Thread: [About Tibit's Skype + My Skype HACKED!!! \[DO NOT DEAL WITH ME OVER SKYPE\]](#)

**#Skyline** - April 23, 2013, 2:25 am

Different discussion materializing from this thread:  
<https://hackforums.net/showthread.php?tid=3430782>

I did not hack tibits Skype.  
He is creating drama, and more drama.  
And unfortunately my Skype has been hacked..  
I'm on my phone, and I just realised. It isn't a big thread, will update more.

Do not deal with me on Skype.  
Skype name: phishing4u

I know who is behind this.

I'll do using HF only for deals. Do not deal with me.

**DeltaGrinch** - April 23, 2013, 2:28 am

I trust you :3 well that sucks your Skype got hacked.

**Monkey D. Dragon.** - April 23, 2013, 2:33 am

Dang they used that method where you have 3 friends and guessed them too recovery.

**#Skyline** - April 23, 2013, 2:47 am

Payback is going to be a bitch for the user who did this. And I know who.

**DeltaGrinch** - April 23, 2013, 3:08 am

Do it :3. If you have successfully done it please tell us the story on how you are gonna do the payback :3.

**Nyonic** - April 23, 2013, 5:19 am

Skype needs to fix their support. Apparently its easy to se then

**Wonders** - April 23, 2013, 5:20 am

Thanks for the heads up, sucks to see your Skype has been taken.

**blem** - April 23, 2013, 6:02 am

How about you man up and call the person out on it?

**Im gone brah** - April 23, 2013, 6:11 am

Think we should start using only PM for deals.

I had to do that as well, only have 9 people on mine though :(

A lot better than having 800+ contacts anyway. When I recovered my skype, all I had to know were 5 contacts on my skype account, it was too easy to get my account back.

Also, Skyline, if you didn't do it then who did? Because you were obviously in a chat with the person who did if you didn't. Also, with the personal attacks through my skype, grammar used, excessive use of "cunt" in the chats, and tweeting me some of my chats within the first few minutes of my account being jacked, along with you threatening me earlier, I think it's quite clear you either did it or were heavily involved with the person who did it.

Regardless, I won't be using skype for deals anymore. I'm deleting my current skype and only using my private one to talk to friends.

**SIM-187587** - April 23, 2013, 6:46 am

The simple measure is to alert skype that their system is flawed. Personally I would do it just to be safe and sure that everyone in the long run doesn't get affected. Regardless of who is to blame we must ask ourselves is skype really that safe? In terms of security I wouldn't use skype to perform sales let alone trust it for anyone I know personally. If you're affected again please report the issue to skype themselves. Refrain from starting a witch hunt it's a plague in communities and provides no actual proper result. Long live dictatorships!

**Cryptic™** - April 23, 2013, 7:13 am

Skyline's Skype is not really hacked.

He was just talking to me from it.

The kid calls him self a hacker, and blames me when his Site's IP got null routed ( I was hosting it ).

He does not realize how easy it is to get a websites real IP from Cloudflare with just a 5Gbps attack.

[img]http://d.pr/i/sq7Q+[/img]

Anyways,

Since the guy is being such an asshole towards me, even though I have done nothing wrong.

I have wiped his server.

You wiped his server for the reason: Being a dick

I would suggest absolutely no one purchasing hosting from this individual

His website was getting DDOS attacks for the past few hours anyways. Ranging from 10 - 15 Gbit/s.

I would terminate him regardless.

No host would provide hosting to a website that gets constantly DDOSSED.

And he already had backups of his sites from before the IP got null routed.

Please do not talk shit without knowing all the facts.

Thanks for understanding, this whole situation between Empire and Legion is not the whole group vs another whole group. It's basically a few Empire members vs. a few Legion members.

Same goes for the Empire, which is why I left the group already before anyone trying to say its an Empire vs Legion drama, though mr #skyline clearly stated "Empire will fall and legion will be there".

Yes, you're 100% right.

But still, everyone should stop drama, however those who are involved should stop posting threads like this one on HackForums, and just go to discuss in REAL LIFE, like adults.

