I love how you have a tendency to space your punctuation marks out, just like the hacker. And your grammatical form and structure absolutely fails, just like the *hackers*.

what a coincidence.

No, cause it would be harder to ddos the website.

And he's just a skid who thinks he's the biggest hacker in the world.

Also he writes in 3rd person.

I'm not praising the hackers, Nimbuzz is a well known app between phone users and it being hacked is impressive

All i'm saying is it's funny how people here call the irani hackers skids yet they can't hack into a big websites like nimbuzz
