Thread: [Secret Service...?](#)

Okay, either this is a coincidence or I'm tripping the fuck out, but I constantly see a few members (Like a small group of them) posting replies as if a staff member/mentor would, then the thread closes...

Coincidence? I think not.

Why would the mentors respond if there is already an ample response when they can just close the thread? They are just saving time.

No, I'm not a secret service. But I can be, if recruited.

If the last poster has answered OP's question, then instead of wasting time and writing same reply, we just close the threads. o_o.
