Thread: [\[TuT\] Setup Your First Keylogger - Adramax \[TuT\]](#)

DiamondHacking - April 27, 2013, 7:21 pm

Setup Adramax

In this tutorial you will learn about how to set up your first Adramax Keylogger.

-Download the Adramax keylogger from Internet. The antivirus may show some detections, but you can ignore that as they are only false positives.

- Setting up a drive HQ account to store you keylogs.

So, lets start!

1. Go to <http://www.drivehq.com/> and register by following the registration procedure of the site. if you already have one account, just login.

2) Now comes the setting up of your keylogger. Enter the registration key from the cracked version you have downloaded. If you have 4.0.2 here is a key:
00-67NK4K-BRUCE-07E

YOU CAN USE ANY NAME

3) Right Click the Adramax icon from the tray bar and click on the Remote Installation menu. Click Next Button two times and select all the check boxes as shown in the below image. Click next.

4. Click Enable and enter a password so that no one else can open your keylogs. Now click on the next button three times.

Check the send logs every check box and enter the details as shown in the below image, and then click the next button.

5. Now enter the driveHQ details that you got from the above registration like as shown in the image below.

[IMG]<http://i953.photobucket.com/albums/ae15/judoplayer/e75d76f8-fc98-4825-8096-57d345c8fde0.jpg>[/IMG]

6. Click on the test button and if you get the success response, you are almost done!
Click next now!

7. You will get the below window. Select the path where you want to save your keylogger and click on the change icon button to change the .exe icon. You can use some jpeg icon so that the victim can be easily fooled! (Yeah, most people really fall for this)

The screen will now look like this:

Yes, That's it! You are done. You have to use some crypters to make the keylogger FUD. You can find plenty on the forums.

It's "ARDAMAX" not "ADRAMAX" :) Good post man! Keep it on.

fofobot - May 11, 2013, 3:49 pm

you should make a neptune project tutorial, and tell us if it is effective at sending the information.

LiquidRainbow - May 11, 2013, 3:52 pm

PTU - June 28, 2013, 2:28 am

I have used Ardamax Keylogger. It's very nice and reliable but detectable so I recommend to use good crypter ?

blu3 - July 1, 2013, 6:20 am

Thanks for the TuT. Do you happen to know any good free crypters? I know the free ones tend to not be 100% FUD, but some are like 80% FUD. Thanks!
