I'm happy you hacked the website but your deface page is absolutely awful to be honest.

You should probably download one from somewhere else.

rfd - May 6, 2013, 6:27 am

Not professional giving away your email and defacing when you could do so much more, defacing is like an annoying way of reporting a vulnerability!

Pendragon - May 7, 2013, 3:36 pm

Everyone shut your pie holes. You are in the presence of an Ex Nullroot member. These were among the most feared hackers back in the day.

MindOfLogic - May 7, 2013, 3:51 pm

It seems as if every kid who defaces a website is 12> years old and has absolutely horrific grammar.

As opposed to the other sections? At least most of web and server exploitation requires skill and knowledge, unlike the other shit in the "hacking" subforum.

SQL is the most simple language I can think of. Anyone can understand what a union is.

Fix "I am your father in Cyber Space & Security" to I am your father when it comes to Cyber Space & Security" and you're good to go m888. The ending was the best regardless.

Did I mention SQL in my post? I mentioned "web and server exploitation". You know that SQL injection isn't the only way to hack servers, right?
