Ok this is my fool proof way to easy spread your RAT or keylogger using a .scr file type on sites like Omegle Chat!!!

If you join a chat and the pedo doesn't go ASL then he probably is normal and doesn't want to have sweet cyber smex (if they do go to my How to rip off pedos guide

<https://hackforums.net/showthread.php?tid=306554>)

SO DONT FRET IF THERE NOT H0RNZY! there is still away to get his sweet interwebz passes :D

OK so first things first...who are you? And how do you act?

so you are a perky 17 year old girl from Shaw University: Dept of Visual and Performing Art(A art college) or [insert art college name here]

After conversation for a few minutes tell your non-horny friend that you in college for art at [insert art collage]

Tell him that you want to draw a sketch of his face, or something your flabby dick friend picks

Say its a project for your class and ask him some educated questions.

Tell him that you use a advance sketching program like [insert photoshop like program here]

If he doesn't send you a pic, ask him for his features (unless he picks like fucking chewbacca or something for you to draw)

-skin completion

-type of hair

-hair colo

-hair length

-facial structures

-ect

pause between these to make it seem as through you are really trying to dray this man (or a hairy co-pilot of the millennium falcon)

After some time tell him you are done and tell one of these things

A- [insert sketching program here] saves things in a HD format

or

B- do you have paint? because this is a paint type of format and will open in it.

C- Simple tell them its a art document

Send link to your virus [Fuck'nViruslol.scr] (Use mediafire, or a ftp since others take to long...or just use share_cash?(JK)

You are done congratulations!!

--

Or a whole other approach is when you start a omegle chat say

My collage class is doing a project where we draw random peoples pictures ,Would you like to participate?

then use above techniques ^

Well thats my guide hope you all like it don't forget to say thanks

Bye Y'all !!!!

Dr. Hobo - March 30, 2010, 3:49 pm

Haha that is actually pretty nice method
:D

Pretty neat but you could done it faster with a good torrent
(it wouldn't be 2 hours couse you need to upload and get it going)
so yours are nice :D

I really didn't want to bump this but... how do you convert your bin to a .scr? Willing to give this a shot if i get some help :) Nice guide though.

EDIT: Googled. Solved :/ Can't believe it's that easy.

RANDOWN - June 1, 2010, 1:20 am

Wow what a nice method !

Thanks mate, Cheers
