Thread: [\[TuT\] How To Get Unlimited Real Twitter Followers \[TuT\]](#)

Kronenbourg - May 6, 2013, 9:25 am

It's a real simple and easy method just make sure to read very carefully so you wont get confused ^^

Step 1

Go and register here:

Code <http://www.claimfans.in/>

Do not afraid you wont get exchange followers this will be an autopilot.

Step 2

Once registered go ahead and make some Youtube views or anything, you need around 60 points which literally wont take more than 5 minutes to get

Step 3

Now that you have 60 points, you'll add a twitter account by clicking on the "Twitter account" in the left menu tab

Once you have added your twitter account, you will see 2 things you can edit and those are "ADD coins" and "CPC". DO NOT CHANGE ANYTHING YET.

Step 4

Go to your twitter account settings and scroll down to "Tweet Privacy" and make sure you Enable that. This means when someone tries to follow you, you'll have to confirm before. You'll understand this later.

Step 5

Now go back to claimfans and to your twitter account (on claimfans) and click ADD coins, add 60 coins (or whatever amount you got)

Click on CPC and change the default "1" to the maximum which is 8.

Step 6

Well that's it guys, you're done. Now your twitter account is advertised on Claimfans. People will follow you but they will not be able to "confirm" on claimfans that. So you wont get charged coins and this will last Forever (until they fix this)

Well its pretty simple.. You know these sites where you view/like stuffs on youtube/facebook its

same here you must earn few points and then you kinda exchange it! You should try it on empty twitter account!

I'll provide proof soon

Sites like this wherein you exchange clicks, favorites, likes, etc. won't allow your twitter account to be private. Most would ban your account from the site until you make it public again.

Hmm well I tried this with my twitter account to [tweet privacy enabled] didn't work and when I disable it I still don't get any followers...

So Idk if the exchange site is not popular or why it's not working for both..

Singi - May 9, 2013, 6:51 am

Your twitter will be blocked. Addmefast doesn't allow private twitter accounts.