More importantly, they should just sit down like adults and discuss their problems with each other. Or if they wouldn't prefer to do that, they can private message and keep from posting threads regarding this all the time.

Happy to see I'm not alone who think that all this drama has no points and this is just pissing me off.

There are loads of more secure chat programs out there.

Why not just stick to the HF PM system?

They can't use the HF PM system - If you read the chat log all of them are breaking HF rules, they wouldn't want onsite proof of that.

Alright, lets agree for a moment that Skyline broke a few rules. Isn't really something shocking right?

But to face the truth about JD, in those Skype Chats, that's real shocking.

Even when you say "Should of" is not the same as "Do it", it's not the behaviour expected from an admin on HF.

These Skype chats are only from like the past week, God knows what else has been going on behind the scene.

Majority of which are assumptions, the little bit of logs provided don't show anything all that bad. Nothing that majority of the staff and mentors here haven't said something similar. I'd bet you money every staff member has said they dislike someone here or on skype and most have probably requested to DDoS people. Hell, several staff have accounts on my booter.

What's in this is worse than the logs with JD:

Actually, what's disrespectful is when people are constantly relating their opinions of the entire Empire usergroup to a single person or small coalition of individuals. I could give at least 3 instances in the past week that people have talked down upon me simply because I wear the Empire usergroup; with pride, might I add.

Well unlike some of the people on this forum, I will speak my mind, and I don't care who in the hell disagrees with it. The point of a forum is to SPEAK YOUR MIND. If you have issues with that and view it as "disrespectful", then that is your problem; however, the difference between my opinion and that of some of the people whom have posted in this thread is that I don't base my thoughts on opinionated trivialities, I base them off of facts.

Relating their opinions of an entire Empire usergroup? What? You mean people are basing their opinions of Empire on what they see in a few members? I have nothing against the Empire, atleast I didn't. Now that I see a majority of their major members and leaders are corrupt rude rep whores. I don't know how you can wear it with pride anymore.

The point of this forum isn't to speak your mind. This isn't a philosophy forum. The point of this forum is to discuss hacking. If you talk down to other members, I do have a problem.

If you'd like my opinion, it's this: The drama is going to end with the ban-hammer on at least 1-2 people no matter what we say, and our opinions will not influence those of the administrators, who ultimately are the deciding factor. Threads such as these are just for accumulating more drama, and honestly, it deserves to just be closed right now.

However, I must tell you that this forum is far from only hacking at this point. Do you realize how many non-hacking related threads/posts there are in relation to the amount of hacking related threads/posts? Why do you think there is a single "Hacking" tab. This forum has evolved from what it once was.

You can just make a Steam account and use it for communication. It also has a chat and comments and stuff. If you care so much about popularity why don't you use Facebook then? It's actually secure and it has an in built chat system.

DO NOT use Steam, Facebook, Skype, or anything else like those. Stick to private XMPP servers and TORchat. Hell, code a simple script to communicate with your friend, connect through a decent proxy chain or TOR circuit and run each end of the script on a rooted box. I've had chat relays for years that way.

Honestly I think this thread is a waste of time.

Mad was banned (& not even repfucked, like the other dude was) & I think that's all the "action" y'all are gonna see.

All those screenies mean nothing cos everyone involved will say "prove it was me".

It's as someone said yesterday, Tibit is proving he runs Hf. Well, no. This thread was made to alert the community even though the proper prefix was not used. From your statements above, you seem to only grasp a very small amount of the actual situation. Wait another 15 hours or so. Wait and see.

All proof was off-site when it came to Vinnie's ban, and it was a biased ban considering if you read the logs, JD said he wanted Vinnie gone.

So, in that case, considering both JD and Mad broke site policy (off site) would that not mean they should be banned too?

Actually I can not confirm the validity of those logs. I am not logged into either of their skype accounts, with both of them being jacked anyway and posts from Codevade admitting so, I don't believe any of those logs unless mad or Bugga tell me themselves. With all the involved skypes being stolen last night and throughout the last two days along with logs just now coming out it could easily be manipulated.

