Thread: [How do you get 2 - 3 Character names ?](#)

Trill? - April 26, 2013, 2:52 am

I just would like to know how without using the breakaway space.
If anyone can point me in the right direction that'd be great.

Doubt it. Because I've seen "Hi", "630", "360"

Meh I want one.

Not sure how I got mine. Maybe when I signed up, 2 and 3 letter names were still allowed.

Omniscient made it that usernames under 3 characters can't be created anymore. So you can only have one if you had one before it was changed.

His is Two and his most recent change was

03-11-2013Could be something to do with registration date? Like he joined in 2011. Not sure how Omni did it. (What I mean by this, is that did Omni make it so people who signed up after the set date cannot have usernames under 4 characters, or did he make it so that people who joined before he stopped it, can still change their name now to a 2 or 3 character name if one comes available.)

His is Two and his most recent change was

03-11-2013He's using special hidden characters. People are dumb ass though for doing this as they won't get a PM send to "hi". You can only click the PM button on their post to make sure it goes to them.

HF changed username minimum character limit to 4. I even had a guy this week with 3 characters for years and didn't realize he couldn't change his name back to his well-used 3 character. Oh well.
