Thread: [\[TUT\]How to spread your infected shiet - The lazy way\[TUT\]](#)

Mark Webber's B1tch - March 30, 2010, 2:42 pm

Hello guys, This is for education purposes only. I take no responsibility for what actions you take. ?

Okey.. This is mostly for beginners - because it's so easy to figure out yourself, but also good for lazy smart people. ?

And this really works! I've infected sooo many dumb people searching for MSN Password Hacker/Cracker(s), Keygen for games etc..

You won't believe how fast you get victims if you do it the right way.

PS: Send me a PM and I'll tell you how to get your watchers early, without any hacking, tools etc.

The place to spread is YouTube

- Why YouTube?

- Because there are thousands of noobs searching for all kind of weird stuff for free 24/7.
- Because it is very easy to spread it on youtube.
- And last: You can remain sleeping while getting your victims.

Tools needed:

- Brain
- Internet

Extra:

- A Crypter (So smarter victims won't detect it as a virus.)
- A binder (If you wan't to make your victims more convinced.)
- And last on the extra list: A fake program

So how is it done?

The things you have to remember when publishing a video is:

- Create a believable video (Feel free to use my videoes) - Just send me a PM. But I don't like when people just copy my video off YouTube and upload it on their own accounts. (Which has already been done a couple of times.)

- Try to convince your watcher that this IS working. Show proofs, and everything you can think of.
- Important: Make a good name for it. Something that a lot of youtube users will search for, and make it special so it's easier to get victims.
- Also, for the extra, you can put a fake virusscan or a real one where you scan your crypted file.
- And last: Use your brain. And if you want; Do a lot of thinking before releasing any video.

Remember: The longer you think, the better it gets.?

Mini comment: You don't have to do a lot of thinking really, the noobs on YouTube is really ???

- Hope this helped. Post your ideas/feedbacks/questions.?

- CS

Well.. About the pictures.. You really don't need any pictures for this, do you? I think it should be very easy to understand? ?

You know what's funny about this... I search YouTube for videos of "RuneScape Hacks" and download the program. Then I decode the program to get the gmail account, LAWL! Good shit... If it's a RAT I just open it and find out the IP. ? Great tutorial though, really basic.

Haha, well.. Of course it's a lot easier to track rats ^^ Sometimes you can even just use the CMD command netstat and find your connections.. ^^ ?

Baal - March 30, 2010, 7:59 pm

I use to do this but , it got a bit annoying because of the fuckers who upload my server up to virustotal.com and get my server detected after a week or so -.- Any suggestion to counter this if any ?

Well.. There aren't that much of those on youtube that is smart enough to virusscan it... But remember: If you don't use any Java drive-by, it will be detected someday anyways... Even if its on Omegle, YouTube etc. Because some people will virusscan it anyways. Lately, I've been using Istealer.. Because I can't use rat.. My router won't open the port. ?

And btw: I've never had this problem... My file is still Clean.

Well... You got to make sure people really wants what you are uploading..

Like not upload a calculator ?

And you got to change a bit on the name of the video.. So it gets on the top of search results..? ^^

Lol. You didn't even have to put the "Facebook pw" in there. It makes it more untrusted, cause they will get infected anyways.

But anyways, Good video. Let's hope you get some victims.?

Paranoia here, but when you link off of YouTube with that stuff won't people complain to YT and put THE EYE on you..... there doesn't seem to be a way to stay anonymous on YT.

Also, I don't really care if they cancel that Channel but what about my other Channels that will come

back with the same identity?

They really don't do anything.

They haven't tracked my IP or anything. And why should they?

There are a lot of rats on YouTube etc... But they are not getting tracked, are they?

There are a lot of rats on YouTube etc... But they are not getting tracked, are they?

I was just worried about losing my other Channels. Thanks for the reassurance.... and thanks for the great TUT.

Advanced Hacker - May 21, 2010, 9:50 am

This is successful and a lot used TUT

Good work though

Valour - May 21, 2010, 10:12 am

ko0l tut..

and yea..

i did not feel any need for any pics in here...

Nuked - May 21, 2010, 1:48 pm

Except on YouTube if your using a vB keylogger and your source is not hidden.

A lot of people reverse it >.> And get your emails.

Sweeney - May 21, 2010, 1:51 pm

Looks good. I'm gonna try this once I get crypted.

Man... Then you just hide it. ?

Diamond3x - May 29, 2010, 12:08 am

Can we get banned from youtube for this thing.I ask bcoz i have been banned from some torrent websites.Is the case same with youtube?

12dollars - May 29, 2010, 1:01 am

Thanks a ton for the tutorial, Do you think I could nab some of those videos off of you?

I don't think YouTube is like that.

But I mean. If you do, you just make another account.

And I'm sure you will have many victims until then anyways.

bmdkart - May 29, 2010, 6:09 pm

thanks for this tutorial i will test it

The Praesidiarius - May 29, 2010, 6:57 pm

This was put together well, good job.

MORPH-182 - May 29, 2010, 11:49 pm

This is an awesome tutorial. Thanks heaps for the share!

And there is smart ass people that sometimes wants to fuck it up for you. So they scan on VirusTotal. ?

Forex - May 30, 2010, 6:45 am

this is very easy to read

spreading via youtube is the easiest way to get lots of randoms
chatrooms are good if you want pedos or a specific sort of person

Freddy Kru?ger - May 30, 2010, 9:53 am

I think you should recommend some fake programs. Perhaps ones that in your experience have had great success.

Decent tutorial, I would give it a 5/10 it is very basic but not completely mind numbing. I would work on making this with more links and suggestions since your target audience by the title is "lazy people".

BTW 500th post ?

Take a look around for .exe files like bots for games like runescape or WoW,ppl search them on youtube alot. bind your keylogger or RAT with it,and have fun. ;)

(POST A FAKE VIRUS SCAN OFCOURSE!)

Pfft, Youtube won't run on autopilot. Use P2P (Peer2Peer) Networks, such as uTorrent. You can also use one of my private methods ;). (300 - 500 victims guaranteed) per day. I'm currently writing an eBook on it =)!

YouTube works completely fine.

A guy I know got thousands of victims on RAT because of a Windows 7 Activator.

But sure, uTorrent is a brilliant way aswell.
