Thread: [\[Help\]I reported Facebook Open redirection vul but till now i did not get reply.Why?](#)

Mr.Phoenix - April 23, 2013, 10:26 am

Actually day before yesterday i have reported open redirection vulnerability to facebook.It works perfectly in all browsers.It wont prompt security measures.But the user must signed into their account Otherwise it wil give errors.We can trick the users to redirect to malicious sites while chatting by sending that url to them and also we can trick them to download our virus files via PM.I have included 14 different urls from different parameters with that.But till now i did not get any reply from them. Really i was disappointed.I am really feeling bad ?

How many days i need to wait for their response? will they reply me? Is this an valid vulnerability. Hope you guys must have experience in this..

I need a good advice from you guys :(

BottleOWater - April 23, 2013, 2:19 pm

This is in the wrong section man x)
and sorry i can't help with that :S

No !!

Its actually appears in facebook main domains and also mobile site by using Oauth.I am really dont know whether it is valid one or not ? :(

Am i going to get disappointment?? Any body here, can u plz expain me??

"The Anonymous" - April 24, 2013, 2:50 am

Can u plz teach me the method Mr.Phoenix?

Mr.Phoenix - April 24, 2013, 3:00 am

Sorry !! ?

Actually it was confidential !

I must not disclose it in public until i get reply from facebook team.
Hope atleast i will get a reply from them..Lets see what is going to happen?

jenat - April 24, 2013, 10:22 am

I think they will not respond you because they got hundreds of mails daily .You have to try other way .eg.mailing to their department or fax ? So, you can get reward .

Yeah of course !!

And also even we can trick users to download malicious files directly by sending that links to fb users via chat. But still no response :(

4 days gone :(?

Mr.Phoenix - April 30, 2013, 5:25 am

will anyone clear my doubts??

Will facebook approve open redirection Vulnerability nowadays?

InspectorGadget - April 30, 2013, 6:39 am

Do what others said, email them or fax them etc, you'll get a better response.
