Judge Dredd was a good movie, I haven't watched it in a couple of years though so I might go and put it on download. Most of Sylvester Stallone's movies are good!

Yeah,you know that you have newer version from this year!They where doing 3D and i'm not sure but maybe they made something different!

I'm gonna download this new version.I want to see difference!

I didn't really like the newest version, This may sound weird but it was way to bloodthirsty. Imagine a Rambo times 10 for blood and gore. To constant and to frequent + no storyline

Well it's an action movie!I like in action movies blood and action!This movie is good to me because it talks about justice and is a SF also!I like SF action movies!The new Star Trek "into the darknes" that os coming up this year will be fantastic i think!
