Thread: [\[NEW \] \[COMPILATION OF TOOLS\] #2 RAT'S KEYLOGGERS, SPYWARE ETC; \[NEW\]](#)

Beck - March 31, 2010, 6:09 pm

Hi everyone.

Since my recent compilation of hacking tools, which is [here](#), I have decided to put up a new compilation, which is compilation #2. It includes tools such as RAT's, Keylogger's, and other spyware. I'm also putting up some links to stashes of hacking tools.

RAT Collection 1 : (Includes RAT's such as Poison Ivy, Cybergate, Spy-Net, etc;)

When extracting Spy-Net, password is Spy-Net

(RAT's are Remote Administration Trojans, which are used to connect to someone and gain full access to PC)

I always get files from clean links, so you don't have to worry about anything harmful getting on your PC.

All these RAT's will be detected as backdoors or trojans because they are hacking tools, so turn off your antivirus before downloading, I guarantee you that it is NOT infected with malware at all.

Downloads :

Now, here is a big collection of tools, though RAT's here aren't included because I already put up the big pack, you can download some separately from my other collection though.

KEYLOGGERS : (RECORD KEYSTROKES)

3 Hack Packs have been added!

Each has more than 75+ tools, I think one has about 200.

schf11g - April 1, 2010, 8:57 am

Thanks for this!

BTW, in the RAT pack, Password for Spy-Net (Spt-Net) is "Spy-Net"