So if those logs are legit these must be as well, showing Skyline admitting to stealing my skype:

[img]<http://img201.imageshack.us/img201/1056/cff1159107504b73ab4c41f.png>[/img]

Or it could be those that jacked our skype's setting him up to take the blame for it rather than the one(s) that actually took the skypes.

With all the involved skypes being stolen last night and throughout the last two days along with logs just now coming out it could easily be manipulated.

So if those logs are legit these must be as well, showing Skyline admitting to stealing my skype:

The real problem now is that all these accounts are contaminated. It is impossible to trust any chat logs from here on out.

That being said, I haven't seen a single log so far I can refute and only 1 out of all of them I can absolutely confirm is 100% real.

Where will this end though? When will we reach the point when this has gone far enough?

Regardless of the goals, flawed ideals and skewed logic. Personal information is now being posted publicly. These posts transcend HF. Once they are out they cannot be taken back.

I can completely understand that these logs made it this far, although I sincerely disagree with the methods used to obtain them, my issue is not with what's been posted. My issue is where this is going. Not tomorrow, not next week. In a year from now when we look back at all the logs that makes it into the public domain and the aftermath of this entire ordeal, will it still be worth it?

Will it be worth ruining so many people's actual lives? I'm not referring to profiles here or even HF, I'm referring to the actual people and their real lives?

I care little for the profiles on this forum, but there are genuine people behind some profiles here. People that I am proud to call friends.

I will defend bugga on a personal level until the end of time. Anyone who disagrees has the misfortune of knowing her profile and not her person. I wouldn't say we are close, we are continents apart. But we are friends.

This isn't about the logs that deal with HF drama. This is a forum and pixels shouldn't dominate anyone's life to the point where we end up with this sort of drama that has very real personal implications.

HF is a hobby to me. At this stage with all this going on, it's about as much fun as collecting stamps.

From our earlier conversation I gather that you are after a personal victory here. Have your war and fight until the end if you must. When the logs of 5 people are public? Or 20? Or 50?

I'm not here to defend one person, I'm here to defend the 20 or the 50 or the 100. That being said, it doesn't sound like that would be the case here.

I can completely understand that these logs made it this far, although I sincerely disagree with the methods used to obtain them, my issue is not with what's been posted. My issue is where this is going. Not tomorrow, not next week. In a year from now when we look back at all the logs that makes it into the public domain and the aftermath of this entire ordeal, will it still be worth it?

Will it be worth ruining so many people's actual lives? I'm not referring to profiles here or even HF, I'm referring to the actual people and their real lives?

That is one of the few posts in this thread that actually has any significance.

They do not care what possible consequences may come of this, I used that skype for far more important stuff than HF, gladly, I have other ways to contact those people and am glad it didn't interfere with those people. The people involved in the drama have no morals and are on a witch hunt. Proof or no proof, they'll cause drama, if there isn't enough proof to support their point of view, they'll create "proof" since they have all the skype accounts involved under their control anyway.

They think it's trying to out some sort of corruption on HF, but also go along posting dox's on pastebin, carding items to us, asking for people to swat us, and more. Yet, one thing I will make sure of, is we will not stoop to their level. This is HF drama and will keep it solely based on HF, not attacking the actual people like they have been doing.

There have already been two police officers to my house today from a false report someone made to my local police station. This is starting to get way out of hand. Most people don't realize they are trying to do more than just attack people on a forum, they are attacking real people in their real lives.

They are acting on impulse, not actually thinking that what they are doing off-site could possibly harm real people and their lives.

Stop? No, I cannot stop it. It is not within my power to do so. That being said, I do not think the people responsible in this case are completely malicious. What has been leaked is leaked. If my intervention can save but one person's details from going public, regardless of who's it is or if I've ever spoken to them, that is a minor victory that I would gladly take.

This intervention is something I would have appreciated if roles were reversed and it was my details that might end up in public.

Well they wanted Vinnie gone, that already happened. As you can read in the Skype Chats.

Then they started to DDoS teamspeak servers + Illuminati & Legion Stresser. Admitted on HF + JD's approval.

Also in the Skype chats there is Bugga who is instructing members to DDoS HF members offline. I am talking about Kray and Phobix (Phobix was instructed by JD).

