Thread: [How to convert a picture to a black and white/shades of grey alike picture?](#)

Odayleet - May 1, 2013, 5:02 pm

How would I convert a normal picture and transform it to this:

Thank you!

LTMunday - May 1, 2013, 8:23 pm

A similar effect can be achieved by using the "Cut Out" filter in Photoshop. Good luck!

stackoverflows - May 3, 2013, 2:47 am

Otherwise you can pen tool over it in Photoshop and fill the path with the colours.

I'll take a look at it... you think it would have a similar outcome?

Thanks! :D

if you've got illustrator and quick and nasty way to do it is just use live trace with 3-4 colours on a grey scale image

takes about 10 secs

Nop I don't have Illustrator :/

Thanks tho..
