Thread: [\[TuT\]How To Setup DarkComet Rat 5.3.1+Port Forwarding+Noip+FuD Crypter\[TuT\]HQ](#)

Beowolf - April 23, 2013, 12:04 pm

Hello HF,

Welcome to my tutorial on how to setup darkcomet rat 5.3.1.

Things you will need:-

Darkcomet rat 5.3.1:-get it [here](#)

SimplePortforwarding tool(optional):-get it [here](#)

No-ip duc:-get it [here](#)

So,once you've got these tools we can get started...

I'm goona explain this tutorial in 3 parts:-

1)Setting up No-ip Duc

2)Setting up Darkcomet rat

3)How to portforward

PART 1:-SETTING UP NOIP DUC

Go to noip.com and click on "sign up" and enter all the necessary details

[img]http://img545.imageshack.us/img545/4504/screenshot1wv.png[/img]

And click sign up.

after you've logged in you'll see a screen similar to this:-

[img]http://img4.imageshack.us/img4/7976/screenhunter06apr231141.jpg[/img]

After you clicked on "add a host" again you you get a screen,then click on "add a host"

Then you will get a page like this:-

[img]http://img715.imageshack.us/img715/1515/screenhunter10apr231154.jpg[/img]

Now click on update host!

After that install the noip Duc client at the beginning of this thread.

Then open it and login with your username and password.

[img]http://img33.imageshack.us/img33/8049/screenhunter13apr231200.jpg[/img]

After that you will get a screen like this

[img]http://img545.imageshack.us/img545/2517/screenhunter14apr231203.jpg[/img]

Congrats!you have successfully setup the DNS client...

Part 2:-SETTING UP DARCOMET RAT

Extract Darkcomet.rar to a new folder and open Darkcomet.exe

(Make sure you turn your antivirus off so that it doesn't delete it)

Now go to the column socket/net and right click and select "Add port to listen"

[img]http://imageshack.us/a/img521/486/screenhunter17apr231212.jpg[/img]

After that click on "Darkcomet rat" on the top left coner of the screen and click on server module

You will get a screen like this:-

[img]http://imageshack.us/a/img4/7086/screenhunter15apr231212.jpg[/img]

Then click on minimalist(quick) and fill the boxes following the image

[img]http://imageshack.us/a/img19/569/screenhunter16apr231212.jpg[/img]

Then click on "Normal and a box will pop up like this

[img]http://imageshack.us/a/img94/8826/screenhunter20apr231216.jpg[/img]

Name it as anything and save it anywhere you want.

cheers!

you have successfully setup DarkcometRat!

Part 3:-HOW TO PORTFORWARD

Portforwarding is not so tough job.

1)Open you cmd and type IPCONFIG,you will get something like this:-

[img]http://imageshack.us/a/img33/7893/screenhunter22apr231230.jpg[/img]

2)Now note your default gateway and type it in the browser,you will get a screen like this:-

[img]http://imageshack.us/a/img42/6194/screenhunter23apr231233.jpg[/img]

The default username is "admin: and password is "password" (if it's wrong see at the back of your router)

3)Then you will be logged into your router

4)Go to port forwarding settings tab,you will get something like this:-

[img]http://imageshack.us/a/img843/6885/screenhunter24apr231236.jpg[/img]

5)the start port number and the end port number should be 200

6)Then the local ip address is the top one you got from cmd,type it there.

click on save!

Now go to www.canyouseeme.com and type in 200 near the port.

you should see "I can see service at port 200 on yur computer" if you success.

and if you fail you will get "i couldn't find service on port 200".

Congrats!

you have successfully port forwarded your router!

Before you start spreading download the aegis crypter and encrypt it:-get it [here](#)

[img]http://img17.imageshack.us/img17/1275/screenhunter29apr231337.jpg[/img]

Now start spreading your server and have fun... ;)

if you have a doubt post a reply!

If you liked the tutorial say thanks!

??

The Sailor ? - April 23, 2013, 12:04 pm

Thanks alot for sharing, have to try this out later :-)"

Extra cool with all those pictures!

Makes it a lot more easier to understand.

--Alexander-- - April 23, 2013, 12:11 pm

Thanks alot this will be help full for beginners

juni103 - April 23, 2013, 3:47 pm

thank for that for work i would like to do for this form

g3r4ld2 - April 23, 2013, 3:48 pm

Very easy to use! Good tutorial! 9/10

Beowolf - April 23, 2013, 6:53 pm

Thanx for the response guys,i've tried to make this as newb friendly as possible.

If you guys still have any doubts feel free to ask.

:)

gilololol - May 7, 2013, 5:33 am

I can't use the IP I got from cmd in creating a new virtual server. And www.canyouseeme.com

redirects me to another site.

Thanks. Finally got it to work. This is a very good tutorial.

Th3 J0k3r - May 7, 2013, 5:54 am

(May 7, 2013 05:33 AM)gilololol Wrote: [\[CITE\]](#) I can't use the IP I got from cmd in creating a new virtual server. And www.canyouseeme.com redirects me to another site.

