This is my brand new simplistic and effective button pack.

It comes with all these buttons as separate images for you to use in your threads or posts on HF. The price is a very affordable \$2, I am not aiming to make profit off of this but just to compensate for the time put into the pack.

These buttons are also all editable and resizable with the .PSD file as you need.

Just send me a PM to purchase or post below and I will contact you. I accept Paypal, Liberty Reserve and Payza.

This is a kind of thing you incorporate in a bigger design and sell as a whole, or as coded buttons on <http://codecanyon.net/>

Usually designers don't sell buttons like these by themselves their too simple.

Don't get me wrong, I think their nice and I like the style.

Anyways good luck with sales.

I am largely aware of what is common design practice. I am also clear of what my intentions are in making this button pack.