There's also this one where Mad is ban evading + Tibit assisting the ban evaders:

And as a last thing; Bugga made up lies about how Vinnie DDoSed members/HF over Tinychat, which can be found here:

2. I never assisted mad in ban evading.  
3. Bugga didn't ddos anyone.  
4. Phobix even said so himself that he was not hit.  
5. Wow, they say a site is up or someone should do something or say even that they don't like someone, doesn't mean they are breaking any HF rules.

Anyway, as all of our skype accounts have been being passed around so much over the last couple of days I wouldn't doubt that those involved haven't added new logs they themselves created.

Especially when skype doesn't store 1v1 conversations client side, only group chats, skype's site even says that. An example of that can be that when I got my skype account back I wasn't able to see the messages sent from the person that jacked it initially even though I recovered it within 30 minutes the first time. It's been jacked several times since and more people are trying at the moment.

You are on a witch hunt and acting as if all of this is set in stone and we did every action mentioned in those easily faked logs due to all the accounts being jacked by one group of people for the last 2 days. None of those rules were actually broken except for the two sites getting hit which mad was banned for already. The rest is all speculation and assumptions.

To comment on Vinnie's ban, no, I don't know the full reasoning behind his ban, I posted a video someone sent me of him trying to root a server and called him a noob on it. Other than that I didn't even mention him in the original logs. What he was banned for is not my concern as I wasn't even the one who reported him, I didn't know about his ban until 1-2 hours after he was banned. Although, I know JD well enough to know he never takes action on-site unless he has plenty of proof to back it up.

5. Wow, they say a site is up or someone should do something or say even that they don't like someone, doesn't mean they are breaking any HF rules.

Anyway, as all of our skype accounts have been being passed around so much over the last couple of days I wouldn't doubt that those involved haven't added new logs they themselves created. Especially when skype doesn't store 1v1 conversations client side, only group chats, skype's site even says that. An example of that can be that when I got my skype account back I wasn't able to see the messages sent from the person that jacked it initially even though I recovered it within 30 minutes the first time. It's been jacked several times since and more people are trying at the moment.

You are on a witch hunt and acting as if all of this is set in stone and we did every action mentioned in those easily faked logs due to all the accounts being jacked by one group of people for the last 2

days. None of those rules were actually broken except for the two sites getting hit which mad was banned for already. The rest is all speculation and assumptions.

To comment on Vinnie's ban, no, I don't know the full reasoning behind his ban, I posted a video someone sent me of him trying to root a server and called him a noob on it. Other than that I didn't even mention him in the original logs. What he was banned for is not my concern as I wasn't even the one who reported him, I didn't know about his ban until 1-2 hours after he was banned. Although, I know JD well enough to know he never takes action on-site unless he has plenty of proof to back it up.

You'll find that Judge Dredd was fine with Mad DDosing Illuminati/Legion stresser as he did not take any action or even warn Mad for a week until it all came to light. The reason why Mad was banned was to take the fall instead of JD: there was already too much hype on it.

Quote:-Ban evader assisting; By Tibit (assisting Mad)

This is pure speculation. I have a log that says I'm married. Doesn't make it true. Does anyone have a shred of evidence to prove this?

Quote:-bugga DDoSing HF members, such as Kray.

I'm sure this isn't true, can we get Kray's input? I'm sure he is around? If it is, can he make a separate thread dealing just with this?

JD has had an opinion, I don't see a single thing he approved of officially, if I'm wrong, please feel free to point it out. Are we holding freedom of speech against people in our pursuit of "justice"?

If someone could answer those honestly, I'll carry on from there.

Can anyone link me to the new account and/or a post from it?

This is pure speculation. I have a log that says I'm married. Doesn't make it true. Does anyone have a shred of evidence to prove this?

I'm sure this isn't true, can we get Kray's input? I'm sure he is around? If it is, can he make a separate thread dealing just with this?

JD has had an opinion, I don't see a single thing he approved of officially, if I'm wrong, please feel free to point it out. Are we holding freedom of speech against people in our pursuit of "justice"?