Thanks. Finally got it to work. This is a very good tutorial.Its canyouseeme.org not .com lol try that

tonyreigns - May 7, 2013, 6:51 pm

Nice tutorial, AegisCrypter isn't the best but I guess it's okay for a free crypter.

Manyscam - May 7, 2013, 11:09 pm

Will have a crack when I get home, good tut.

jamesbob - May 8, 2013, 12:41 am

Also very nice tut on Dark Comet. Very helpful for beginners

gilololol - May 8, 2013, 2:14 am

(May 7, 2013 05:54 AM)Assassins Creed Wrote: [\[CITE\]](#) Its canyouseeme.org not .com lol try that! also found out that it was supposed to be .org =)) But thanks anyway. I am pretty new here so all kinds of help that I receive are greatly appreciated. :)

Jeryab - May 8, 2013, 2:26 am

the link to download crypter is died, fix it please

marcusx - May 8, 2013, 5:29 am

your version of aegis crypter is not FUD :/

Thanks for tutorial :)

StarCraft 2 - May 8, 2013, 5:42 am

Can somone help me with Portforward because I dont know how to do it on Belkin router.
thanks

nemesisobaara - May 8, 2013, 6:17 am

wot abt those that dnt use a router? How do we portforward?

gilololol - May 8, 2013, 6:19 am

Will there still be connection when either I or the computer I infected restart?

TheDarkComet - May 8, 2013, 12:02 pm

Not a bad tutorial but aegis can't make your file FUD anymore cause some skids have vscanned on virustotal

ravensfan123 - May 8, 2013, 1:24 pm

what do you have to do to your slave

Arachnovision - May 8, 2013, 4:03 pm

What to do when it says "I could not see your service.."?

royalhax - May 8, 2013, 5:44 pm

Great tutorial ! Thanks and its great for beginners !

Debasish40 - May 9, 2013, 4:34 am

I want to use rat.. Bt i dont have router.. Can i set up and use fully control rat without having a router?

Plz major question 4 me .. Im a complete beginner.. Plz ans me in pm.. Plz frndz.. Thanx..

ozzman - May 9, 2013, 11:07 am

VPN with portforwarding should do it :p

P3terParker - May 10, 2013, 3:16 pm

Very detailed guide thank you I was having trouble opening the port. I had to change the DUC to link to a specific port because it was grabbing an external ip with remote finding.

gilololol - May 11, 2013, 3:54 am

Can you please help me? I got it to work one time but after that I was not able to make it work again.
:((((

It works if I put 127.0.0.1 in the IP/DNS box and run the server on my computer. But when I tried to put my no-ip address it doesn't work even if I run it from my own computer. :((

morket - May 16, 2013, 9:02 am

This is one great tutorial, thanks! Well done

eftapsixos - May 16, 2013, 12:31 pm

hey all got 1-2 questions im new to this btw...i managed to create the rat and run it on my own pc and on a friend's pc and it worked..

the question is,if i restart my pc and run darkcomet i cant see my friend on the list...how does this work he has to run the rat every time??and if not why i dont see him??

Another thing,how do i delete it from my friend's system-my own pc??

thx in advance nice work with the tut btw..

TheAlpha - May 19, 2013, 12:38 am

Great, thank you for making this so easy to follow.

xXxKingOfChaosxXx - June 24, 2013, 10:03 am

Thanks, I just started Ratting... well now. And this helped out great.

MOBamattie - June 28, 2013, 8:00 am

it gave me nothing[when i opened my virus].Whats to problem?

i pfed well, on port 200.

got no-ip. working all 3 green flash thingies.

please help me pm me back

Pyramid - June 28, 2013, 8:24 am

Overall, a great and detailed tutorial, may want to replace the crypter link.

Beowolf - February 15, 2015, 1:03 am

Aegis Crypter Latest Link Update:->>[DOWNLOAD HERE](#)<<

dadada12 - February 22, 2015, 5:07 am

Thanks man, now i know what to do, Great tutorial :)

Beowolf - February 22, 2015, 7:04 am

Glad it helped you,I covered each and every bit so that no one faces the difficulty and the time it took me to setup darkcomet when I had it set up! :)

uglykidjoes - February 22, 2015, 7:13 am

nice tutorial and well explained thanks for that it was a excellent read

Fallen raptor - February 22, 2015, 12:52 pm

Great tut, Just hopefully I will crypt my stub and everything will go ok.

Beowolf - February 22, 2015, 12:57 pm

Aegis Crypter Link Update 2:- [>>>CLICK HERE<<<](#) ???????

I got the same problem, I tried on a friend's computer too

Crescice - February 22, 2015, 5:39 pm

Great tutorial, VERY easy to set-up and kudos for adding a free crypter aswell. VOUCH!

littletat - February 23, 2015, 4:39 am

This may be a stupid question but I am on a laptop must I be connected to my router by ethernet cord to do this correctly?

