I'm in the need of someone to invest a relatively small amount of money in comparison to the profits the business WILL generate. I will only do business with users I deem respectable, and trustworthy. I am here to make money, and to make US money. For a detailed explanation in what I am doing PM me, and please do not waste my time. I also prefer you to be over 18 if at all possible. I also prefer you to have Skype, and a Microphone so we can interact on a more personal level.

This business will target people who are seeking to work at home, and or generate extra cash while on the computer but lack the technical skills needed to do so.

The investment is between 100 and 200 USD depending on how you feel about certain aspects of the idea.

You'd be directly involved in all decision making, and the management/payouts.

Vouching for abstruse, I've done a lot of work with him in the past and he knows what he's talking about. If I had the money I would invest, guaranteed profit.

Thanks for the vouch Joe, I'm looking forward to more PM's. This idea WILL work, and does already work but I just have a different method of promotion, and a different pitch.
