarkComet.

But you need crypters anyways for the 2 said below

jRAT would be the best but since it is in beta and there are alot of features full of bugs I would go with DarkComet, also BlackShades is a POS would not use that program in a million years.
