How to set up a RAT | 2013

[Video: <http://www.youtube.com/watch?v=uRceN9c-oQs&feature=youtu.be>]

Gary - May 3, 2013, 6:37 pm

It's not that hard lol, any there are many threads on how to set it up. But thanks for the video post.

Yea, I just like making video's for user who are new to it.

Setev - May 3, 2013, 8:26 pm

"RAT, short for remote access trojan" just quoting the video.

Aha, you're kidding right?

RAT is an acronym for Remote Administration Tool. You should probably get your facts right, unless I'm wrong?

If I'm wrong and I'm actually being an absolute idiot please tell me. 'Cause there is a chance of that.

But otherwise it's a pretty good tutorial. (:

Steve~

It goes both ways, Some refer to either one. I always go by my definition.

But, you may be right. Thanks though!

Ps: If you have any questions or, need help pm me.

JulianRix - June 28, 2013, 1:48 am

I have seen better tutorials, but this one is also working.

blue-hate - *June 28, 2013, 7:52 am*

very useful tut for begginers thank you very much for that and for your hard work

Hulkies - *July 1, 2013, 9:18 pm*

Finally A good tut lv been looking forever

Passiwe - *July 20, 2013, 7:33 am*

I have the problem .

I make Port ,no-ip and all i Make server . When i click on them they will deleted and dont have nothing in Users ... Help ?
