Thread: [\[Resistant Network\] Skype Resolver + Extra Tools \[FREE | Download Link Included\]](#)

Crimin4L - May 1, 2013, 10:14 am

Hello, today I am releasing Resistant Resolver's public portable program which allows you to grab anyone's IP. This program has been in the making for about two days now and I believe it is ready to see the light of day. Please leave comments showing and expressing how you feel about this program.

Does this use an API for resolving? Also, can you show proof that it works?

Yes, it uses an API from my site, and no I can't show that it works. I would just be giving out someones IP and that is against the rules. You can test the resolver from resistantresolver.net, that is basically proving that this one works too. You can also just run it and test it, no harm in that. ?

You could simply resolve yourself or a friend on a VPN? ?

Why do all that work? Just test it out yourself...

No feed back? How am I supposed to make it better with none?

Updated the client. Added new symbol, press enter in textbox and it will resolve, added Skype resolve counter. + more!

Thanks for liking my resolver :3

Be sure to tell your friends about it!

Theistic - May 16, 2013, 9:08 pm

Vouch for this, legit. Works 100%, very satisfied with the API speed. Pretty dam good for a free resolver. Great contribute

Thank you very much for the feedback!

Homothe - May 17, 2013, 8:15 am

I like GUI and the resolver, works great, thank you!

Insight- - May 17, 2013, 8:46 am

Vouch for the resolver, fast and efficient!

Crimin4L - May 17, 2013, 1:33 pm

Just updated it guys.

Now its just not a skype resolver. Its has a couple different tools in it. just click more to see them!

Ziyad - May 17, 2013, 1:46 pm

Very nice, i love it keep the good work

typhoid - May 18, 2013, 12:25 am

this doesnt work for me mate. what are the requirements to run it?

Skype resolves are basically dead. Most don't work and only use a database saved when it did work.

keego - June 24, 2013, 3:53 pm

WHy does it say it's a trojan horse?

Whats a trojan horse? Its a website not a download. If your talking about the portable Skype Resolver then it comes up as a trojan because I crypted it so no one can get the API key.
