Thread: [Help with Error Expression nptr!=null - \[Revised\]](#)

jessman420 - April 30, 2013, 6:26 am

Revised ...

Perhaps I am asking for too much help, sorry if this is the case. Instead of helping me debug the entire source, maybe you can tell how to find what causes that type of error. I tried running it in debug overnight and it didn't show any errors, but it stopped visiting my url also.

End of Revision...

I have an app that I modified that runs perfectly, but after some time I get this debug assertion error expression `nptr!=null`. This occurs after running for about 6 hours.

This is not my source, I left the original credits in place. VertexNet has a nice panel, but the downloader needed static paths, like `C:\test.exe`, and this version supports environmental variables and the keylogger works.

I thought it would nice to make a custom version that I could add functions to.

Here is the app crash log and it was running on windows 7 x64.

Memory usage was stable at about 4200k.

Code Problem signature:

Problem Event Name: BEX
Application Name: svchost.exe
Application Version: 0.0.0.0
Application Timestamp: 517edbfb
Fault Module Name: MSVCR100.dll
Fault Module Version: 10.0.40219.325
Fault Module Timestamp: 4df2be1e
Exception Offset: 0008af3e
Exception Code: c0000417
Exception Data: 00
OS Version: 6.1.7600.2.0.0.256.1
Locale ID: 1033

What is the best way to find what cause this.

It is a win32 application that is compiled in VS2010. It is a http bot that connects to the vertexnet panel that I got from another site, that I modified from a console to a win32 application and added some error handling for the cmd parameters.

Here is the project source only no binaries. Both rar archives have the same pass: hackforums

Bot Project

Code <http://www.mediafire.com/?hxwnjyphd0aif73>

Panel

Code <http://www.mediafire.com/?4sq2b6vyfh3plfp>

For initial setup add the vertexnet.sql file and import.

Add your sql data in web panel\inc\connection.inc.php

Default login and pass is root|toor

Any help or suggestion would be fantastic.
