Thread: [\[Preview\] Redemption Theme](#)

?eumonic - April 25, 2013, 10:13 pm

So, I have been "gone" for a while. And I say "gone" simply because I was banned. Now, that didn't stop me from contributing to HF as much as I could, but it ultimately meant that I was to get caught again and banned, for a third time. I have had 3 accounts on HackForums, all of which have been fixed and merged, so no more multi-accounting; but before I left, I had built up some form of reputation as a theme maker. I carried it on after my ban through "Virtuous," and even further through "Recuperare." But, now I have my original account back and figured that I should come back with some sort of bang; so I present you with my newest theme (which WILL be out and released tomorrow [maybe even tonight]), REDEMPTION.

EDIT: I've decided that since people seem to be doubting that my talents still exist and I am being considered a copy-cat and a fake, I would redesign this theme COMPLETELY.

NOTHING about this should resemble ANY theme shown so far, and I insist that people try to accuse me of such heinous accusations.

Things to note about the theme:Will come in both C# and VB.net "flavors"

Any control with color options will follow the main form color

Has options to disable every control (and reflect it in the display; many themes don't do this)

Has icon support for almost all controls (Button, ListBox, GroupBox, Form, etc.)

Completely open to color changes (based on Main Accent Color)

Controls Shown:Main Form (& Control Box)

TextBox

Custom Label (just a little touch)

Button

Screenshot:

FINAL VERSION:

Older versions [\(Click to View\)](#)

This WILL be released tomorrow. I just wanted to preview this so everyone would know I was back on HF.

Enjoy!

Tab Control is a complete Rip
... So are the buttons
The TextBox look like a tacky rip
Groupbox shape and delimiter are exactly the same, gradient varies slightly

Dude, I'm glad you're back, but this "bang" is nothing more than a copy of Aeonhack's NetSeal theme...?

Yes, it does look good and it has some differences, but really, this is the second theme that looks 99% the same (yours and <https://hackforums.net/showthread.php?tid=3435226>).

I mean, I love Aeon's theme too and I understand that people use it as an inspiration, but using things as an inspiration doesn't mean the same thing as copying the design and modifying it a little. I find it sad that "respected" theme makers are copying other people's themes now too. I've seen wonderful themes from you, why this...?

Mine looks nothing like Aeon's theme, only because it has similar color scheme doesn't mean it's copied,

Nonetheless, this one DOES look like a rip-off, both mine and Aeon's themes,
It looks like a combination of both themes.

You're either blind or truly obsessed,
Because i honestly don't see any similarity aside the color scheme,

My colors are the colors of VS12 dark theme,
My Text align on the button is center, Aeon's is left,
My ControlBox is actually your idea with my changes, Aeon's is completely different,
My Radio Button is rounded with green dot, Aeon's is ellipse with white dot and small text,
My ON/OFF switch doesn't have separator, and i have completely different knob,
My TextBox doesn't have innerglow effect, while Aeon's does.

Anything else?

But i know you, from previous subjects, i know you aren't either one,
So i don't know what's going on with you lately.

simliar. just the style scheme, and well aeon is a better coder then mava.

?eumonic - April 26, 2013, 12:14 pm

Alright, so I did say that this theme had been worked on for a few days BEFORE iSynthesis did ANYTHING related to releasing his.

Let's go take a look at the proof I said I had.

Proof [\(Click to View\)](#)

There was my first post where I decided to make the application I am using the theme for..

There is the first time that I even SHOWED the theme.

There is the first time iSynthesis did anything related to his theme.

Alright, so there; that knocks iSynthesis calling me a ripper of HIS shit out of the picture..

Now on to what people assume was from Aeonhack:

Long Explanation [\(Click to View\)](#) This theme was originally done for N3oNight DAYS ago, before I even saw anything

remotely close to NetSeal's theme being done. He hadn't talked to me about anything, so I figured he went elsewhere; so I decided to release it here.

Anyone who knows how my themes work knows that almost all of my controls are subject to change before the release. Hell, look at Influence; it was a huge hit for some reason.

The second or third screenshot of it, I showed a stage one of my buttons was in, and people

accused me of stealing from others again.. By the very next shot, I had added more to that button and it looked NOTHING like what people accused me of doing before.

JUST because something of mine looks SIMILAR, does NOT mean they are the same, will stay the same, or will be even close by the time I am done.

Sorry that I seemed to have pissed EVERYONE off with my theme coming back, but if this hatred is what I get for it, I don't suppose releasing this would do any good.

If AeonHack actually released his theme and the code, then their might be some suspicious, but if you can make the same shit by yourself and release it. then thats his problem. and its clearly a big one.

the fact that people are getting angry about it, is completely childish. ZERO might of saw Aeonshacks thread as a hit. and started working on a similar-style theme.
