Thread: [Bump up the Reviewers.](#)

Okay, so what I've seen is that not a ton of ebooks are sent in daily for reviewing, so I think the Reviewers should do more than just e-books.

The reviewers could have sub categories, ebook reviewers, contest reviewers, etc.

If this does sound acceptable, I'd love to add onto it, but I don't want to waste one hour of typing and get a big NO response. XD

For contests, I'm not sure what they're reviewing. I mean, its hard to tell if the OP will deliver or not. But I like the idea, it's be better if you elaborated more.

I suggested a up to the squad, nothing to review products...

I'd rather see someone that's in a higher position thoughts on this.

Reviewers group will only review eBooks nothing more, nothing less.