If someone could answer those honestly, I'll carry on from there.

I'm not here to defend people who have done the wrong thing, but now each reply is escalating from the previous one. At this rate things will keep getting worse. I don't understand what caused this entire thread to spark up the way it did? Are these seriously the accusations being used to justify the events that have transpired here? Have we fallen so far?

Input: I don't know why on the 22nd Bugga would be having mad ddos (definitely my IP in the log), unless thats a time difference problem. It makes sense that she saw my IP when she resolved tibit's Skype, than told mad to DDoS it. (Tibit had me rehack his account), but if I am wrong about it just being a time difference, I know bugga hates me, but nothing happened specifically on the 22nd that would trigger her to want to DDoS me. Lets keep the drama to a minimum.

I'm unbanned from that stupid ban and reason, my name has been disgraced and now I'm known as a member who DDoS & swats members, shame on the people involved I hope you get whatever you have coming your way.

Disgraceful & deceitful members.

I'll clear my name shortly.

I never actually got hit off(I fell asleep like 20 minutes after I resecured tibits' account though), all I said was that I noticed in those logs that was my IP (I know what my IP looks like).

Glad you're back. You never deserved any of that. At least there are still some honest members still lurking.

Looks like a certain banned member who used to have a blackhat award has been having some fun.

There's a lot of biased opinions here; very few facts. Anything to support half the things people here are saying?

I'm not supporting anyone 'till there is substantial evidence.

**Golden Rule** - April 24, 2013, 3:15 pm

Can some1 update me on what logs were released besides the chat with mad, tibit, and JD.

Just like... this, maybe ?

Spoiler [\(Click to View\)](#)

This really looks like assisting a ban evader. At least to me.

Just read the thread, everything has already been discussed and posted.

Just woke up and this is still going? Surely we can just resolve the jacked skypes and match them up with the time that these logs were produced?

If you resolve tibit's skype, my IP will show up, because I was asked to jack it back for him by him.

Well then there's no need for you to spread bullshit about the logs possibly being fake.

Haha pretty comfortable just announcing that are we?

Anyways this situation has been carried on for so long. But, there are a few interesting revelations coming to light because of it. So carry on.

I actually never said anything about the logs being fake. I said that it would be hard to verify whether or not they're fake or real, but IMHO they're completely real.

I warned you earlier that your logical reasoning behind a removal of service wasn't correct and you would be exposed as so.

Sure your idea of removing due to an overload of traffic is reasonable however you didn't cleverly say that, instead you said that skyline was basically a douche and you wouldn't continue doing business with him due to the sheer fact that his attitude was not par with your opinionated view. Sounds to me like you're trying to dictate which isn't always a good thing in terms of the customers status. As I've stated I wouldn't trust your hosting due to the fact that your statements were overly shady.

In summary don't do business based on feelings do it based on facts otherwise you're just a plagued cesspool lol..

He already caused enough damage to me in b/w costs and got an IP null routed, which cost more than the \$9 he paid.

&

I only said that because I would not allow him to continue doing business with me in the future, and was not acting in a civil manner like how business should be done (Just look at the skype screen shot). If he acted politely I could have made other arrangements for his site on a 10Gbit DDOS Protected network.

He was not taking responsibility for his own actions, he started all the Drama, he got people hating him, which lead to them DDOSing his site.

Yet he blamed it on me.

Sure I may not have worded that post correctly, was on my phone during that time. I accept that. I was just infuriated by the way he acted and typed stuff up quickly.

Get them back hard :c Even though you should be the smart one and just leave it..

**DARPA** - April 24, 2013, 11:27 pm

The bible lesson for today is:

"He who guards his mouth and his tongue keeps himself from calamity." Proverbs 21:23

And MY sermon for the day is:

Thusly wheneth a enemy doth attack you, do not warn them of your plans of revenge. Simply slay them without saying a word of warning. For without perceived motivation or intent thy enemy will let thy guard drop as they will be unaware of thy presence in thy first place as their ego will be their own downfall. Or as a 10 second cowboy i know once drawled - don't let your balls dangle in the wind, or you will get them grabbed....

Amen