Beowolf - February 23, 2015, 4:59 am

(Feb 23, 2015 05:39 AM)littletat Wrote: [\[CITE\]](#) This may be a stupid question but I am on a laptop must I be connected to my router by ethernet cord to do this correctly?No need of that! :)

It's okay even if you are connected with wifi you can access the router even with wifi! ?

(Feb 22, 2015 03:34 PM)Tehshift Wrote: [\[CITE\]](#) I got the same problem, I tried on a friend's computer tooCheck with your antivirus if it's deleting your server and also your firewall settings.If they're both fine then check if u made a mistake!

Nalgun - March 2, 2015, 9:16 am

Awesome tutorial, thank you very much, works fine

Beowolf - March 3, 2015, 4:48 am

Post here if you have a problem! :)

WaxNGames - March 3, 2015, 5:34 pm

Awesome tut OP!

Thanks for this definitely doing this later

Belle400 - March 4, 2015, 1:48 pm

I searched this for A long time, really Thank man, I needed this! :-)

Beowolf - March 8, 2015, 8:40 am

(Mar 4, 2015 02:48 PM)Belle400 Wrote: [\[CITE\]](#) I searched this for A long time, really Thank man, I needed this! :-)Happy you found what you wanted! ?

Memberis - March 8, 2015, 10:33 am

Do not download and open Dark Comet from this thread!!!

It itself is containing a RAT. The file messed with my Task Manager, it was really hard to shut down.

BE CAREFUL GUYS!

Winterjet - March 8, 2015, 12:08 pm

NO-IP is still safe to use since Microsoft takedowns?

Beowolf - March 9, 2015, 7:16 am

(Mar 8, 2015 10:33 AM)Memberis Wrote: [\[CITE\]](#) Do not download and open Dark Comet from this thread!!!

jitu_143k - May 20, 2015, 12:12 pm

mate he is not there on skype and does not have any other way of communicating because i have just created an account on HF and it won't allow me to PM anyone.. How do i buy his services .. ?? and yes will he make a FUD Crypt ?? i am new so i have just a little knowledge that even if u get a FUD Crypt antiviruses can detect it after some time.. ? can u lemme know how long does that FUD crypt work,, ? ?

Beowolf - May 21, 2015, 8:10 am

(May 20, 2015 12:12 PM)jitu_143k Wrote: [\[CITE\]](#) mate he is not there on skype and does not have any other way of communicating because i have just created an account on HF and it won't allow me to PM anyone.. How do i buy his services .. ??

and yes will he make a FUD Crypt ?? i am new so i have just a little knowledge that even if u get a FUD Crypt antiviruses can detect it after some time.. ? can u lemme know how long does that FUD crypt work,, ? ? Then pm him after making enough posts, there are normally multiple payment methods like bitcoin or paypal or any other way just ask him and yeah looks like he will fud it for you and no one can tell how long a fud can work, it depends on how skids the users are :P

jameswatt17 - May 21, 2015, 8:15 am

good work, aegis crypter is really not fud, too many detections. sometimes its better to spend funds on good crypter and enjoy good result instead of free stuffs and get yourself infected

Beowolf - May 21, 2015, 8:20 am

(May 21, 2015 08:15 AM)jameswatt17 Wrote: [\[CITE\]](#) good work, aegis crypter is really not fud, too many detections. sometimes its better to spend funds on good crypter and enjoy good result instead of free stuffs and get yourself infected Yes, but it's better among the free ones and also it's for people who can't spend money even 'sometimes' or can't pay online for some reason.

greencyberlink - June 16, 2015, 3:35 am

wonderful tutorial very explanatory and understandable thank you very much

is0t0pe - June 16, 2015, 4:19 pm

Great share, helped out a lot thank you!

supratux - June 17, 2015, 4:08 am

great tutorial , will try this out! :)

is0t0pe - June 17, 2015, 4:31 am

Fantastic tutorial, will be referring to it very soon.

Talu - June 17, 2015, 9:38 am

Pretty old tutorial, but I guess it could still be helpful. Thanks.

gundamwinger - June 17, 2015, 5:46 pm

This should work. Thx for the tut op.

As I remember I ever tried, and works

geroben - June 18, 2015, 5:29 am

Nice tutorial, thanks my friend :)

Bigstevo - June 18, 2015, 11:06 am

cant get my NO-ip to ever work lol, shits broken

Mariowilsonup - June 18, 2015, 12:01 pm

(May 19, 2015 04:28 AM)Beowolf Wrote: [\[CITE\]](#) Try a vpn which supports portforwarding like proxpn(free)

what I have heard so far:

proxpn does not have portforwarding features in the free version. You must pay monthly in order to get the ability to portforward with this vpn.

L33TV13W3R - July 31, 2018, 1:15 pm

Thanks alot for sharing will try this out later

98358533 - September 12, 2018, 12:07 pm
