It's a simple method to do, but it requires time & patience which a lot of people don't have. But good luck with your services.

I'm not entirely sure this service is allowed. I'd ask staff before selling.

Doxing isn't illegal. The information is publicly available. You just have to find it.

Would you be able to do somebody from the Philippines? I got pretty much all his contact information. I would like something slightly more detailed.
