Making Money with your RAT Slaves

I want to post one of my RAT tutorials here and share it with the community

Many people use there BotNets for monetize them.

I want to present some of them to the newer ones at this.

What you need for this:

- RAT Slaves
- A Computer
- A Brain

The more Bots you have, the more money u can make !!!

1. Method: adf.ly

I will take adf.ly as an example:

- First make an account at adf.ly: <http://adf.ly/?id=353111> (ref link, it will not hurt you)
- Shorten a simple link like google.com and get the shortened link
- Go to your slaves and let all of them visit your adf.ly link.
- In my experince ca. 20% of all victims click on the skip button and you get paid. So if you have 1000 Bots, you get ca 200 views.
- You can do this up to 3 times a day with each slave to make even more money.

My Rating:

Money: 1/5

Difficulty: 1/5

Comment: Not good money, but you can make a few Bucks with it.

2. Method: Pay per Install (PPI)

- "Pay per Install" sites pay you a few cents for installing there programs on other computers.
- Example Site: <http://adf.ly/NuHcr>
- No go to your slaves and install this file to all of them. Best thing is to do it hidden.
- WARNING: After installing this file to your victims, they are useless for you.

My Rating:

Money: 5/5

Difficulty: 3/5

Comment: Only do it, if you want to get rid of your victims, because after installing PPI files there computer is allmost fucked up.

3. Method: Selling your Bots

- You sell a amount of your bots to other who wants to get more bots.
- To do this you get the server of the buyer and install it hidden on the amount of slaves he wants.
- You can get a good amount of money with this, a normal price for a Bot is 2 cent each or 2\$ for 100.

My rating:

Money: 4,5/5

Difficulty: 2/5

Comment: Best and easiest way to get some good money. And you make other people happy with this.

4. Method: Stealing accounts

- For this its the best to target a special kind of accounts, for example Steam Account. They have a good worth and are easy to sell.
- There are different methods to get the login data:
 - > With a keylogger, after clearing the steam password
 - > With a stealer (at the moment most stealers do not support stealing steam)
 - > With a RAT: Clearing the steam password and get him to type it in.
- After getting a few accounts, sell them and make good money.

My Rating:

Money: 5/5

Difficulty: 4/5

Comment: You need some practise, but after getting some the money comes

5. Method: Blackmail

There are a few methods you can use.

- Be direct and say to them you hacked there computer and they have to pay the amount XXX to your paypal account to let him alone.
- Say you are a FBI agent and you found him doing some illegal activities. He has to pay the amount XXX to not sue him.
- Get private details from him and blackmail him with some secret about him.

My Rating:

Money: 5/5

Difficulty: 4/5

Comment: Only do this behind a VPN to be safe, may they will phone the police or something

Homothe - April 27, 2013, 11:32 am

Not bad... I think i Will use the first or 2nd method

xWomanizer - April 27, 2013, 11:42 am

Looks great. I'll try one of these.

nCORT - August 27, 2013, 6:17 am

nice man looks awesome. I should try these tips

1001 - August 27, 2013, 6:20 am

I'm pretty sure you copied this tutorial from another member, might be wrong though.

Maxxxior - August 27, 2013, 10:07 am

You can also steal their bitcoin wallet with balance and password when you target bitcoin users. But this one is pretty hard to do :D

Xyzo - August 27, 2013, 12:31 pm

Good tutorial! But you could add more methods like Bitcoin mining ;)

Maxxxior - August 27, 2013, 1:26 pm

(Aug 27, 2013 12:31 PM)Xyzo Wrote: [\[CITE\]](#) Good tutorial! But you could add more methods like Bitcoin mining ;)

Yes, but this method is only effective when you have got a lot of slaves (thousands). When the new ASIC miners were released on the market the difficulty is all the time going up, so you will get less bitcoins from mining. But still this is a good method :)

I am thinking about another methods, why not sell DDoS services? :D

BySnakePrime - May 19, 2014, 5:52 pm

That blackmail method will scare the shit out of them xD.

FrankLucas - May 19, 2014, 6:19 pm

Radar7 - May 19, 2014, 7:43 pm

Where would one sell account information

I3lakHat - May 20, 2014, 1:27 am

LOL when you try 5 th option definitely police will arrest you.. :D
but nice info thanks.
